1.0 INTRODUCTION

Between 1943 and 1989, historic releases of contamination to the Columbia River occurred during the Hanford Site weapons production mission. In addition, waste disposal practices at the Hanford Site also resulted in release of contaminants to the upland soil. Some of the contaminants have moved from the soil into groundwater beneath the Hanford Site. The contaminants then moved via the groundwater into the Columbia River where the groundwater percolates up through the river bottom and mixes with river water and riverine sediments. As a part of the remedial investigation (RI), it is important to understand what contaminants are present, the concentrations of these contaminants, and current contaminant locations because the contamination may have undesirable effects on humans and animals that use the Columbia River.

1.1 PURPOSE

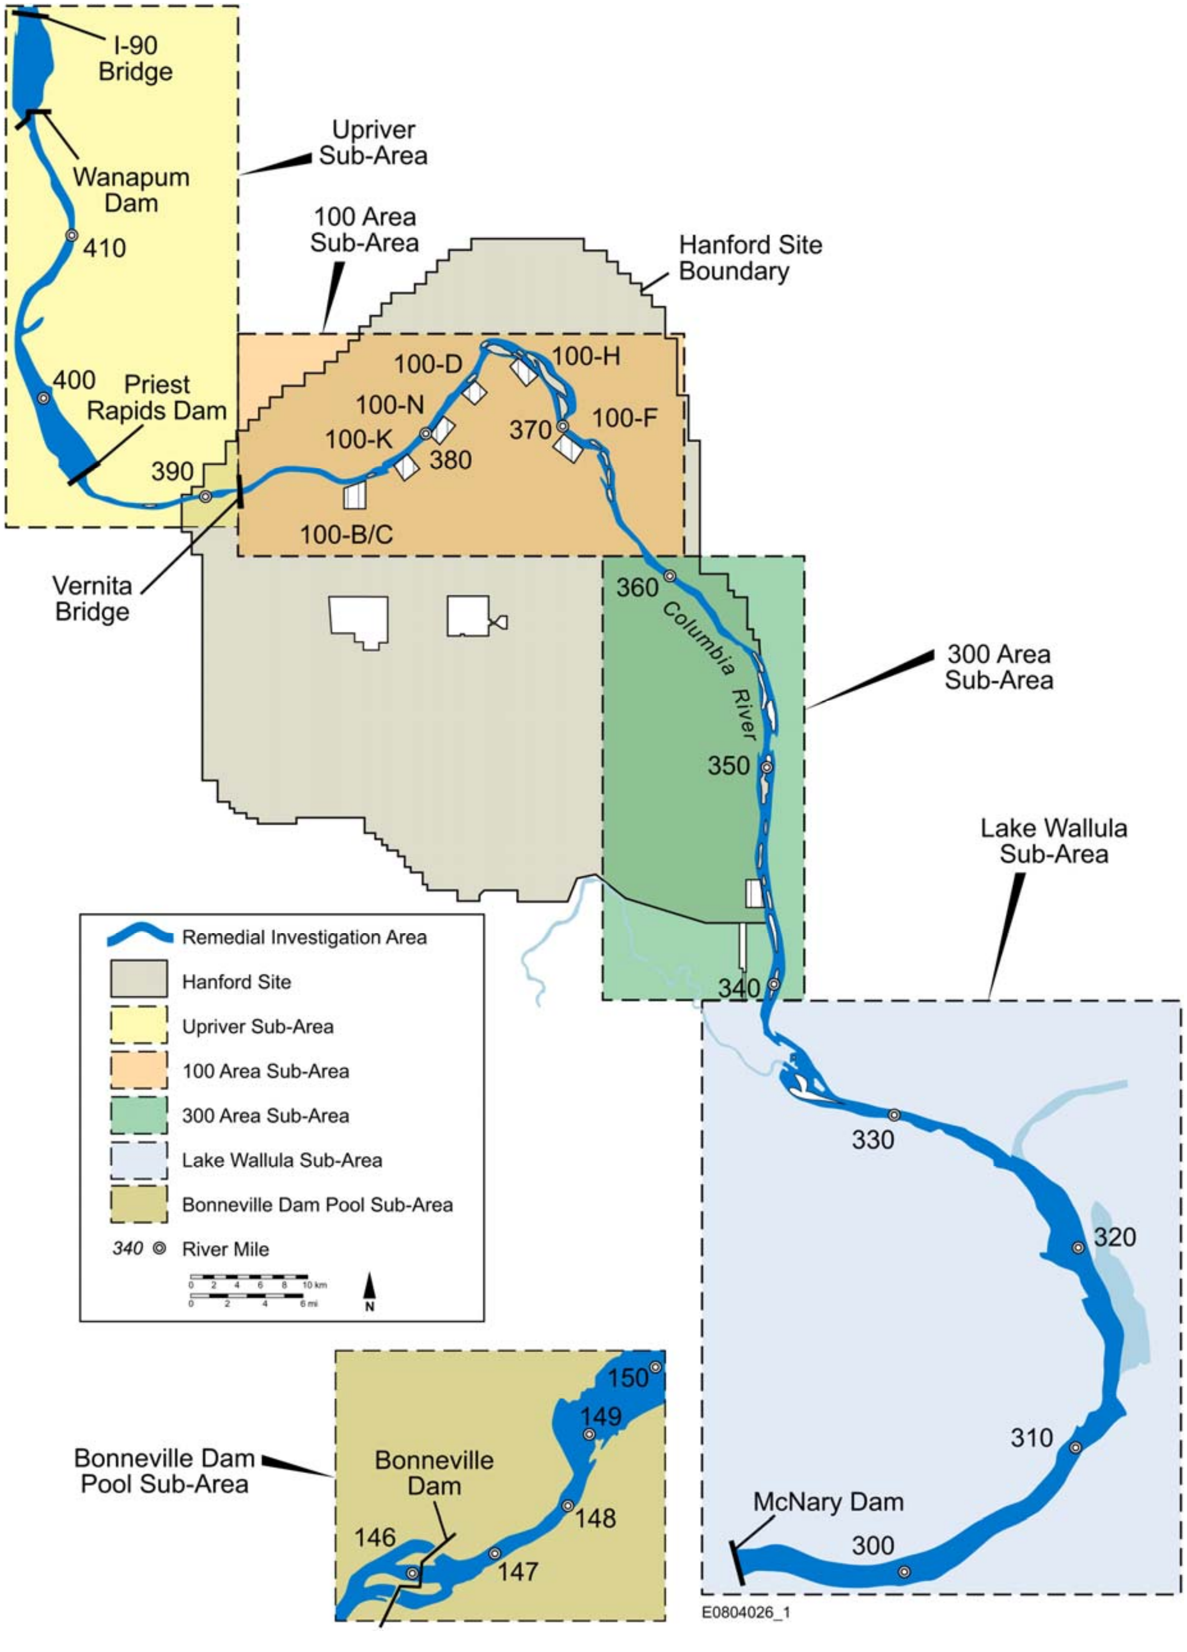
This report has been prepared in support of the RI of Hanford Site Releases to the Columbia River and summarizes the results of the data quality assessment (DQA) that was performed on the analytical data generated in connection with the following data collection efforts:

- 2008/2009 surface water, sediment, and soil data collection
- Groundwater upwelling investigation (e.g., pore water, surface water, sediment) sample collection
- Fish tissue sample collection.

The field investigation program for the RI was developed by the U.S. Department of Energy (DOE), the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology), collectively referred to as the "Tri-Parties." The scope of the sampling program was based on the outcome of the data quality objectives (DQO) process (WCH-265) to address the data needs. The rationale for the sampling approach and strategy are detailed in DOE/RL-2008-11, *Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River* (Work Plan). Appendix A to the work plan is the sampling and analysis plan (SAP) that describes the sampling activities. Requirements for sampling methods, sample handling and custody and analytical methods are detailed in WCH-286, *Sampling and Analysis Instructions for the Remedial Investigation of Hanford Site Releases to the Columbia River*. The work plan, SAP, and sampling and analysis instructions directed the sample collection methods and locations. Figure 1-1 depicts the investigation area for the RI, which is divided into five subareas based on proximity to the Hanford Site.

The RI field activities associated with the collection of sediment, river water, and soil in and adjacent to the Columbia River near the Hanford Site and in nearby tributaries are documented in WCH-352, *Field Summary Report for Remedial Investigation of Hanford Site Releases to the Columbia River, Hanford Site, Washington*. WCH-352 describes the sampling locations, identifies samples collected, and describes any modifications and additions made to the SAP.

Figure 1-1. Columbia River Remedial Investigation Area.



The groundwater upwelling field activities and data collection are documented in WCH-380*, Sampling Summary Report for Mapping and Characterization of Hanford Site Releases into the Columbia River via Groundwater Upwelling*. The RI field activities associated with the collection of fish tissue samples are documented in WCH-387*, Sampling Summary Report for Fish Sample Collection for the Remedial Investigation of Hanford Site Releases to the Columbia River*.

The data from the RI sampling efforts will be used by the DOE to evaluate the nature and extent of past releases of Hanford Site contaminants to the Columbia River. Results from the sampling efforts will be combined with previously collected environmental data and used to complete a baseline human health and ecological risk assessment prepared in accordance with *Comprehensive Environmental Response, Compensation, and Liability Act of 1980* (CERCLA) guidance. The risk assessments will address current environmental conditions in the Columbia River. The data are being used to allow regulators to make final decisions for cleaning up Hanford Site contamination that exists in and along the Columbia River. The DQA was required to verify that the data collected in support of the RI are suitable for their intended purpose to support the Screening Level Ecological Risk Assessment and the Baseline Human Health Risk Assessment.

1.2 SCOPE

The scope of this DQA was detailed in Section 3.13 of the SAP (DOE/RL-2008-11, Appendix A). The purpose of this evaluation is to determine if quantitative data are of the correct type and are of adequate quality to meet the project DQOs. Tasks that were completed in support of this DQA included data validation and assessment of laboratory analytical data packages to determine if the data meet the DQOs. The DQOs associated with data include characterization and quantification of contaminants in the Columbia River, quantification of human health and ecological risk from contact with the river environment, and evaluation of the potential need for remedial action to reduce potential risk from contact with contaminants.

2.0 DATA QUALITY ASSESSMENT METHODS

The following subsections summarize the methods that were used for the DQA. The media evaluated as part of this DQA consisted of surface water, sediment, soil, pore water, and fish tissue. This section describes the methodology used for the assessment of laboratory data packages.

2.1 DATA QUALITY ASSESSMENT OF LABORATORY DATA PACKAGES

During the RI field sampling activities, surface water, sediment, soil, groundwater upwelling, and fish tissue samples were collected and submitted to off-site laboratories for analysis of chemical, physical, and radiological methods. The media sampled in connection with the groundwater upwelling investigation included pore water, surface water, and sediment. The analytical laboratories used for chemical analysis are listed in Table 2-1. The samples were grouped into unique sample delivery groups (SDGs). Typically, only one medium was included in any SDG. A summary of the number of SDGs by medium that were assessed during this DQA is provided in Table 2-2. The analytical results for the samples associated with each SDG were reported by the laboratory in data packages that included laboratory quality assurance/quality control (QA/QC) results. Table 2-3 lists the analytical methods used by the laboratories.

Table 2-1. Analytical Laboratories.

Laboratory	Address
Lionville Laboratory, Inc.	208 Welsh Pool Road, Exton, PA 19341
Test America	2800 George Washington Way, Richland, WA 99354
	5815 Middlebrook Pike, Knoxville, TN 37921
Eberline Analytical Corporation/Eberline Services	2030 Wright Avenue, Richmond, CA 94804
Pacific Northwest National Laboratory, Battelle Marine Science Laboratory	1529 West Sequim Bay Road, Sequim, WA 98382

Table 2-2. Number of Sample Delivery Groups Assessed by Medium.

Medium	Number of SDGs Assessed[a]
Surface water	51
Sediment	87
Soil	6
Groundwater upwelling (pore water, surface water, and sediment)	189
Fish tissue	47
Total	**378**

[a] Includes SDGs that were assessed and validated for this DQA.

DQA = data quality assessment
SDG = sample delivery group

Table 2-3. Analytical Methods.

Parameter	Analytical Method	Media Analyzed	Laboratory
Volatile organic compounds	EPA 8260B	SW, SD, PW	Lionville
Semivolatile organic compounds	EPA 8270C	SW, SD, SO	Lionville
Metals	EPA 6010/7470/7471	SW, SD, SO, FT	Lionville
Hexavalent chromium	EPA 7196A	SW, SD, SO, PW	Test America (WA)
	EPA 6800	FT	PNNL
Speciated arsenic	EPA 1632A	FT	PNNL
Methyl mercury	EPA 1630M	FT	PNNL
Pesticides	EPA 8081	SW, SD, SO, FT	Lionville
Polychlorinated biphenyls	EPA 8082	SW, SD, SO, FT	Lionville
PCB congeners	EPA 1668	SW, SD, FT	Test America (TN)
Total organic carbon	EPA 415.1	SD, SO	Lionville
Dissolved organic carbon	EPA 415.1M	SW	Lionville
Anions (bromide, fluoride, nitrate, nitrite, orthophosphate, sulfate)	EPA 300.0	PW, SW	Lionville
Nitrate/nitrite - combined	EPA 353.2	PW, SW	Lionville
Petroleum hydrocarbons/diesel range organics	EPA 8115	SW, SD, SO	Lionville
Radionuclides	Gamma Spectroscopy	SW, SD, SO, FT	Eberline
	Carbon-14	SW, SD, SO, FT	Eberline
	Isotopic Plutonium	SW, SD, SO, FT	Eberline
	Strontium-90	SW, SD, SO, FT	Eberline
	Technetium-99	SW, SD, SO, FT	Eberline
	Isotopic Thorium	SW, SD, SO, FT	Eberline
	Isotopic Uranium	SW, SD, SO, FT	Eberline
	Tritium	SW, SD, SO, FT	Eberline

FT = fish tissue
PCB = polychlorinated biphenyl
PW = pore water
SD = sediment
SO = soil
SW = surface water
TN = Tennessee
WA = Washington

Most of the laboratory data packages that were evaluated for this DQA were assessed for adequacy in meeting the requirements for precision, accuracy, completeness, and required detection limits as described in Section 3.13 of the SAP. The data packages that underwent data assessment are listed in Table 2-4. Several additional SDGs were third-party validated as described in Section 2.1.1.

Quality control (QC) results associated with analyses of the RI samples were compared to performance criteria and specifications contained in the work plan (DOE/RL-2008-11); HNF-20434, *Data Validation Procedure for Radiochemical Analyses*; and HNF-20433, *Data Validation Procedure for Chemical Analyses*. The results of the evaluation of each laboratory data package, or SDG, were used to determine if the data were of sufficient quality for their intended project use.

– = samples not analyzed for this parameter
DOC = dissolved organic carbon
DRO = diesel range organics
NO_2 = nitrite
NO_3 = nitrate
PCBs = polychlorinated biphenyl
PHC = petroleum hydrocarbons
PW = pore water
SD = sediment
SDG = sample delivery group
SVOC = semivolatile organic compound
SW = surface water
TOC = total organic carbon
VOC = volatile organic compound

Each SDG that was assessed contained at least one, and often several, different analytical methods that were assessed as part of the DQA. The methods are listed in Table 2-3. Data assessment was not conducted for wet chemistry or physical parameters (e.g., grain size, hardness, and alkalinity) or acid volatile sulfide (AVS) results. Several QC parameters, as appropriate for a given analytical method, were evaluated including the following:

- Holding time
- Method detection limits
- Surrogate recoveries
- Method blank results
- Laboratory control sample (LCS) results

- Matrix spike/matrix spike duplicate results
- Tracer results (for radionuclides)
- Laboratory duplicate results
- Field QC sample results (e.g., trip blanks, equipment blanks, field duplicates, field blanks).

Each QC parameter was assessed and noncompliant results were noted on QC summary worksheets. If a corrective action was needed for a noncompliant result, that action was also noted on the QC summary worksheet, and data qualifiers were added to impacted samples in accordance with the guidance documents (HNF-20433 and HNF-20434). In addition to qualifiers that have been assigned by the analytical laboratory, the following data qualifiers were assigned during data assessment:

- UJ – The compound or analyte was analyzed for and detected in the sample. However, due to a minor QC deficiency associated with method blank results, the associated results are labeled as estimated quantitation limits. The data are considered usable for decision-making purposes.

- J – Due to a minor QC deficiency identified during the data assessment, the associated concentration is an estimate. The data are considered usable for decision-making purposes.

- R – Due to an identified major QC deficiency, the data are not considered usable for decision-making purposes (i.e., rejected).

Based on the results of the DQA, a determination was made as to whether the data were suitable for their intended purpose to support the Screening Level Ecological Risk Assessment and the Baseline Human Health Risk Assessment. The results of the DQA are discussed in Section 3.0 of this report. The 2008/2009 surface water, sediment, and soil investigation assessment results are discussed in Section 3.1; the groundwater upwelling assessment (pore water, surface water, sediment) results are discussed in Section 3.2; and the fish tissue assessment results are addressed in Section 3.3.

2.1.1 Third-Party Data Validation of Laboratory Data Packages

Data quality for a subset of the laboratory data packages (i.e., SDGs) underwent third-party data validation. Approximately 5% of the laboratory analytical data packages from the 2008/2009 surface water, sediment, and soil investigation underwent third-party Level C data validation in accordance with Section 3.12 of the SAP. A similar level of effort was conducted for a subset of the groundwater upwelling and fish tissue data packages. These third-party validated SDGs are listed in Table 2-5.

A separate third-party data validation was conducted on a subset (approximately 5%) of the surface water, sediment, and soil samples that were analyzed for polychlorinated biphenyl (PCB) congeners as listed in Table 2-6. In addition, for the fish tissue data, 19 samples that were analyzed for PCB congeners were third-party validated, along with 33 speciated arsenic samples, four methyl mercury samples, and five hexavalent chromium samples. The fish tissue samples that were validated for these analytical methods are listed in Table 2-7. Table 2-8 lists several SDGs with PCB congener, speciated arsenic, methyl mercury, or hexavalent chromium analyses that were not validated as described above.

EPA = U.S. Environmental Protection Agency
PCB = polychlorinated biphenyl

Although these samples did not undergo a full validation, a preliminary review of the quality control data contained in the data packages for these SDGs was conducted, as described in Section 2.1.2 to identify potential bias or interferences to the associated sample results.

2.1.2 Preliminary QC Review Methods for PCB Congener, Arsenic, Mercury, and Hexavalent Chromium Results

In order to identify potential impacts to the usability of the data, a preliminary review was conducted of tabulated quality control results associated with the SDGs in Table 2-8. The chemical analyses that were performed include polychlorinated biphenyl congeners (Method 1668A), inorganic arsenic (Method 1632), hexavalent chromium (Method 6800) and methyl mercury (Method 1630). For these methods, the tabulated quality control results included the following QC parameters: method blank analyses, replicate sample results, and standard reference material, laboratory control sample and matrix spike recoveries. For the PCB congener analyses, the narrative presented at the beginning of each SDG data package was reviewed to identify potential quality control issues. In addition, the laboratory blank results were reviewed. Based on the results of the data quality review, data qualifiers were added to the associated sample concentrations.

The results of the review provide a broad, general overview of data quality associated with each of the methods used for the analyses, and are not intended as a replacement for data validation. Data validation is a more extensive and rigorous assessment of the data based on set procedures and guidelines that are used for the identification of potential data usability issues.

3.0 DATA ASSESSMENT RESULTS

This section provides a summary of the data assessment results. Section 3.1 summarizes the results of the 2008/2009 surface water, sediment, and soil DQA. Section 3.2 summarizes the results of the groundwater upwelling data assessment. Section 3.3 describes the results of the fish tissue data assessment.

Appendices A through E, for surface water, sediment, soil, groundwater upwelling, and fish tissue data, respectively (included on a CD), contain the QC summary worksheets prepared during the data assessment. These worksheets are grouped by medium and by SDG and contain information on the parameters analyzed; sample IDs; the QC parameters evaluated; QC deficiencies identified during the assessment, if any; corrective actions taken as a result of the deficiencies; and any data qualifiers that were applied as a result of the identified deficiencies. With the exceptions discussed below, only minor QC deficiencies were identified during the data assessment, and the majority of the data are suitable for their intended use. Data that are deemed unusable for decision-making purposes in the RI and risk assessments are those that were rejected (qualified “R”) based on a major QC deficiency identified during data assessment. The guidance documents used for this assessment were the work plan (DOE/RL-2008-11); HNF-20434, *Data Validation Procedure for Radiochemical Analyses*; and HNF-20433, *Data Validation Procedure for Chemical Analyses*. A summary of the rejected data including medium, SDG number, analytical class, number of rejected samples, and basis for the rejection is presented in Table 3-1. This table provides a broad summary of the rejected data. A more detailed summary of the rejected data by compound and sample identification number is presented in Tables 3-2 through 3-6 for surface water, sediment, soil, groundwater upwelling, and fish tissue data, respectively.

3.1 SUMMARY OF RESULTS FOR 2008/2009 SURFACE WATER, SEDIMENT, AND SOIL DATA

The following subsections present by medium and analytical method a summary of the QC deficiencies identified during the data assessment for the 2008/2009 surface water, sediment, and soil data.

3.1.1 Summary of Data Assessment Results for Surface Water

The following subsections present a summary of the results of the assessment and the major and minor QC deficiencies identified during the data assessment of the surface water data. Forty-six SDGs were included in this assessment. The majority of the data meet the project DQOs. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-2.

3.1.1.1 Radionuclides – Surface Water. For radionuclide data, QC results were generally compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Table 3-1. Summary of Rejected Data by Medium and Sample Delivery Group. (3 Pages)

Medium	Sample Delivery Group Number	Analytical Method	Number of Samples with Rejected Results	Basis for Rejection
Surface water	K1439	SVOC - 8270	1	Surrogate recovery <10%

DRO = diesel range organic
J = estimated
PCB = polychlorinated biphenyl
R = rejected
SDG = sample delivery group
SVOC = semivolatile organic compound
U = nondetect
µg/L = micrograms per liter

All samples were analyzed prior to expiration of the associated 6-month required holding time. Reported detection limits (RDLs) and minimum detectable activity (MDA) levels were reviewed and determined to be at or below the levels specified in the project SAP, with the exception of the RDLs for carbon-14 and strontium and the MDA levels for radium-226, radium-228, americium-241, beryllium-7, and ruthenium-106, which exceeded the limits specified in the SAP (DOE/RL-2008-11, Appendix A).

Method blanks generally did not contain concentrations of target analytes above corresponding detection limits, with the exception of thorium-230 in blanks associated with a few SDGs. LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Noncompliant tracer recovery results were reported for technetium-99 in a few SDGs. The recoveries generally exceeded the 105% upper control limit, indicating a potential high bias in sample concentrations. Because the associated sample results were reported as nondetect for technetium, there was no action taken based on this finding. Noncompliant matrix spike recoveries were found in SDG K1427 for tritium and in SDG K1654 for carbon-14, and the associated sample results were qualified as estimated (J). Laboratory duplicate samples were analyzed to measure the precision of reported results. The relative percent differences (RPDs) between the duplicate pairs generally indicated that there was an acceptable level of analytical precision.

QC results for the radionuclides were compliant for most QC parameters. None of the radionuclide data was rejected. Radionuclide data for surface water are of sufficient quality for their intended end use.

3.1.1.2 Volatile Organic Compounds – Surface Water. For the surface water volatile organic compound (VOC) data, QC results were compliant for most QC parameters. None of the VOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Analysis of the samples in all SDGs took place prior to the expiration of the associated holding time. Detection limits for all compounds that are reported with this analysis are the same or below those specified in the SAP (DOE/RL-2008-11, Appendix A), with the exception of methylene chloride. Laboratory blanks were analyzed for target VOCs to identify potential false-positive concentrations resulting from laboratory processing and analyses. Methylene chloride and/or acetone were detected in many of these blanks at trace concentrations. Both are classified by the EPA as common laboratory contaminants. In order to eliminate potential false-positive results, sample concentrations less than 10 times the blank concentration were qualified as estimated nondetect (UJ). If the sample concentration of the blank contaminant was below the RDL it was replaced with the RDL as part of this action.

One equipment blank associated with SDG K1654 contained trace concentrations of toluene. Several trip blanks associated with a number of the SDGs contained low-level concentrations of methylene chloride, acetone, and/or toluene. Based on the guidance used for this DQA (HNF-20433), no action was taken with respect to equipment blank or trip blank contamination.

LCS recoveries were generally compliant for all samples, indicating that accuracy requirements were satisfied. Exceptions include 2-butanone, acetone, and/or chloroethane LCS recoveries reported in some SDGs. Matrix spike recoveries and RPDs were compliant for all SDGs. The field duplicate results demonstrated that there was little variability and acceptable levels of precision of reported results. Laboratory duplicates were not analyzed in association with any of the SDGs.

Because only minor QC deficiencies were identified during the assessment, results from the VOC data are of sufficient quality for their intended end use.

3.1.1.3 Semivolatile Organic Compounds – Surface Water. For the semivolatile organic compounds (SVOCs) in surface water, QC results were compliant for most QC parameters. Although data from one sample were rejected based on low surrogate recoveries, the QC results from the SVOC analyses indicate that the remaining results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-2.

Detection limits were reviewed and found to be generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A). Reported detection limits that exceeded those specified in the SAP included 2,4,5-trichlorophenol, 2-nitroaniline, 3-nitroaniline, 4-nitrophenol, 4-nitroaniline, 4,6-dintro-2-methylphenol, and pentachlorophenol. The samples were extracted and analyzed prior to holding time expirations, with the exception of sample J17K53 in SDG K1399, which was extracted out of holding time, but less than twice the holding time limit. Results for this sample were qualified as estimated (J).

Bis(2-ethylhexyl)phthalate and di-n-butyl phthalate, both classified by EPA as common laboratory contaminants, were detected in several laboratory blanks, indicating potential introductions from the laboratory during sample preparation and analysis. Detected results below the action level were qualified as estimated nondetect (UJ).

Most surrogate recoveries were compliant for all samples, indicating that instrument performance during sample analysis was acceptable. However, recovery of the surrogates 2,4,6-tribromophenol, 2-fluorphenol, and phenol-d5 at less than 10% in sample J17TK1 in SDG K1439 resulted in the rejection of results for several associated acid fraction compounds for that sample.

LCS and matrix spike recoveries indicated some extraction difficulties for some SVOCs. Numerous compounds including 4-chloroaniline, 3-nitroaniline, 4-nitroaniline, 3,3'-dichlorobenzidine, hexachlorocyclopentadiene, and hexachloroethane had recoveries that were below the lower control limit, demonstrating a potential low bias to sample results (i.e., concentrations may potentially be underestimated). LCS and matrix spike recoveries below the lower control limit resulted in associated data being qualified as estimated (J).

Field duplicate comparisons with the primary sample results generally indicated acceptable precision.

The DQA identified compounds with extraction problems resulting in extremely low recoveries. Although acid fraction data from sample J17TK1 in SDG K1439 were rejected based on surrogate recoveries, the QC results from the SVOC analyses indicated that the remaining data are of sufficient quality for their intended project use.

3.1.1.4 Polychlorinated Biphenyls – Surface Water. For the PCB data, QC results were compliant for most QC parameters. Although data from two samples each in two SDGs were rejected based on holding time exceedances, the QC results from the PCB analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following discussion is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are summarized in Table 3-2.

Detection limits reported for all Aroclors were below the specifications listed in the SAP (DOE/RL-2008-11, Appendix A). PCB sample extractions on all samples analyzed in SDGs K1453 and K1455 were performed beyond twice the holding time limit. All of the nondetect sample results were qualified as unusable, or rejected (R), based on this finding. Results from two samples were rejected in each SDG.

Low matrix spike recoveries of Aroclor-1016 were identified in SDGs K1439 and K1452. Aroclor-1260 had a low recovery in SDG K1439. Associated samples were qualified as estimated (J). Other QC parameters including method blank results, laboratory duplicate, field duplicate, surrogate, and LCS recoveries were generally compliant.

Although all the results for all samples in SDGs K1453 and K1455 were rejected based on holding time exceedances, the PCB data for all other SDGs are of sufficient quality for their intended project use.

3.1.1.5 Chlorinated Pesticides – Surface Water. For the pesticide data, QC results were compliant for most QC parameters. Although data from two samples in both SDG K1453 and K1455 were rejected based on holding time exceedances, the QC results from the pesticide analyses indicated that the majority of the results are of acceptable quality for their intended project use. The following discussion is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-2.

Detection limits were at or below those specified in the SAP (DOE/RL-2008-11, Appendix A). The holding time limits were exceeded by more than twice the limit for samples analyzed in SDGs K1453 and K1455. All nondetect sample results associated with these SDGs were therefore rejected and are considered unusable. Results from two samples in each of the two SDGs were rejected based on this finding.

No compounds were detected in the method blanks or equipment blanks. Matrix spike and LCS results were generally compliant, although a few SDGs had noncompliant recoveries for delta-BHC, heptachlor, aldrin, endosulfan, methoxychlor, and/or 4,4'-DDT. Low recoveries indicate a potential low bias for associated sample concentrations; therefore, associated sample results were qualified as estimated (J). LCS and matrix spike QC results for toxaphene were not provided, and therefore toxaphene results for all samples in all SDGs were qualified as estimated (J). The field duplicate results indicated acceptable levels of precision. Laboratory duplicates were not analyzed in association with any of the SDGs.

Although results from two samples each in SDGs K1453 and K1455 were rejected based on holding time exceedances, the majority of the pesticide sample results are of sufficient quality for their intended project use.

3.1.1.6 Metals – Surface Water. For the metals data, QC results were compliant for most QC parameters. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and the minor QC deficiencies noted during the assessment.

Detection limits for most metals were generally at or below those specified in the SAP with the exception of silicon. There was no action taken with respect to the elevated detection limits. Samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A).

A number of elements were detected in the preparation blanks associated with the surface water SDGs, indicating potential interferences during sample preparation and analysis. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ).

Equipment blanks were analyzed in association with SDGs K1399 and K1654. The results of the equipment blank were used to assess the effectiveness of decontamination procedures and the potential for carry-over contamination to transfer from the sampling equipment to the samples. A number of elements were detected in both equipment blanks, at concentrations higher than in the laboratory blanks. In accordance with the guidance used for this DQA (HNF-20433), no action was taken based on the equipment blank detections.

LCS recoveries were compliant for all of the SDGs. Noncompliant matrix spike results were identified for silicon in a few SDGs. In all cases, the concentrations of silicon in the sample used for the spike analyses exceeded four times the spike concentration making the contributions from the spike insignificant relative to native amounts. No action was taken with respect to sample qualification in these cases. Noncompliant recoveries of lithium and aluminum resulted in SDGs K1399 and K1652 lithium and aluminum sample results being qualified as estimated (J).

The RPDs between sample/duplicate pairs were acceptable for most of the elements in the laboratory and field duplicates. Noncompliant RPDs for the laboratory duplicates generally did not result in any impacts to the samples results. No action was taken based on noncompliant field duplicate results.

The majority of the QC results reviewed in association with the other elements was compliant with criteria contained in the SAP (DOE/RL-2008-11, Appendix A) and other guidance (HNF-20433), indicating that the metals data are of sufficient quality for their intended project use.

3.1.1.7 Hexavalent Chromium – Surface Water. Hexavalent chromium QC results were compliant for all QC parameters assessed. None of the hexavalent chromium data was rejected or otherwise qualified during the data assessment, and the data are acceptable for their intended project use.

3.1.1.8 Diesel Range Organics – Surface Water. In general, diesel range organics (DRO) QC results were compliant. Most of the DRO data are acceptable for their intended project use. One sample result in SDG K1442 was qualified as rejected based on a low surrogate recovery. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The rejected result is listed in Table 3-2.

All samples were extracted prior to expiration of the 14-day holding time. Detection limits were at or below the level specified in the SAP (DOE/RL-2008-11, Appendix A). Surrogate recoveries were in control for most sample analyses, with the exception of SDGs K1442 and K1447. For SDG K1442, one sample had a recovery of 0%, resulting in that sample data being qualified as rejected and unusable. Laboratory blanks were analyzed to determine potential interferences from preparation and analysis of the samples. DRO was detected in several of these blanks including those associated with SDGs K1441, K1442, K1447, K1452, K1453, and K1455. Associated detected sample results were qualified as estimated nondetect (UJ).

LCS and matrix spike recoveries were below the lower control limit for many samples, suggesting a low bias to sample concentrations. Associated samples were qualified as estimated (J). Field duplicate results were generally compliant for the DRO analyses.

The only major QC deficiency identified for the surface water DRO data was the low surrogate recovery in one sample that resulted in the data for that sample being qualified as rejected. The majority of the DRO data are of sufficient quality for their intended project use.

3.1.1.9 Dissolved Organic Carbon – Surface Water. In general, dissolved organic carbon (DOC) QC results were compliant for most QC parameters. None of the DOC data was rejected, and the data are considered acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A), and all samples were analyzed within the required holding time limits.

No DOC concentrations were detected in the associated laboratory blanks. DOC was detected in two equipment blanks. Based on the guidance used for this DQA (HNF-20433), no action was taken based on this finding. LCS results were generally compliant; however, LCS samples were not analyzed for a few SDGs. Associated samples for those SDGs were qualified as estimated (J). Matrix spike recoveries were compliant for all SDGs. The results from comparison of sample results from those of corresponding duplicates indicate little variability.

No major QC deficiencies were identified during the assessment of DOC data quality, and the data are sufficient for their intended project use.

3.1.1.10 Anions – Surface Water. Anions that were analyzed include bromide, chloride, fluoride, nitrate, nitrite, orthophosphate, sulfate, and combined nitrate/nitrite. Quality control results were compliant for most QC parameters and were acceptable for their intended project use. No results were rejected. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values for these analytes were not specified in the SAP (DOE/RL-2008-11, Appendix A). Holding times were exceeded by less than twice the limit for nitrate, nitrite, and orthophosphate for samples in SDGs K1641, K1648, and K1654. Detected and nondetect results were qualified as estimated (J).

Chloride was detected in the laboratory blanks associated with SDGs K1656 and K1660, however no results were qualified since the results were greater than five times the blank concentrations. Sulfate was detected in the equipment blank associated with SDG K1651 and chloride and nitrate/nitrite as N were detected in the equipment blanks associated with SDG K1654. Based on the guidance used for this DQA (HNF-20433), no action was taken based on these equipment blank findings. LCS and matrix spike results were compliant for all SDGs, except for SDGs K1648 and K1651. No LCS or matrix spike analyses were performed for nitrate/nitrite as N in these two SDGs, and all results were qualified as estimated (J). The field duplicate for SDG K1648 had noncompliant RPDs for sulfate and chloride. Based on the guidance (HNF-20433), no action was taken based on this finding.

No major QC deficiencies were identified during the assessment of anion data quality, and the data are sufficient for their intended project use.

3.1.2 Summary of Data Assessment Results for Sediment

The following subsections present a summary of the major and minor QC deficiencies identified during the data assessment of the sediment data. Seventy-seven SDGs were included in this assessment. The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are listed in Table 3-3.

3.1.2.1 Radionuclides – Sediment. Radionuclide target analytes include carbon-14, total strontium, technetium-99, various isotopic forms of uranium, plutonium, and thorium, and a gamma scan that provides results for 17 additional radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. RDLs and MDA levels were reviewed and determined to be at or below the levels specified in the project SAP (DOE/RL-2008-11, Appendix A). In accordance with the guidance used for this DQA (HNF-20434), no action was taken with respect to detection limit exceedances.

Method blanks generally did not contain concentrations of target analytes above corresponding detection limits. LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Several noncompliant tracer recovery results were reported for samples in several SDGs. Recoveries generally exceeded the 105% upper control limit, indicating a potential high bias to sample concentrations. If the sample was nondetect for the associated radionuclide, there was no action taken based on this finding. Detected sample results were qualified as estimated (J).

Laboratory duplicate samples were analyzed to measure the precision of reported results. The RPDs between the duplicate pairs indicated that there was an acceptable level of analytical precision. Matrix spike analyses were not performed in conjunction with the carbon-14 analyses and therefore all carbon-14 sample results from all SDGs were qualified as estimated (J).

None of the radionuclide data was rejected, and the data are of sufficient quality for their intended project use.

Table 3-3. Summary of Rejected Sediment Data by Method. (19 Pages)

Analytical Method	Analyte	SDG Number	Sample Identification	Sample Date	Results	Units	Laboratory Qualifier	Validation Qualifier

B = estimated
J = estimated
PCB = polychlorinated biphenyl
R = rejected
SDG = sample delivery group
SVOC = semivolatile organic compound
U = nondetect
µg/kg = micrograms per kilogram

3.1.2.2 Volatile Organic Compounds – Sediment. For the VOC data, QC results were compliant for most QC parameters. None of the sediment VOC results were rejected and therefore all data are sufficient for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Analysis of the samples took place prior to the expiration of the associated holding time. Detection limits for all compounds that are reported with this analysis are the same or below those specified in the SAP (DOE/RL-2008-11, Appendix A), with the exception of 1,1,1-trichloroethane in most SDGs. Laboratory blanks were analyzed for target VOCs to identify potential contamination resulting from laboratory processing and analyses. Methylene chloride was detected in many of these blanks at trace concentrations. Associated samples also contained similar concentrations of methylene chloride, and detected sample concentrations less than 10 times the blank concentration were qualified as estimated nondetect (UJ). If the sample concentration of the blank contaminant was below the RDL, it was replaced with the RDL as part of this action. Equipment blanks contained concentrations of methylene chloride and 2-butanone. Trip blanks contained concentrations of methylene chloride, acetone, and 2-butanone. There was no action taken with respect to equipment blank or trip blank contamination. Field blanks were collected in association with core sediment samples. These were deionized water samples collected at the core processing facility to assess the potential for cross-contamination. The field blanks were analyzed with SDGs K1594, K1595, and K1596. No VOCs were detected in these field blanks.

LCS and matrix spike recoveries were generally compliant, indicating that accuracy requirements were satisfied; however, recoveries for 2-butanone and acetone exceeded the upper control limit in many SDGs, indicating a potential high bias. Detected sample results were qualified as estimated (J) based on these recoveries.

Surrogate recoveries exceeded the criteria in two SDGs; however, no action was taken since the associated compounds were nondetect. With the exception of methylene chloride detections in the associated blanks and subsequent qualification of associated sample results as estimated nondetect, there were very few data quality issues. The field duplicate and laboratory duplicate results demonstrated that there was little variability and acceptable levels of precision in reported results.

Data from the VOC analyses are acceptable for their intended project use.

3.1.2.3 Semivolatile Organic Compounds – Sediment. For the SVOCs, QC results were compliant for most QC parameters. Although a small fraction of the data (associated results from 10 samples) was rejected based on holding time exceedances and low surrogate recoveries, the QC results from the SVOC analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-3.

Detection limits were reviewed and found to be generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A). Reported detection limits that exceeded those specified in the SAP include hexachlorobenzene, 2-chloroaniline, 2-nitroaniline, 2,4-dinitrophenol, 3-nitroaniline, 4-nitrophenol, 4-nitroaniline, pentachlorophenol, 3,3'-dichlorobenzidine. The majority of the sediment samples were extracted and analyzed prior to holding time expirations. In most instances when the holding times had been exceeded, the sample results were qualified as estimated (J) because the holding time exceedance was less than twice the limit. In SDG K1497, five samples were qualified as rejected because the period from sample collection to extraction exceeded twice the holding time limit and all results were nondetect.

The majority of surrogate recoveries were compliant for all samples, indicating that instrument performance during sample analysis was acceptable. However, the recovery of the surrogate 2,4,6-tribromophenol at less than 10% resulted in the rejection of results for several associated acid fraction compounds for some samples in SDGs K1491, K1497, and K1542. For the sample J18MR6 in SDG K1580, the recoveries of one acid fraction and one base neutral surrogate at less than 10% were the bases for the rejection of all SVOC results. All SVOC results for J17VC3 (SDG K1479) were also rejected because all surrogate recoveries were below 10%.

Bis(2-ethylhexyl)phthalate, di-n-butyl phthalate, and diethyl phthalate, classified by EPA as common laboratory contaminants, were detected in several laboratory blanks, indicating potential introductions from the laboratory during sample preparation and analysis. Diethyl phthalate was detected in one field blank in SDG K1594 at 3.54 ug/L. This blank was collected in association with core sediment samples. In general, there were no impacts from the blank detections since these constituents were not detected in any of the associated samples.

LCS and matrix spike recovery results indicate generally compliant results, but also indicate some extraction difficulties for some SVOCs. Compounds including 4-chloroaniline, 4-nitrophenol, 3-nitroaniline, 3,3'-dichlorobenzidine, hexachlorocyclopentadiene, hexabutadiene, pentachlorophenol, and hexachloroethane frequently had recoveries that were below the lower control limit, demonstrating a potential low bias to sample results. LCS and matrix spike recoveries below the lower control limit resulted in associated data being qualified as estimated (J).

Field duplicate and laboratory duplicate comparisons with the conjugate samples generally indicate acceptable precision.

The DQA identified compounds with extraction problems resulting in extremely low recoveries. Although associated results from 10 samples were rejected based on holding time exceedances and low surrogate recoveries, the QC results from the SVOC analyses indicate that the remaining data are of acceptable quality for their intended project use.

3.1.2.4 Polychlorinated Biphenyls – Sediment. For the PCB data, QC results were compliant for most QC parameters. Although data for one SDG were rejected based on holding time exceedances, the QC results from the PCB analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-3.

Detection limits reported for all Aroclors were below the specifications listed in the SAP (DOE/RL-2008-11, Appendix A). PCB sample extractions on all samples analyzed in SDG K1497 were performed beyond twice the holding time limit. All of the nondetect sample results (from five samples) were qualified as unusable or rejected (R) based on this finding. PCB results for many other samples were qualified as estimated (J) due to holding time exceedances at less than twice the holding time limit. Other QC parameters including method blank, laboratory duplicate, field duplicate, equipment blank, surrogate, LCS, and matrix spike recoveries were generally compliant.

Although the results from all five samples in SDG K1497 were rejected based on holding time exceedances, the PCB data for all other SDGs were acceptable for their intended use.

3.1.2.5 Chlorinated Pesticides – Sediment. For the pesticide data, QC results were compliant for most QC parameters. Although data from SDG K1497 were rejected based on holding time exceedances, the QC results from the pesticide analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-3.

Detection limits were at or below those specified in the SAP (DOE/RL-2008-11, Appendix A) with the exception of alpha-BHC, gamma-BHC, delta-BHC, heptachlor, heptachlor epoxide, gamma-chlordane, alpha-chlordane, endosulfan I, and toxaphene in some SDGs. The holding time limits were exceeded for samples analyzed in SDGs K1480, K1482, K1491, K1495, and K1497. For SDG K1497, the holding time was exceeded by more than twice the limit, and therefore all sample results associated with SDG K1497 (five samples) were qualified as rejected (R) and are considered unusable.

Aldrin was the most commonly detected pesticide in the method blanks. In addition, trace levels of endrin aldehyde, beta-BHC, and gamma-BHC were detected in one or more laboratory blanks. Beta-BHC was also detected at 0.026J ug/L in one field blank (in SDG K1594) collected in association with the core sediment samples. There was no impact to associated sample results from the blank detections because associated results were nondetect.

Matrix spike and LCS results had several noncompliant recoveries for several SDGs. In many of the cases there was no impact since the recoveries exceeded the upper control limit and associated sample results were nondetect. LCS and matrix spike QC results for toxaphene were not provided, and therefore toxaphene results for all samples in all SDGs were qualified as estimated (J). The field duplicate and laboratory duplicate results indicated acceptable precision.

Although results from five samples in SDG K1497 were rejected based on holding time exceedances, the majority of the pesticide sample results are acceptable for their intended use.

3.1.2.6 Metals – Sediment. For the metals data, QC results were compliant for most QC parameters. Antimony and calcium data for two SDGs were rejected based on low matrix spike recoveries. All other QC results indicate that the metals results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-3.

Detection limits for most metals were generally at or below those specified in the project SAP (DOE/RL-2008-11, Appendix A) with the exception of the following elements: calcium, iron, phosphorus, and zinc. In accordance with the guidance used for this DQA (HNF-20433), no action was taken with respect to the elevated detection limits.

The majority of the samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A). Holding times were exceeded for mercury, which has a shorter holding time. For mercury, the holding time limit from collection to digestion was exceeded for samples in SDGs K1480, K1482, K1484, K1486, K1491, K1495, and K1497.

Mercury results for all samples in these SDGs were qualified as estimated (J) since the amount of time that had elapsed before they were processed was less than twice the holding time limit of 28 days.

Nickel, molybdenum, lead, and tin were the most common elements detected in the preparation blanks, indicating potential interferences during sample preparation and analysis. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ). The elements detected in the preparation blanks that had the biggest impacts on detected sample results qualified as estimated nondetect were molybdenum, tin, and lead. SDG K1598 contained a field blank collected in association with sediment core samples in K1584. This was a deionized water sample collected to assess potential cross-contamination at the core processing facility. Although titanium was detected in the field blank at a concentration of 1.25 ug/L, titanium was not analyzed for in the sediment samples.

Equipment blanks were analyzed in association with SDGs K1480, K1557, K1580, and K1667. The results of the equipment blank were used to assess the effectiveness of decontamination procedures and the potential for carry-over contamination to transfer from the sampling equipment to the samples. No action was taken based on the equipment blank detections.

For many of the SDGs, LCS results for several elements exceeded the control limits and as a result, detected results for associated samples were qualified as estimated (J). In many cases, LCS results for lead, antimony, and silicon were below the lower control limit and associated sample results were qualified as estimated (J).

Matrix spike analysis was completed for sediment samples to identify any potential matrix effects on the concentrations of target elements. Most of the matrix spikes had recoveries of antimony below the lower control limit, suggesting a potential low bias to reported sample concentrations. Since the recovery of antimony was below 30% for the matrix spike sample analyzed with SDG K1524, the results for the six associated samples were qualified as rejected. For 14 samples in SDG K1491, calcium concentrations were also rejected based on a recovery below 30%. For other noncompliant results, the concentrations of the elements (i.e., iron and silicon) in the sample used for the spike analyses exceeded four times the spike concentration making the contributions from the spike insignificant relative to native amounts. No action was taken with respect to sample qualification in these cases. For several thallium matrix spike samples, the recovery was zero percent. The sample results associated with the low spike recovery would normally be rejected based on the low spike level. However, because the spike concentration was just above the instrument detection level (IDL), no action was taken. The spike concentrations used for all of the other analytes were significantly larger than the IDLs.

The RPDs between sample/duplicate pairs were acceptable for most of the laboratory and field duplicates. No action was taken based on noncompliant field duplicate results.

The majority of the QC results reviewed in association with the metals were compliant with specifications contained in the project SAP (DOE/RL-2008-11, Appendix A) and other guidance (HNF-20433), indicating that the metals data are acceptable for their intended project use. Antimony data reported in SDG K1524 and calcium data reported in SDG K1491 were rejected based on low matrix spike recoveries.

3.1.2.7 Hexavalent Chromium – Sediment. For the hexavalent chromium data, results from 12 SDGs were rejected based on holding time exceedances and/or low matrix spike recoveries. The remainder of the data is acceptable for its intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-3.

Laboratory detection limits for hexavalent chromium met the level specified in the SAP (DOE/RL-2008-11, Appendix A). Holding times were exceeded for a number of SDGs. Nondetect sample results for the following SDGs were rejected due to holding time exceedances of more than twice the required limit of 24 hours: J00259, J00262, and J00263. Detected hexavalent chromium results for the following SDGs were qualified as estimated (J): J00256, J00257, J00258, J00263, and J00435. Holding time limits were exceeded by less than twice the holding time limit for SDGs J00544 and J00546. Associated results were qualified as estimated (J) based on this finding.

Laboratory preparation blank and LCS results were compliant for all SDGs. Matrix spike recoveries below 30% resulted in nondetect results being qualified as rejected (R) for many samples, including those in the following SDGs: J00242, J00246, J00259, J00334, J00342, J00355, J00425, J00544, and J00546. Detected sample results included in these SDGs were qualified as estimated (J). The matrix spike results indicate potential low bias to the reported sediment sample concentrations.

In summary, a significant number of hexavalent chromium results were rejected based on holding time exceedances and low matrix spike recoveries.

3.1.2.8 Diesel Range Organics – Sediment. DRO QC results were compliant for most QC parameters. None of the DRO data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

With the exception of SDG K1495, samples in all SDGs were extracted prior to expiration of the 14-day holding time. Samples in SDG K1495 were extracted beyond the holding time, but not more than twice the holding time, and therefore all samples in this SDG were qualified as estimated (J). Detection limits were at or below the level specified in the SAP (DOE/RL-2008-11, Appendix A). Surrogate recoveries were in control for most sample analyses. Laboratory blanks were analyzed to determine potential interferences from preparation and analysis of the samples. DRO and motor oil were detected in several of these blanks. Several samples were impacted from the blank detections through the qualification of detected results as estimated nondetect. LCS recoveries were below the lower control limit for many samples, suggesting a low bias to sample concentrations. The recoveries of spiked concentrations of DRO were generally acceptable, suggesting that matrix interferences were not present in significant amounts. Field duplicate results suggest a high degree of variability in the concentrations reported for the DRO analyses. Based on comparisons to project QC criteria identified in the SAP, no major QC deficiencies were identified, and the data are acceptable for their intended project use.

3.1.2.9 Total Organic Carbon – Sediment. Total organic carbon (TOC) QC results were compliant for most QC parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A). Samples in the following SDGs were analyzed beyond the specified holding time of 28 days: K1482, K1491, K1495, K1497, K1557, K1558, and K1574. All samples in these groups were qualified as estimated (J) as a result of this finding. Trace TOC concentrations were detected in many of the associated laboratory blanks. There was no impact from these detections since all of the TOC concentrations were much greater than five times the blank concentrations. LCS, surrogate, and matrix spike recoveries were generally compliant. The results from comparison of sample results from those of corresponding duplicates indicate a high degree of variability. The results reflect heterogeneous concentrations of this analyte throughout the sediment matrix. Lab duplicate results were generally acceptable. Overall, the results of the DQA indicate that the data are acceptable for their intended project use.

3.1.3 Summary of Data Assessment Results for Island Soil

The following subsections present a summary of the results of the data assessment and the major and minor QC deficiencies identified during the data assessment for the island soil data. Five SDGs were included in this assessment. The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-4.

3.1.3.1 Radionuclides – Soil. For radionuclides, QC results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies identified during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. RDLs and MDA levels were reviewed and determined to be at or below the levels specified in the project SAP (DOE/RL-2008-11, Appendix A). None of the method blanks contained concentrations of target analytes above corresponding detection limits. LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Several noncompliant tracer recovery results were reported for samples in several SDGs. The recoveries generally exceeded the 105% upper control limit and were generally associated with the isotopic analyses for thorium and uranium. Isotopic thorium tracer recoveries for several samples in SDG K1556 exceed the upper control limit, suggesting a potential high bias to thorium concentrations for these samples. For SDG K1554 the tracer recoveries for thorium and uranium also exceeded this limit. As a result, detected results for associated samples were qualified as estimated (J) based on this finding. Potential high bias was also indicated based on the thorium-230 tracer recovery for sample J18J33 in SDG K1566. The reported sample concentration was qualified as estimated (J) based on this result.

Laboratory duplicate samples were analyzed to measure the precision of reported results. The RPDs between the duplicate pairs generally indicated that there was an acceptable level of analytical precision. Matrix spike analyses were for the carbon-14 and tritium analyses. All carbon-14 and tritium sample results were qualified as estimated (J) based on this finding.

None of the radionuclide data was rejected, and the data are acceptable for their intended project use.

Table 3-4. Summary of Rejected Soil Data by Method. (2 Pages)

Analytical Method	Analyte	SDG Number	Sample Identification	Sample Date	Result	Units	Laboratory Qualifier	Validation Qualifier
Hexavalent chromium - 7196	Hexavalent chromium	K1554	J18B52	2/27/2009	0.22	mg/Kg	U	R

J = estimated
R = rejected
SDG = sample deliver group
SVOC = semivolatile organic compound
U = nondetect
µg/kg = micrograms per kilogram

3.1.3.2 Semivolatile Organic Compounds – Soil. For the SVOCs, QC results were compliant for most QC parameters. Some of the soil data (associated results from three samples) were rejected based on surrogate recoveries below 10%; however, the QC results from the SVOC analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-4.

Detection limits were reviewed and found to be generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A). RDLs which exceeded those specified in the SAP include hexachlorobenzene, 2-chloroaniline, 2-nitroaniline, 2,4-dinitrophenol, 4-nitrophenol, 4-nitroaniline, pentachlorophenol, and 3,3'-dichlorobenzidine. All of the soil samples were extracted and analyzed prior to holding time expirations.

The majority of surrogate recoveries were compliant for all samples, indicating that instrument performance during sample analysis was acceptable. However, since the recovery of the surrogate 2,4,6-tribromophenol was less than 10% for samples J189X4 and J189X5 (SDG K1551), sample results for several associated acid fraction compounds were rejected. Recovery of the surrogate terphenyl – d14 was also less than 10% for the sample J18B48 (SDG K1554). Based on the noncompliant recovery, compounds associated with this surrogate, consisting primarily of polycyclic aromatic hydrocarbons, were qualified as rejected (R).

Bis(2-ethylhexyl)phthalate was detected in one laboratory blank associated with SDG K1554, indicating potential introductions from the laboratory during sample preparation and analysis. Phthalates have been classified by the EPA as common laboratory contaminants. Based on the blank detection, several samples with concentrations less than 10 times the concentration detected in the blank, were qualified as estimated nondetect (UJ).

LCS and matrix spike recoveries indicate generally compliant results but also indicate extraction difficulties for some of the target SVOCs. In particular, compounds including 1,3-dichlorobenzene, 1,4-dichlorobenzene, 2,4-dinitrophenol, 4-chloroaniline, 4-methylphenol, 3-nitroaniline, 3,3'-dichlorobenzidine, hexachlorocyclopentadiene, hexachlorobutadiene, pentachlorophenol, and hexachloroethane, frequently had recoveries that were below the lower control limit, demonstrating a potential low bias to sample results. LCS and matrix spike recoveries below the lower control limit resulted in associated data being qualified as estimated (J).

Field duplicate comparisons with the conjugate samples generally indicate favorable precision because almost all of the compounds were nondetect in both samples. Laboratory duplicates were not analyzed.

The DQA identified compounds with extraction problems resulting in extremely low recoveries. A relatively small percentage of the data was rejected based on surrogate recoveries, and the QC results from the SVOC analyses indicate that the remaining data are of sufficient quality for their intended project use.

3.1.3.3 Polychlorinated Biphenyls – Soil. For the PCB data, QC results were compliant for most QC parameters. The QC results demonstrate that the data are of acceptable quality for their intended project use. None of the PCB data was rejected. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment.

Detection limits reported for all Aroclors were below the specifications listed in the SAP (DOE/RL-2008-11, Appendix A). Samples were generally extracted within specified holding times with the exception of sample J18B00 in SDG K1554. Concentrations of all Aroclors were qualified as estimated for J18B00 based on the holding time exceedance. Other QC parameters including field duplicate, surrogate, LCS and matrix spike recoveries were generally compliant.

Based on satisfactory QC results, the data associated with the PCB analyses are acceptable for their intended project use.

3.1.3.4 Chlorinated Pesticides – Soil. For the pesticide data, QC results were compliant for most QC parameters. All of the QC results from the pesticide analyses indicate that the results are of acceptable quality for their intended project use. None of the pesticide data was rejected. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment.

Detection limits were generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A). The holding time limit was exceeded for one sample; J18B00 (SDG K1554). Since the elapsed time prior to sample extraction was less than twice the limit, all pesticide compounds associated with the sample J18B00 were qualified as estimated (J).

Aldrin and beta-BHC were detected in laboratory blanks associated with SDG K1554 and K1551, respectively. There was no impact to any sample results since neither compound was detected in any samples. Matrix spike and LCS results for some samples had noncompliant recoveries of methoxychlor, 4,4’-DDD, and/or 4,4’-DDE that exceeded the upper control limit, indicating a potential high bias to sample concentrations. In most of the cases there was no impact to sample results since these compounds were not detected. However, a detected concentration of methoxychlor for sample J189X6 (SDG K1551) was qualified as estimated (J) based on the matrix spike results. For SDG K1566, the matrix spike recovery of delta-BHC was below the lower control limit. All associated sample results were qualified as estimated (J) to reflect the potential low bias indicated by the matrix spike result. LCS and matrix spike QC results for toxaphene were not provided, and therefore toxaphene results for all samples in all SDGs were qualified as estimated (J).

Laboratory duplicates were not analyzed in any of the soil SDGs. In most cases, the field duplicate results indicated acceptable levels of precision. However, RPDs exceeded criteria for 4,4’-DDD, 4,4’-DDT, and methoxychlor indicating potential heterogeneity in the soil matrix where these samples were collected. No action was taken based on RPDs that exceeded QC criteria.

Since none of the data was rejected, the pesticide sample results are acceptable for their intended project use.

3.1.3.5 Metals – Soil. For the metals data, QC results were compliant for most QC parameters. None of the metals data was rejected during the data assessment, and the data are sufficient for their intended project use. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment.

Detection limits for most metals were generally at or below those specified in the SAP with the exception of the following elements: calcium, iron, phosphorus, and zinc. There was no action taken based on the detection limit values. The samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A).

Beryllium, nickel, molybdenum, lead, and tin were the most common elements detected in the preparation blank, indicating potential interferences during sample preparation and analysis. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ).

Equipment blanks were analyzed in association with SDGs K1551, K1556, and K1668. The equipment blank results were used to assess the potential for contamination of the samples from the sampling equipment. Based on the guidance used for this DQA (HNF-20433), no action was taken based on the equipment blank detections.

LCS results associated with the metals analyses in all SDGs were greater than the upper control limit for several elements including antimony, arsenic, chromium, cobalt, iron, manganese, titanium, vanadium, and/or zinc. Based on these findings, associated detected sample concentrations were qualified as estimated (J) based on the LCS results. A low bias was indicated for lead with a recovery below the lower control limit and associated results were qualified as estimated (J).

Matrix spike analysis was completed to identify any potential matrix effects on the concentrations of target elements. Almost all of the matrix spikes had recoveries of antimony below the lower control limit, and associated sample results were qualified as estimated (J) to reflect a potential low bias.

The RPDs between sample/duplicate pairs were acceptable for most of the laboratory duplicates. If the RPD was greater than 30% for a particular element, all associated results were qualified as estimated (J). The field duplicate associated with the SDG K1556 analyses indicated poor precision for the silicon concentrations. No action was taken based on the noncompliant field duplicate results.

No major QC deficiencies were identified, and the data are of sufficient quality for their intended project use.

3.1.3.6 Hexavalent Chromium – Soil. For the hexavalent chromium data, QC results were compliant for most QC parameters, although results were qualified as rejected for 35 of 82 samples based on low matrix spike recoveries. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment. The rejected data are summarized in Table 3-4.

Detection limits were at or below the level specified in the SAP (DOE/RL-2008-11, Appendix A). Analysis for hexavalent chromium for samples in SDGs K1556 and K1566 took place after a period of less than two times the holding time limit had elapsed. Based on this finding, all results for associated samples were qualified as estimated (J).

Hexavalent chromium method blank and LCS results were compliant for all SDGs. Matrix spike recoveries of hexavalent chromium for analyses completed with SDG K1554 and K1556 were below 30%, suggesting a strong matrix effect. Nondetect results for associated samples were qualified as rejected (R) and detected results as estimated (J). Results from 35 samples were rejected.

While QC results were compliant for most QC parameters, results were qualified as rejected (R) for several samples based on low matrix spike recoveries.

3.1.3.7 Diesel Range Organics – Soil. DRO QC results were compliant for most QC parameters. None of the DRO data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment.

The majority of the samples were extracted prior to expiration of the 14 day holding time. The only sample that was extracted beyond the holding time limit was J18JC0-A. Because this sample was analyzed less than twice the holding time limit, the DRO result was qualified as estimated (J). Detection limits were at or below the level specified in the SAP (DOE/RL-2008-11, Appendix A).

Surrogate recoveries were acceptable for most sample analyses. The surrogate recovery for one sample in SDG K1556 (J18B23) exceeded the upper control limit, indicating a potential high bias to the reported concentration. Since DRO were reported as nondetect in this sample there was no action related to this result. Laboratory blanks were analyzed to determine potential interferences from preparation and analysis of the samples. Motor oil was detected in several of these blanks including ones associated with SDGs K1551, K1554, and K1556. Detected motor oil results for several samples were qualified as estimated nondetect (UJ) to eliminate the false-positive potential indicated by the blank data. Matrix spike sample recoveries were below the lower control limit for SDG K1566, suggesting a potential low bias to some of the sample concentrations. The recoveries of LCS for all SDGs were acceptable, indicating that sample concentrations were accurately quantified. Based on the field duplicate results associated with SDG K1554, a high degree of variability is indicated for sample collection of the DRO and motor oil soil samples. The results may be indicative of heterogeneous concentrations of these analytes in the soil matrix.

No major QC deficiencies were identified, and the data are of sufficient quality for their intended project use.

3.1.3.8 Total Organic Carbon – Soil. TOC QC results were compliant for most QC parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A). Samples analyzed in SDGs K1556 and K1566 were analyzed beyond the specified holding time of 28 days. TOC results for samples in these SDGs were qualified as estimated (J) based on this finding. Trace TOC concentrations were detected in many of the associated laboratory blanks. There was no impact from these detections since all of the TOC concentrations were greater than five times the blank concentrations. LCS, surrogate and matrix spike recoveries were generally compliant. However, SDG K1566 TOC sample results were qualified as estimated (J) since no matrix spike sample was analyzed. For TOC analyses associated with SDG K1554, a comparison of sample results with those of corresponding field duplicates indicate a high degree of variability. No action was taken based on the field duplicate results. Laboratory duplicate results were generally acceptable. Overall, the results of the DQA indicate that the data are acceptable for their intended project use.

3.1.4 Summary of Data Validation Results for Surface Water, Sediment, and Soil

The third-party data validation packages for surface water, sediment, and soil samples collected in 2008/2009 (excluding PCB congener data packages) are included in Appendix F (on CD). Twelve SDGs were validated as listed in Table 2-5. These validation packages summarize the data validation that was completed for a given SDG along with the QC deficiencies, if any, that were identified. With few exceptions, only minor QC deficiencies were identified in the data reviewed, and the data are suitable for their intended use in the human health and ecological risk assessments. Data that were deemed unusable for decision-making purposes were rejected (qualified “R”) based on a major QC deficiency identified during data validation. The only data rejected as a result of validation were the hexavalent chromium results from sediment samples in SDG J00350. These results were rejected based on low matrix spike recoveries. A summary of this rejected data is presented in Table 3-2.

3.1.4.1 Summary of PCB Congener Data Validation Results. The third-party data validation report prepared for PCB congeners is included in Appendix G (on CD). This report summarizes the data validation that was completed along with the QC deficiencies that were identified. Two surface water samples, four sediment samples, and two soil samples (from four SDGs) were validated as presented in Table 2-6. Only minor QC deficiencies were identified in the data reviewed. The maximum holding time from collection to extraction as specified in the SAP (7 days for aqueous samples and 14 days for solids) was exceeded for all samples (DOE/RL-2008-11, Appendix A). However, EPA Method 1668B specifies a maximum holding time of 1 year from sample collection to extraction if the samples are stored in accordance with the specified requirements. Based on the professional judgment of the validator, the samples were not qualified based on holding time exceedances. The data are suitable for their intended use in the human health and ecological risk assessments.

3.1.5 Summary of PCB Congener Preliminary QC Review

Surface water (SDG J00543), sediment (SDG J00264), and island soil (SDG J00420) SDGs that were analyzed for PCB congeners and were not otherwise assessed or third-party validated are listed in Table 2-8. A preliminary review was completed for these SDGs that consisted of a review of tabulated quality control results; the narrative provided by the analytical laboratory, and the method blank results was performed as described in Section 2.1.2. Based on the quality control review results, data qualifiers were applied to the results as described in Section 2.1. The QC review worksheets are provided in Appendix H.

All samples were extracted and analyzed within an acceptable holding time period. Surrogate recoveries for all samples were also satisfactory. LCS recoveries of target PCB congeners were compliant. Several target PCB congeners were detected in the laboratory method blanks. In most cases these concentrations were near the detection limit values. In order to differentiate similar results of the same congeners in associated samples, sample concentrations less than five times the blank detection were qualified as nondetect (UJ).

The QC review did not reveal any major quality control deficiencies for any of the samples. None of the data was rejected, and the data are acceptable for their intended project use.

3.1.6 Split-Sample Results for Surface Water and Sediment Samples

Comparison of Washington Closure Hanford (WCH) surface water and sediment data relative to split-samples collected by EPA and Ecology was performed as part of the data quality assessment. Five surface water split-samples were collected by EPA and analyzed for inductively coupled plasma metals, and radionuclides including gross alpha/beta, GEA, isotopic americium, isotopic plutonium, isotopic thorium, isotopic uranium, and tritium. Analytical results were provided by EPA on September 14, 2009. Four surface water split-samples were collected by Ecology in October and November 2008, and analyzed by Paragon Analytics for inductively coupled plasma metals, total mercury, total uranium, and SVOCs. Eight sediment split-samples were collected by EPA and analyzed for metals, and radionuclides including GEA and isotopic uranium. Analytical results were provided by EPA on September 14, 2009. Five sediment split-samples were collected by Ecology in December 2008, and February 2009, and analyzed for metals, total mercury, total uranium, and SVOCs.

While there are no specific criteria for the comparison of inter-laboratory or inter-agency splits set forth in the SAP (DOE/RL-2008-11, Appendix A), a common means of evaluating comparability between data sets is calculating the RPD. The formula for calculating the RPD is RPD = 100* Absolute Value(X1-X2)/((X1+X2)/2) where X1 and X2 are the two measurements being compared. For this evaluation RPDs were not calculated if either or both of the two measurements (WCH data, EPA/Ecology split-sample result) were negative, zero, or nondetect. As outlined in the SAP (DOE/RL-2008-11, Appendix A), calculated RPDs acceptance criteria (for two detected results) should be less than or equal to 20% for water field duplicates and 30% for solids. Split samples were handled by separate field crews, shipped to different locations and analyzed by independent laboratories, and in the case of EPA radionuclides, these samples were analyzed by different methods. Therefore, the acceptance criterion is expanded to 35% for water and 45% for solids to accommodate the inherent variability introduced.

For the majority of analytes at each sample location, either the WCH result and/or the split-sample result were nondetect, and results were negative or zero for several radiological analyses. Therefore, RPDs were not calculated for these analytes.

Surface water sample RPDs were calculated for the analytes presented in Table 3-5. In general, RPDs for metals have good agreement. Thorium-230, uranium-233/234, and uranium-238 RPDs had wider variability exceeding both the 20% and 35% RPD acceptance criteria. This is most likely the result of the use of different analytical methods by EPA for radioisotope-specific analysis of radionuclides. Therefore, the use of RPDs to assess data comparability may be limited for the radioisotope-specific radionuclide evaluation.

Sediment split-sample RPDs were calculated for the analytes presented in Table 3-5. The majority of the RPDs calculated (86%) were within the 45% criterion. The criterion was exceeded for the following elements in one or more samples: aluminum, arsenic, barium, beryllium, calcium, chromium, manganese, potassium, sodium, vanadium and zinc, cesium-137, potassium-40, radium-226, and uranium-238. RPDs that exceeded criteria ranged from 46% to168%.

Table 3-5. Surface Water and Sediment Split-Sample Relative Percent Difference. (9 Pages)

Sample Number	SDG Number	Analyte	Concentration	Units	Split-Sample Collected By	Split-Sample Number	Split-Sample Concentration	Relative % Difference
Surface Water								
J17RJ2	K1421	Calcium	18,700	µg/L	EPA	J17RX9	18,800	0.5%

WDOE = Washington Department of Ecology

3.2 SUMMARY OF RESULTS FOR GROUNDWATER UPWELLING DATA

The following subsections present by medium and analytical parameter a summary of the QC deficiencies identified during the assessment of the groundwater upwelling data, which consists of pore water, surface water, and sediment data.

3.2.1 Summary of Data Assessment Results for Groundwater Upwelling – Pore Water

The following subsections present a summary of the results of the assessment and the major and minor QC deficiencies identified during the data assessment of the groundwater upwelling pore water data. As part of this assessment, 105 SDGs were evaluated. The majority of the data are acceptable for their intended project use. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

3.2.1.1 Radionuclides – Groundwater Upwelling (Pore Water). For radionuclide data, QC results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. Reported detection limits and MDA levels were reviewed and determined to be in exceedance of the levels specified in the SAP (DOE/RL 2008-11, Appendix A) for total uranium and strontium for the majority of the SDGs. In accordance with the guidance (HNF-20434), no action was taken based on this finding.

Method blanks did not contain concentrations of target analytes above corresponding detection limits, except for SDG J00653 which contained trace levels of total uranium. No qualification was performed based on this finding because the sample results were greater than five times the blank concentration. No equipment blanks were analyzed for radionuclides.

Generally, LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. No LCS for strontium was analyzed for SDG J00694, and therefore all results were qualified as estimated (J). For SDGs J00717 and J00719, LCS recoveries for tritium were below the lower control limit, indicating a potential low bias to sample concentrations. The associated sample results were qualified as estimated (J) based on this finding. Matrix spikes were not analyzed for tritium in the majority of the SDGs. If a matrix spike was not analyzed for tritium, all sample results were qualified as estimated (J). Laboratory duplicate samples were analyzed to measure the precision of reported results. Many SDGs had laboratory duplicate RPDs that exceeded the criteria for this assessment. However, for the majority of these SDGs, no qualification was performed because both the initial and replicate sample results were nondetect. For some SDGs, a lab duplicate was not analyzed due to insufficient sample volume. For these SDGs, all associated radionuclide results were qualified as estimated (J). SDG J00642 contained a field duplicate with an RPD that exceeded criteria. However, based on the guidance used for this assessment (HNF-20434), no qualification was performed.

In summary, QC results for the radionuclides were compliant for most QC parameters and none of the radionuclide data was rejected. Radionuclide data for groundwater upwelling pore water are of sufficient quality for their intended project use.

SW = surface water
U = nondetect

3.2.1.2 Volatile Organic Compounds – Groundwater Upwelling (Pore Water). For the groundwater upwelling pore water VOC data, QC results were compliant for most QC parameters. None of the VOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Analysis of the samples in all SDGs took place prior to the expiration of the associated holding time. Detection limits for all compounds that are reported with this analysis are the same or below those specified in the SAP (DOE/RL-2008-11, Appendix A), with the exception of methylene chloride. In accordance with the guidance for this assessment (HNF-20433), no action was taken based on this finding.

Laboratory blanks were analyzed for target VOCs to identify potential false-positive concentrations resulting from laboratory processing and analyses. Acetone, classified by the EPA as a common laboratory contaminant, was detected in SDG K1777 at a trace concentration. Sample concentrations for acetone less than 10 times the blank concentration were qualified as estimated nondetect (UJ). If the sample concentration of the blank contaminant was below the RDL, it was raised to that value as part of this action.

One equipment blank associated with SDG K1913 contained trace concentrations of acetone. Acetone was also detected in the trip blank associated with SDG K1777. However, based on the guidance used for this DQA (HNF-20433), no action was taken with respect to equipment or trip blank detections.

LCS recoveries were compliant for all samples, indicating that accuracy requirements were satisfied. Matrix spike recoveries were compliant for all SDGs; however, several matrix spike RPDs (1,1,2,2-tetrachloroethane, 2-butanone, 2-hexanone, 4-methyl-2-pentanone, acetone, and bromoform) in SDG K1777 had recoveries that were below the lower control limit, demonstrating a potential low bias to sample results. As a result, analytical results for associated samples were qualified as estimated (J). The field duplicate results demonstrated that there was little variability and acceptable levels of precision of reported results. Laboratory duplicates were not analyzed in association with any of the SDGs.

Since only minor QC deficiencies were identified during the assessment, results from the VOC data are of sufficient quality for their intended project use.

3.2.1.3 Metals – Groundwater Upwelling (Pore Water). For the metals data, QC results were compliant for most QC parameters. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use. No major deficiencies were identified and therefore no data were rejected. The following is a summary of the results of the assessment and the minor QC deficiencies noted during the assessment.

Detection limits for metals were at or below those specified in the SAP, and samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A).

A number of elements were detected in the preparation blanks associated with the pore water SDGs, indicating potential interferences during sample preparation and analysis. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ).

An equipment blank was analyzed in association with SDG K1943. Several elements were detected in the equipment blank. In accordance with the guidance used for this DQA (HNF-20433), no action was taken based on the equipment blank detections.

LCS recoveries were compliant for all of the SDGs except SDG K1946, which had low LCS recoveries for the majority of metals analyzed resulting in some sample results getting qualified as estimated (J). A matrix spike recovery for aluminum in SDG K1908, exceeded criteria. For this SDG, detected aluminum results were qualified as estimated. No matrix spike was analyzed for uranium in SDG K1943, resulting in the qualification of all uranium sample results in the SDG as estimated (J). In addition, a matrix spike was not analyzed for one of the three sample batches in SDG K1946. All sample results associated with this sample batch were qualified as estimated (J).

The RPDs between sample/duplicate pairs for laboratory duplicates were generally compliant. In SDGs K1821, K1913, K1940, K1943, K1946, and K1963, RPDs for at least one metal exceeded criteria; however, no qualification was performed since the difference between results was less than one times the RDL. In SDG K1913, the RPD for arsenic exceeded criteria and all arsenic results were qualified as estimated (J). Similarly, the chromium RPD in SDG K1943 exceeded criteria; however, only detected chromium results were qualified as estimated (J). In addition, a lab duplicate was not analyzed for one of the three sample batches in SDG K1946. All sample results associated with this sample batch were qualified as estimated (J). Field duplicate RPDs were out of compliance in SDGs K1913 and K1943; however, based on the guidance for this assessment (HNF-20433), no action was taken.

No major deficiencies in the QC results were identified per the criteria contained in the SAP (DOE/RL-2008-11, Appendix A) and other guidance (HNF-20433), indicating that the metals data are of sufficient quality for their intended project use.

3.2.1.4 Hexavalent Chromium – Groundwater Upwelling (Pore Water). For the hexavalent chromium data, QC results were compliant for most parameters. Although the hexavalent chromium data from SDG J00557 (one sample) were rejected based on a low matrix spike recovery, the QC results from the hexavalent chromium analyses indicate that the majority of the results are of acceptable quality for their intended project use. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-6.

Most samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A). Samples in SDG J00574 were analyzed out of holding time, but less than twice the limit. Associated samples were qualified as estimated (J). The detection limit for hexavalent chromium was not exceeded for any of the pore water samples.

Hexavalent chromium was not detected in any of the preparation blanks associated with the pore water SDGs. No equipment blanks were analyzed.

LCS recoveries were compliant for all of the SDGs. Noncompliant matrix spike results were identified for hexavalent chromium in several SDGs. In SDGs J00557 and J00580, matrix spike recoveries were below 30%, resulting in the qualification of nondetect results as rejected (R) and detected results as estimated (J). For SDG J00557, all of the results were qualified as estimated (J), except for sample J192P4 which had a nondetect result that was rejected. For SDG J00580, all results were positive and therefore qualified as estimated; no results were rejected in SDG J00580. No matrix spike was analyzed for SDGs J000596, J00600, J00606, J00609, J00613, J00619, J00622, J00630, and J00753, and all hexavalent chromium samples in these SDGs were qualified as estimated (J).

The RPDs between sample/duplicate pairs were acceptable for most of the elements in the laboratory duplicates. For several SDGs, the RPD value exceeded the limit, and because the difference between the initial and duplicate results was greater than the reporting limit by a factor of 1, all hexavalent chromium results were qualified as estimated (J). No laboratory duplicate was analyzed for SDGs J00596, J00600, J00606, J00609, J00613, J00619, J00622, J00630, and J00753, resulting in all hexavalent chromium samples in these SDGs getting qualified as estimated (J). Where field duplicates were collected, RPD values were compliant.

Although one sample in SDG J00557 was rejected based on a low matrix spike recovery, the majority of the QC results reviewed was compliant with criteria contained in the SAP (DOE/RL-2008-11, Appendix A) and other guidance (HNF-20433) and are of sufficient quality for their intended project use.

3.2.1.5 Diesel Range Organics – Groundwater Upwelling (Pore Water). Only samples within three SDGs were analyzed for DRO. DRO QC results were compliant for most QC parameters and the DRO data are acceptable for their intended project use. The following is a summary of the results of the assessment and the minor QC deficiencies noted during the assessment.

All samples were extracted prior to expiration of the holding time criteria. For DRO, the detection limit in each SDG met the level specified in the SAP (DOE/RL-2008-11, Appendix A). The detection limit for motor oil was not provided in the project SAP and therefore could not be compared.

Surrogate recoveries were in compliance for most sample analyses. Laboratory blanks were analyzed to determine potential interferences from preparation and analysis of the samples. DRO was not detected in any of the laboratory blanks associated with the three SDGs. One equipment blank was collected for SDG K1953 and the results were nondetect.

DRO LCS recoveries for SDGs K1940 and K1943 were below the lower control limit, resulting in the qualification of all associated results for DRO as estimated (J). DRO LCS duplicates were performed for SDGs K1825 and K1943, both of which had RPD values that exceeded the criteria. For these SDGs, all DRO results were qualified as estimated (J). No LCS was analyzed for motor oil in all three SDGs, and therefore associated motor oil results were qualified as estimated (J). Where field duplicates were collected and analyzed, RPD results were in compliance.

Since only minor QC deficiencies were identified during the assessment, results from the DRO data analyses are of sufficient quality for their intended project use.

3.2.1.6 Total Organic Carbon – Groundwater Upwelling (Pore Water). TOC QC results were compliant for most QC parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed within the required holding time limits, and detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A).

TOC concentrations were detected in the laboratory blanks for SDGs K1940, K1943, K1946, K1962, and K1963. If associated samples results were less than five times the blank concentration, results were qualified as estimated nondetect (UJ). Results were not qualified if the results were greater than five times the blank concentration. An equipment blank was collected and results were reported in SDG K1943 with low concentrations of TOC detected. However, based on the guidance used for this assessment (HNF-20433), no action was taken based on this finding.

LCS and matrix spike recoveries were compliant for all SDGs. Only one SDG (K1963) contained a lab duplicate that had an RPD that exceeded criteria; however, since the difference between the initial and duplicate results was less than the RDL by a factor of 1, no qualification was assigned. Only one field duplicate was collected and analyzed for TOC, and the RPD was out of compliance. However, based on the guidance used for this DQA (HNF-20433), no action was taken based on this finding.

No major QC deficiencies were identified during the assessment of TOC data quality, and the data are of sufficient quality for their intended project use.

3.2.1.7 Anions – Groundwater Upwelling (Pore Water). Anions that were analyzed in connection with the groundwater upwelling pore water consisted of bromide, chloride, fluoride, nitrate, nitrite, orthophosphate, sulfate, and combined nitrate/nitrite. Several of the SDGs with samples analyzed for anions had rejected data for nitrite, nitrate, and orthophosphate due to holding time exceedances. The following is a summary of the results of the assessment and QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-6.

Holding time limits were exceeded by more than twice the limit for nitrite, nitrate, and orthophosphate in SDGs K1908, K1913, K1940, K1943, K1946, K1962, and K1963. Detected results were qualified as estimated (J) and nondetect results were qualified as rejected (R). The majority of the nitrite and orthophosphate results were rejected, and most nitrate results were detected and therefore qualified as estimated.

Laboratory reporting limits for anions were not specified in the project SAP (DOE/RL-2008-11, Appendix A) and therefore could not be compared to actual reporting limits provided in the SDGs.

Nitrate/nitrite was detected in the equipment blank in SDG K1943; however, based on the guidance used for this assessment (HNF-20433), no qualification was performed. No other anions were detected in the method or equipment blanks.

LCS recoveries were compliant for all SDGs. Matrix spike recoveries were compliant for all SDGs except for nitrate/nitrite in SDG K1940. In this SDG, the matrix spike recovery was below the lower control limit, demonstrating a potential low bias to sample results, and all results for nitrate/nitrite were qualified as estimated.

For nitrate/nitrite, only one SDG (K1940) contained a laboratory duplicate with an RPD that exceeded criteria. Since the concentrations of both the initial and replicate results were greater than five times the reporting limit, all detected sample results were qualified as estimated for nitrate/nitrite. For the other anions, two SDGs had laboratory duplicate RPDs that exceeded the aqueous criteria of 20%; in SDG K1821, nitrate results were qualified as estimated; however, no results in SDG K1943 were qualified since the difference between both fluoride results was less than one times the reporting limit. The field duplicate results indicated acceptable levels of precision.

Other than the rejected data for nitrite, nitrate, and orthophosphate due to holding time exceedances, the majority of the anion sample results are of sufficient quality for their intended project use.

3.2.2 Summary of Data Assessment Results for Groundwater Upwelling – Surface Water

The following subsections present a summary of the results of the assessment and the major and minor QC deficiencies identified during the data assessment of the groundwater upwelling surface water data. Thirty-three SDGs were included in this assessment. The majority of the data are acceptable for their intended project use. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

3.2.2.1 Radionuclides – Groundwater Upwelling (Surface Water). For radionuclide data, QC results were compliant for most parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. RDLs and MDA levels were reviewed and determined to be at or below the levels specified in the project SAP, with the exception of the RDLs for carbon-14 and strontium and the MDA levels for potassium-40, radium-226, radium-228, americium-241, beryllium-7, and ruthenium-106, which exceeded the limits specified in the SAP (DOE/RL 2008-11, Appendix A). In accordance with the guidance (HNF-20434), no action was taken based on this finding.

Method blanks did not contain concentrations of target analytes above corresponding detection limits. No equipment blanks were analyzed for radionuclides. LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Noncompliant tracer recovery results were reported for thorium-230 and uranium in SDG K1923. The recoveries were below the lower control limit, indicating a potential low bias to sample concentrations. The associated sample results were qualified as estimated based on this finding. Matrix spike analyses were compliant for tritium and carbon-14. Laboratory duplicate samples were analyzed to measure the precision of reported results. The RPDs between the duplicate pairs generally indicated that there was an acceptable level of analytical precision. One of the field duplicates collected for SDG K1952 had a RPD value that exceeded criteria; however, in accordance with the guidance (HNF-20434), no qualification was assigned based on this finding.

In summary, QC results for the radionuclides were compliant for most parameters and none of the radionuclide data was rejected. Radionuclide data for groundwater upwelling surface water are of sufficient quality for their intended project use.

3.2.2.2 Volatile Organic Compounds – Groundwater Upwelling (Surface Water). For the groundwater upwelling surface water VOC data, QC results were compliant for most QC parameters. None of the VOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Analysis of the samples in all SDGs took place prior to the expiration of the associated holding time. Detection limits for all compounds that are reported with this analysis are the same or below those specified in the SAP (DOE/RL-2008-11, Appendix A).

The results from the laboratory blanks were compliant with the criteria in all SDGs. Trip blanks were analyzed with all but one of the SDGs. The trip blank with SDG K1923 contained low-level concentrations of acetone. Based on the guidance used for this DQA (HNF-20433), no action was taken with respect to trip blank contamination. No equipment blanks were analyzed in association with these SDGs.

LCS recoveries were generally compliant for all samples, indicating that accuracy requirements were satisfied. LCS recoveries exceeding the upper control limit were reported for acetone in SDGs K1905 and K1907. Based on this finding, detected results for associated samples were qualified as estimated (J). Matrix spike recoveries and RPDs were compliant for all SDGs. Field duplicates for VOCs were not analyzed in association with any of the SDGs.

Since only minor QC deficiencies were identified during the assessment, results from the VOC data are of sufficient quality for their intended project use.

3.2.2.3 Metals – Groundwater Upwelling (Surface Water). For the metals data, QC results were compliant for most QC parameters. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use. No major deficiencies were identified, and therefore no data were rejected. The following is a summary of the results of the assessment and the minor QC deficiencies noted during the assessment.

Detection limits for most metals were generally at or below those specified in the SAP with the exception of silicon. There was no action taken with respect to the elevated detection limits. Samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A).

A number of elements were detected in the preparation blanks associated with the groundwater upwelling surface water SDGs, indicating potential interferences during sample preparation and analysis. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ).

An equipment blank was analyzed in association with SDG K1944. Boron, calcium, sodium, and zinc were detected the equipment blank. In accordance with the guidance used for this DQA (HNF-20433), no action was taken based on the equipment blank detections.

LCS recoveries were compliant for all of the SDGs. Noncompliant matrix spike results were identified for silicon in SDG K1944, and associated sample results were qualified as estimated (J).

The RPDs between sample/duplicate pairs were acceptable for most of the elements in the laboratory and field duplicates. Elevated RPDs for the laboratory duplicates did not impact sample results because the difference between the results was less than the RDL. In accordance with the guidance used for this DQA (HNF-20433), no action was taken based on noncompliant field duplicate results.

No major QC deficiencies were identified as part of the data assessment indicating that the metals data are of sufficient quality for their intended project use.

3.2.2.4 Hexavalent Chromium – Groundwater Upwelling (Surface Water). Hexavalent chromium QC results were compliant for most parameters assessed. None of the hexavalent chromium data was rejected during the data assessment, and the data are acceptable for their intended project use.

The holding time was exceeded by less than twice the limit for one sample in SDG J00704. The result for this sample was qualified as estimated (J) based on this finding. The detection limits were met for all samples.

The matrix spike recovery exceeded the criteria for one sample in SDG J00668, but there was no action taken since the associated sample result was nondetect. The RPD between the matrix spike and its duplicate was noncompliant resulting in this sample being qualified as estimated (J).

All other QC parameters that were assessed were compliant with the criteria. None of the hexavalent chromium data was rejected during the data assessment, and the data are acceptable for their intended project use.

3.2.2.5 Dissolved Organic Carbon – Groundwater Upwelling (Surface Water). DOC QC results were compliant for most QC parameters. None of the DOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A), and all samples were analyzed within the required holding time limits.

DOC concentrations were detected in laboratory blanks associated with three SDGs. One sample from SDG K1931 and all samples from SDG K1944 were qualified as estimated nondetect (UJ) based on blank results. Samples from SDG K1931 were not qualified since the sample results were greater than five times the blank concentration. DOC was detected in an equipment blank in SDG K1944. Based on the guidance used for this DQA (HNF-20433), no action was taken based on this finding. LCS results, matrix spike recoveries, and laboratory and field duplicate results were compliant for all SDGs.

Only minor QC deficiencies were identified during the assessment of DOC data quality, and the data are of sufficient quality for their intended project use.

3.2.2.6 Anions – Groundwater Upwelling (Surface Water). Anions that were analyzed include bromide, chloride, fluoride, nitrate, nitrite, orthophosphate, sulfate, and combined nitrate/nitrite. Quality control results were compliant for most QC parameters; however, all results for nitrite and orthophosphate and some for nitrate were rejected based on holding time exceedances. Results for other analytes were acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment. Results that were qualified as rejected are presented in Table 3-6.

Detection limit values for these analytes were not specified in the SAP (DOE/RL-2008-11, Appendix A). Holding times were exceeded by more than twice the limit for nitrate, nitrite, and orthophosphate. Detected results were qualified as estimated (J) and nondetect results were qualified as rejected (R). This resulted in all nitrite and orthophosphate results being rejected for all SDGs assessed. The nitrate result for one sample in SDG K1944 was also rejected based on the holding time exceedance.

Anions were not detected in laboratory blanks or equipment blanks associated with the surface water data. LCS results were compliant for all SDGs. Fluoride results for samples in SDG K1955 and nitrate/nitrite as N results in SDG K1907 were qualified as estimated based on noncompliant matrix spike recoveries. Noncompliant RPDs for fluoride and chloride laboratory duplicate results were reported in SDG K1944, and noncompliant RPDs for nitrate and chloride laboratory duplicate results were reported in SDGs K1952 and K1955. Sample results associated with the RPD exceedance for nitrate in SDG K1955 were not qualified because the difference between the initial and replicate samples was less than the RDL. The field duplicate for SDG K1952 had a noncompliant RPD for nitrate and nitrate/nitrite as N. Based on the guidance (HNF-20433), no action was taken based on this finding.

Quality control results were compliant for most QC parameters; however, all results for nitrite and orthophosphate and some for nitrate were qualified as rejected (R) based on holding time exceedances. Results for other analytes were acceptable and are of sufficient quality for their intended project use.

3.2.3 Summary of Data Assessment Results for Groundwater Upwelling – Sediment

As part of the groundwater upwelling investigation, sediment samples were collected and analyzed for radionuclides, VOCs, metals, hexavalent chromium, and TOC. A DQA was conducted to identify potential bias or interferences that could impact sample results as reported by the analytical laboratory. Thirty-three SDGs were included in this assessment.

The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6. The following subsections present a summary by chemical parameter of the major and minor QC deficiencies identified during the data assessment of the groundwater upwelling sediment data.

3.2.3.1 Radionuclides – Groundwater Upwelling (Sediment). Radionuclide target analytes include carbon-14, tritium, total strontium, technetium-99, uranium, plutonium, thorium, and a gamma scan that provides results for 16 additional radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. RDLs were reviewed and determined to be at or below the levels specified in the project SAP

(DOE/RL 2008-11, Appendix A). The MDAs exceeded specifications contained in the SAP for cobalt-60, radium-226, radium-228, europium-152, europium-154, and europium-155 for several samples. In accordance with the guidance used for this DQA (HNF-20434), no action was taken with respect to detection limit exceedances.

Method blanks did not contain concentrations of target analytes above corresponding detection limits. No equipment blanks were analyzed for radionuclides.

LCS and tracer results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Matrix spike analyses were not performed in conjunction with the carbon-14 analysis in SDGs K1922 and K1956 or the tritium analysis in SDGs K1945, K1953, and K1956. Based on this finding, all associated sample results for carbon-14 and tritium from these SDGs were qualified as estimated (J).

Laboratory duplicate samples were analyzed to measure the precision of reported results. The RPDs between the duplicate pairs were compliant for all SDGs except K1932 and K1945. No qualification was required for the SDGs with noncompliant RPDs because the difference between the initial and replicate results were less than two times the RDL. When collected, field duplicate RPDs were compliant with the criteria.

Minor QC issues were identified because matrix spike analyses were not completed for carbon-14 or tritium; however, none of the radionuclide groundwater upwelling sediment data was rejected, and the data are of sufficient quality for their intended project use.

3.2.3.2 Volatile Organic Compounds – Groundwater Upwelling (Sediment). For the VOC data, QC results were compliant for most parameters, and the data are sufficient for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Analysis of the samples took place prior to the expiration of the associated holding time. Detection limits for all compounds that are reported with this analysis are the same or below those specified in the SAP (DOE/RL-2008-11, Appendix A), with the exception of 1,1,1-trichloroethane, 1,2-dichloroethane, 2-butanone, and methylene chloride in at least one SDG. Laboratory blanks were analyzed for target VOCs, and methylene chloride was detected in SDGs K1906 and K1956 at trace concentrations. Detected sample concentrations less than 10 times the blank concentration were qualified as estimated nondetect (UJ). If the sample concentration of the blank contaminant was below the RDL, it was raised to that value as part of this action. No equipment blanks were analyzed for VOCs. Trip blanks analyzed with SDGs K1906 and K1956 contained concentrations of methylene chloride. Based on the guidance (HNF-20433), no action was taken with respect to trip blank contamination.

LCS and matrix spike recoveries were out of compliance for 2-butanone, 2-hexanone, acetone, and bromomethane in at least one SDG. The recoveries exceeded the upper control limit, indicating a potential high bias. No action was taken because all of these compounds were nondetect in the associated samples. All results for 2-butanone and acetone in samples from SDG K1922 were qualified as estimated (J) based on noncompliant matrix spike/matrix spike duplicate RPDs. Surrogate recoveries were compliant for all SDGs. No field duplicates were collected or analyzed for VOCs.

Data from the VOC analyses are of sufficient quality for their intended project use.

3.2.3.3 Metals – Groundwater Upwelling (Sediment). For the metals data, QC results were compliant for most parameters. Nondetect results for bismuth and uranium in SDG K1953 were qualified as rejected (R) based on low matrix spike recoveries. With the exception of the rejected bismuth and uranium data (six samples), the data are sufficient for their intended project use. The following discussion summarizes the findings obtained from the assessment and identifies deficiencies indicated by the QC results. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

All samples were analyzed within the required holding times. Detection limits for most metals were generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A) with the exception of the following elements: calcium, iron, phosphorus, uranium, and zinc. In accordance with the guidance used for this DQA (HNF-20433), no action was taken with respect to the elevated detection limits.

Several elements were detected in the majority of the preparation blanks. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ). No equipment blanks were analyzed.

LCS recoveries were compliant for most SDGs; however, silicon had LCS recoveries that were below the lower control limit in most of the SDGs. All silicon results for many samples were qualified as estimated (J) based on the LCS recoveries. LCS recoveries for antimony were below the lower control limit for SDG K1906 and all associated sample results were qualified as estimated (J). For SDG K1945, the LCS recovery for antimony exceeded the upper control limit, and detected results were qualified as estimated (J).

Samples were spiked with known concentrations of the target elements to identify any potential matrix effects. Several elements had noncompliant recoveries in the sediment SDGs. For recoveries below the lower control limit, associated results were qualified as estimated (J). For recoveries that exceeded the upper control limit, detected results were qualified as estimated (J). Extremely low recoveries of bismuth (0%), phosphorus (4%), and uranium (0%) were reported for SDG K1953. Based on this finding, all nondetect results were qualified as rejected (R) and detected results were qualified as estimated (J). Very low recoveries of calcium (28%) and phosphorus (-8%) were also reported for SDG K1956; however, all results were detected and therefore qualified as estimated (J).

The RPDs between sample/duplicate pairs were acceptable for most of the laboratory duplicates, indicating that the analytical precision was satisfactory. In SDGs K1906, K1932, K1945, K1956, the RPD values exceeded criteria for various elements and associated results were qualified as estimated. Field duplicate results in SDG K1956 had RPDs greater than the criteria for chromium and sodium. In accordance with the guidance (HNF-20433), no action was taken based on this finding.

Nondetect results for bismuth and uranium in SDG K1953 were qualified as rejected (R) based on low matrix spike recoveries. All other metals data are of sufficient quality for their intended project use.

3.2.3.4 Hexavalent Chromium – Groundwater Upwelling (Sediment). For the hexavalent chromium data, six sample results were rejected based on low matrix spike recoveries.

The majority of the hexavalent chromium data in sediment samples associated with the groundwater upwelling investigation are of sufficient quality for their intended project use. The following is a summary of the results of the assessment and the QC deficiencies noted during the assessment. The data that were rejected are provided in Table 3-6.

Laboratory detection limits for hexavalent chromium met the level specified in the SAP (DOE/RL-2008-11, Appendix A). Samples from all SDGs were analyzed within the holding times.

Laboratory preparation blank results were compliant for all SDGs. LCS recoveries were compliant for all SDGs except J00657. All sample results in this SDG were qualified as estimated (J) based on this finding. Matrix spike recoveries below 30% resulted in nondetect results being qualified as rejected (R) for samples in the following SDGs: J00660, J00705, and J00757. Sample results associated with several other SDGs were qualified as estimated based on matrix spike recoveries between 30% and 70%.

Laboratory duplicate results were generally compliant, with only a few sample results being qualified as estimated based on elevated RPDs. The field duplicate RPD from SDG J00682 exceeded criteria; however, no qualification was performed based on the guidance for this assessment (HNF-20433).

The majority of the hexavalent chromium data in sediment samples associated with the groundwater upwelling investigation are of sufficient quality for their intended project use. Results for samples from three SDGs (total of six samples) were qualified as rejected (R) based on low matrix spike recoveries.

3.2.3.5 Total Organic Carbon – Groundwater Upwelling (Sediment). TOC QC results were compliant for most QC parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

Detection limit values reported for all samples were at or below the specification included in the SAP (DOE/RL-2008-11, Appendix A). Samples in SDGs K1922 and K1932 were analyzed beyond the specified holding time of 28 days. All associated samples in these SDGs were qualified as estimated as a result of this finding. Trace TOC concentrations were detected in many of the associated laboratory blanks. There was no impact from these detections since all of the TOC concentrations were much greater than five times the blank concentrations. LCS, surrogate, and matrix spike recoveries were generally compliant. Noncompliant RPDs for the laboratory duplicate samples were found in most of the SDGs. If initial and replicate results were both greater than five times the RDL, all results were qualified as estimated. However, if the results were equal to or less than five times the RDL and the difference between the results was greater than two times the RDL, only detected results were qualified as estimated. The field duplicate RPD for SDG K1956 was out of compliance; however, no qualification was assigned based on the guidance for this assessment (HNF-20433).

The TOC data in sediment samples associated with the groundwater upwelling investigation are of sufficient quality for their intended project use.

3.2.4 Summary of Data Validation Results for Groundwater Upwelling Data

The third-party data validation packages for groundwater upwelling samples are included in Appendix F (on CD). These packages summarize the data validation that was completed for a given SDG along with the QC deficiencies, if any, that were identified. Seventeen SDGs as listed in Table 2-5 were validated. With few exceptions, only minor QC deficiencies were identified in the data reviewed, and the data are suitable for their intended use in the RI and human health and ecological risk assessments. Data that were deemed unusable for decision-making purposes were rejected (qualified "R") based on a major QC deficiency identified during data validation. The only data rejected as a result of validation were the nondetect nitrate, nitrite, and orthophosphate results from pore water samples in SDG K1926. These results were rejected because the holding time had been exceeded by more than twice the 48-hour limit. A summary of this rejected pore water data is presented in Table 3-6.

3.3 SUMMARY OF RESULTS FOR FISH TISSUE DATA

The following subsections present by analytical parameter a summary of the data assessment and the QC deficiencies, if any, that were identified during the evaluation of the fish tissue data.

3.3.1 Summary of Data Assessment Results for Fish Tissue

Several different species of fish indigenous to the Columbia River including whitefish, carp, sturgeon, bass, sucker, and walleye were analyzed for radionuclides, chlorinated pesticides, and metals. A DQA was conducted to identify potential bias or interferences that could impact sample results as reported by the analytical laboratory. Eighteen SDGs were included in this assessment. Several samples from additional SDGs were analyzed for PCB congeners, speciated arsenic, hexavalent chromium, and methyl mercury as discussed in subsection 3.3.4.

The majority of the data are sufficient for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-7. The following subsections present a summary by chemical parameter of the major and minor QC deficiencies identified during the data assessment of the fish tissue data.

3.3.1.1 Radionuclides – Fish Tissue. Radionuclide target analytes include carbon-14, tritium, total strontium, technetium-99, uranium, plutonium, thorium, and a gamma scan that provides results for 16 additional radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected and all are acceptable for their intended project use. The following is a summary of the results of the assessment and minor QC deficiencies noted during the assessment.

All samples were analyzed prior to expiration of the associated 6-month required holding time. RDLs were reviewed and determined to be at or below the levels specified in the project SAP (DOE/RL 2008-11, Appendix A). The MDAs exceeded specifications contained in the SAP for cobalt-60, radium-226, radium-228, europium-152, europium-154, europium-155, cesium-137, ruthenium-106, uranium-238, and potassium-40 for several samples. In accordance with the guidance used for this DQA (HNF-20434), no action was taken with respect to detection limit exceedances.

Table 3-7. Summary of Rejected Fish Tissue Data by Method. (79 Pages)

Analytical Method	Analyte	SDG Number	Sample Identification	Sample Date	Result	Units	Laboratory Qualifier	Validation Qualifier
PCB Congeners - 1668A	4-Chlorobiphenyl	J00469	J18K87	4/15/2009	5.00E-05	mg/Kg	U	R

SDG = sample delivery group
U = nondetect

Method blanks generally did not contain concentrations of target analytes above corresponding detection limits. However, thorium-230 was detected at trace levels below the MDA in a laboratory blank associated with SDG K1579. Associated samples were qualified as estimated (J) based on this finding.

LCS results were compliant with respective criteria, indicating a positive correlation to the accuracy of reported sample concentrations. Noncompliant tracer recovery results were reported for samples in SDG K1618. In SDG K1618, the isotopic thorium tracer recovery exceeded the 110% upper control limit for one sample, indicating a potential high bias to sample concentrations. Based on this finding, no qualification was assigned for nondetect results of associated radionuclides (thorium-228, thorium-230, and thorium-232) and detected sample results were qualified as estimated (J).

Laboratory duplicate samples were analyzed to measure the precision of reported results. The RPDs between the duplicate pairs were compliant, indicating that there was an acceptable level of analytical precision. Matrix spike analyses were not performed in conjunction with the carbon-14 and tritium analyses. Based on this finding, all sample results from all SDGs were qualified as estimated (J).

None of the radionuclide fish data was rejected and all are of sufficient quality for their intended project use.

3.3.1.2 Chlorinated Pesticides – Fish Tissue. Many of the fish samples were extracted beyond twice the holding time limit and consequently, associated nondetect pesticide results were qualified as rejected based on this finding. SDGs K1579, K1714, K1725, K1758, K1759, K1761, K1769, K1774, K1785, K1852, K1863, and K1919 contained nondetect results (from 169 samples) that were rejected due to these exceedances. Detected results for samples analyzed in these SDGs were qualified as estimated (J). Other than the hold time exceedances, QC results were generally compliant for most other parameters. The following is a summary of the other QC results included in the assessment and the deficiencies that were noted. A summary of the data that were rejected is provided in Table 3-7.

Detection limits for many of the pesticide compounds exceeded those specified in the SAP (DOE/RL-2008-11, Appendix A). In accordance with the guidance used for this DQA (HNF-20433), no action was taken based on this finding.

There were no pesticides detected in any of the laboratory method blanks. Samples J192Y3 and J192Y4 in SDG K1719 were equipments blanks for the large and small grinders used to process fish samples. None of the target chlorinated pesticides were detected in either of the equipment blanks, indicating that the transfer of these compounds between samples is not likely.

In two SDGs, the LCS recovery was below the lower control limit for delta-BHC, and in a third SDG, LCS recoveries for 4,4'-DDE and 4,4'-DDD exceeded the upper control limit. For all three SDGs, results were qualified as estimated (J). Matrix spike recoveries were out of QC control limits for several SDGs. In most cases the recoveries were below the lower control limit, suggesting a low bias to reported pesticide concentrations, most likely due to impacts from the matrix. The matrix effects theory is supported by reported recoveries of the surrogate decachlorobiphenyl below the lower control limit for many of the samples associated with the low matrix spike results. LCS and matrix spike QC results for toxaphene were not provided, and therefore toxaphene results for all samples in all SDGs were qualified as estimated (J). Matrix spike duplicate RPD values were out of criteria in several SDGs. All results that exceeded RPD criteria were qualified as estimated (J). No field duplicates were collected for pesticide analysis.

Although a significant number of results (from 169 samples) were rejected based on holding time exceedances, the remaining 264 samples that were analyzed for pesticides are acceptable for their intended project use.

3.3.1.3 Metals – Fish Tissue. For the metals data, QC results were compliant for most parameters. No data were rejected. The holding time for mercury analyses of several samples was exceeded by greater than twice the limit. Associated nondetect sample results would have been rejected; however, since all samples had detected mercury concentrations, they were all qualified as estimated (J). The QC results from the other metals analyses indicate that the data are of acceptable quality for their intended project use. The following discussion summarizes the findings obtained from the assessment and identifies deficiencies indicated by the QC results.

Detection limits for most metals were generally at or below those specified in the SAP (DOE/RL-2008-11, Appendix A) with the exception of the following elements in several SDGs: beryllium, calcium, chromium, copper, iron, lithium, magnesium, phosphorus, potassium, silicon, tin, uranium, and zinc. In accordance with the guidance used for this DQA (HNF-20433), no action was taken with respect to the elevated detection limits.

The majority of the samples were analyzed within the holding times specified in the project SAP (DOE/RL-2008-11, Appendix A). As indicated above, with the exception of four samples from SDG K1759 and the mercury analyses, samples were analyzed within the specified holding time of 6 months. SDG K1759 contained four samples (J190D6, J190D8, J19068, and J19070) that were analyzed for metals 7 months after the collection date. These samples were analyzed less than two times the holding time limit and were therefore qualified as estimated (J). For mercury, the holding time limit from collection to digestion was exceeded for samples in SDGs K1579, K1709, K1714, K1725, K1758, K1759, K1761, K1769, K1774, K1852, K1863, and K1919. Although for some samples the amount of time that elapsed prior to processing exceeded twice the holding time limit, mercury results for all samples in these SDGs were detected and, therefore, qualified as estimated (J).

Several elements were detected in the majority of the preparation blanks. Since almost all of the detections were at trace levels, those elements detected at similar levels in samples (less than five times the blank concentration) were qualified as estimated nondetect (UJ).

Four equipment blanks were analyzed for metals: J192Y3, J192Y4 within SDG K1719 and J18KH3 and J18KH4 with SDG K1602. Several elements including barium, calcium, cobalt, lead, magnesium, phosphorus, potassium, silicon, sodium, strontium, tin, and zinc were detected in these blanks. The equipment blank results represent potential residual concentrations of metals that were transferred from the grinders to the blanks. No action with respect to the addition of data qualifiers was taken as a result of detected equipment blank results.

LCS recoveries were compliant for most SDGs. The element with the most frequent out of compliance LCS recovery was silicon. Recoveries of silicon were both above and below the control limits. Silicon results for many samples were qualified as estimated (J) based on the LCS recoveries. LCS recoveries for antimony, arsenic, lead, vanadium, and mercury were noncompliant for at least one SDG. Antimony, arsenic, mercury, and vanadium recoveries exceeded the upper control limit, indicating a potential high bias to sample concentrations of these elements. Detected sample concentrations were qualified as estimated (J). The LCS recovery for lead in one SDG was below the lower control limit, and all results for lead in this SDG were qualified as estimated (J).

Fish samples were spiked with known concentrations of the target elements to identify any potential matrix effects. The matrix spike recoveries of target elements were compliant for most samples. The recoveries of calcium, iron, and phosphorus were below the lower control limit for a few of the matrix spike samples, and associated results were qualified as estimated (J). For some elements (e.g., potassium and calcium), recoveries exceeded the upper control limit, in which case only detected results were qualified as estimated (J).

The RPDs between sample/duplicate pairs were acceptable for most of the laboratory duplicates, indicating that the analytical precision was satisfactory. In some cases, the RPD values exceeded criteria and associated detected results were qualified as estimated. Field duplicate samples were not collected.

The fish tissue metals data are sufficient for their intended project use.

3.3.2 Summary of Third-Party Data Validation Results for Fish Tissue Data

The third-party data validation packages for fish tissue samples are included in Appendix F (on CD). The fish tissue SDGs and analytical methods that were validated are listed in Table 2-5. Four SDGs were validated for metals and radionuclides, and one of these for pesticides. These data validation reports in Appendix F summarize the data validation that was completed for a given SDG along with the QC deficiencies that were identified. Only minor QC deficiencies were found during this validation, and none of the fish tissue data was rejected, indicating that these data are of good quality and suitable for their intended project use.

3.3.2.1 PCB Congener Data Validation – Fish Tissue. The third-party data validation report prepared for PCB congeners is included in Appendix G (on CD). The 12 SDGs listed in Table 2-7 were validated. This report summarizes the data validation that was completed along with the QC deficiencies that were identified. Several fish tissue samples in a number of SDGs were validated as presented in Table 2-7. In general, only minor QC deficiencies were identified in the data reviewed; however, three PCB results were rejected from samples J18K87, J19037, J19276, J19289, and J19464 because of extremely low internal standard recoveries. These rejected results are listed in Table 3-7.

The maximum holding time from collection to extraction as specified in the SAP is 7 days for aqueous samples and 14 days for solids. This holding time was exceeded for all samples (DOE/RL-2008-11, Appendix A). However, EPA Method 1668B specifies a maximum holding time of 1 year from sample collection to extraction if the samples are stored in accordance with the specified requirements. Based on the professional judgment of the third-party validator, the samples were not qualified based on holding time exceedances. The data are suitable for their intended use in the human health and ecological risk assessments.

3.3.2.2 Speciated Arsenic Validation – Fish Tissue. The third-party data validation report discussing the speciated arsenic validation for fish tissue is included in Appendix G (on CD). Several fish tissue samples in a number of SDGs were validated as presented in Table 2-7. Only minor QC deficiencies were identified in the data reviewed, and the data are suitable for their project intended project use.

3.3.2.3 Methyl Mercury Validation – Fish Tissue. The third-party data validation report discussing the methyl mercury validation for fist tissue is included in Appendix G (on CD). Four fish tissue samples were validated as presented in Table 2-7. No QC deficiencies were identified that would result in qualifying the data. The data are suitable for their intended project use.

3.3.2.4 Hexavalent Chromium Validation – Fish Tissue. The third-party data validation report discussing the hexavalent chromium validation for fist tissue is included in Appendix G (on CD). Five fish tissue samples were validated as presented in Table 2-7. One minor QC deficiency was identified that resulted in one sample being qualified as estimated (J) based on a low matrix spike recovery. The data are suitable for their intended project use.

3.3.3 Summary of Preliminary QC Review of Fish Tissue Data

Fish tissue SDGs that were analyzed for PCB congeners, speciated arsenic, hexavalent chromium, and methyl mercury and that were not assessed or validated are listed in Table 2-8. The tabulated quality control results and the narrative provided by the analytical laboratory were reviewed as described in Section 2.1.2. Based on the quality control results, data qualifiers were applied to the results as they were in validation. Compliance with quality control specifications were based on a comparison with the criteria specific to each analytical method and the criteria that was used in the validation process. The following subsections provide a summary of the results from this quality control review for each of the analyses. The QC review worksheets are provided in Appendix H.

3.3.3.1 PCB Congener Analysis. A quality control review consisting of a review of the laboratory narratives was conducted for the following SDGs that were not validated: J00492, J00577, J00649, and J00686. Samples in all of these SDGs were extracted and analyzed within an acceptable holding time period. Surrogate recoveries for all samples were also satisfactory. LCS recoveries of target PCB congeners were compliant. Isotopic carbon is used as an internal standard for quantification of the sample concentrations. Recoveries of isotopes associated with PCB-3 were below the lower acceptance limit for samples in SDGs J00492, JJ00577, and J00649 indicating a potential low bias to sample concentrations. Results for this target congener were qualified as estimated (J) based on this finding.

Several target PCB congeners were detected in the laboratory method blanks. In most cases these concentrations were near the detection limit values. In order to differentiate similar results of the same congeners in associated samples, sample concentrations less than five times the blank detection were qualified as nondetect (UJ).

The QC review did not reveal any major quality control deficiencies for any of the SDGs. None of the data was rejected, and the data are acceptable for their intended project use.

3.3.3.2 Inorganic Arsenic. The scope of the QC review included SDGs SEQ12810A, SEQ081409, SEQ091109, SEQ121809, and SEQ070710 and covered the following parameters: holding times, method blanks, laboratory control samples, laboratory duplicates, field duplicates, and recoveries of standard reference material. Although both inorganic and organic species were reviewed, the laboratory reported only total inorganic arsenic results.

All samples were analyzed prior to the expiration of holding times. Arsenobetaine was detected in method blanks associated with SDGs SEQ12810A and SEQ121809.

Laboratory control samples had compliant results for all arsenic species indicating that the accuracy for the method was acceptable. Field duplicate and laboratory duplicate results had compliant RPDs. Three pairs of matrix spike/matrix spike duplicates were analyzed to evaluate if there were any impacts to sample concentrations within the fish tissue matrix. Two of the three pairs had compliant results. The sample J195W5 had a recovery of arsenate (As^{+5}) below the lower control limit. A standard reference material of a type of mussel with known, certified concentrations of arsenobetaine and total arsenic was analyzed to determine analytical accuracy. The analyses of this material had compliant recoveries which, along with the laboratory control results, provided additional evidence that sample concentrations were accurately quantified.

The preliminary QC review of the inorganic arsenic quality control results did not identify any major deficiencies. Based on this review the data are of acceptable quality for their intended project use.

3.3.3.3 Hexavalent Chromium. Quality control data associated with SDGs SEQ82009, SEQ091109, and SEQ093009 were reviewed to evaluate data quality. Results for the following parameters were included as part of the review: holding times, blank results, matrix spikes, field duplicate samples, laboratory duplicate samples, laboratory control samples and standard reference recoveries. All quality control parameters above had compliant results, and the data are of acceptable quality for their intended project use.

3.3.3.4 Methyl Mercury. A quality control review was conducted for one SDG, SEQ092309, in which the samples were analyzed for methyl mercury. Results for holding times, blank results, matrix spikes, field duplicate samples, laboratory duplicate samples, laboratory control samples, and standard reference recoveries were compared against criteria for compliance. All of the QC parameters associated with the methyl mercury analyses were compliant, and the data are of acceptable quality for their intended project use.

4.0 SUMMARY

This report has been prepared in support of the RI of Hanford Site Releases to the Columbia River and summarizes the results of the DQA that was performed on the analytical data generated in connection with the following data collection efforts:

- 2008/2009 surface water, sediment, and island soil data collection
- Groundwater upwelling investigation (e.g., pore water, surface water, sediment) sample collection
- Fish tissue sample collection.

The data are being used to allow regulators to make final decisions for cleaning up Hanford Site contamination that exists in and along the Columbia River. The DQA was required to verify that the data collected in support of the RI are suitable to meet project DQOs and specifically to support the Screening Level Ecological and the Baseline Human Health Risk Assessments.

With the exceptions discussed below, only minor QC deficiencies were identified during the data assessment, and the data are suitable for their intended project use. Data that are deemed unusable for decision-making purposes in the risk assessments are those that were rejected (qualified “R”) based on a major QC deficiency identified during data assessment. A summary of the rejected data including medium, SDG number, analytical class, number of rejected samples, and basis for rejection is presented in Table 3-1. This table provides an overview of rejected data. More detailed summaries of the rejected data by compound and sample identification number are presented in Tables 3-2 through 3-4, 3-6 and 3-7 for surface water, sediment, soil, groundwater upwelling, and fish tissue data, respectively.

4.1 SUMMARY OF DATA ASSESSMENT RESULTS FOR SURFACE WATER

The majority of the surface water data are acceptable for their intended project use. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-2.

- Radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use.
- Volatile organic compounds. Quality control results were compliant for most QC parameters. None of the VOC data was rejected, and the data are acceptable for their intended project use.
- Semivolatile organic compounds. Quality control results were compliant for most QC parameters. Although data from one sample were rejected based on low surrogate recoveries, the QC results from the SVOC analyses indicate that over 99% of the results are of acceptable quality for their intended project use.

- Polychlorinated biphenyls. Although data for two SDGs were rejected based on holding time exceedances, the QC results from the PCB analyses indicate that 93% of the results are of acceptable quality for their intended project use.

- PCB congeners. None of the data was rejected, and the QC results demonstrate that the data are of acceptable quality for their intended project use.

- Chlorinated pesticides. Although data from SDGs K1453 and K1455 were rejected based on holding time exceedances, the QC results from the pesticide analyses indicate that 93% of the results are of acceptable quality for their intended project use.

- Metals. Quality control results were compliant for most QC parameters. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use. No major deficiencies were identified and the data are acceptable for their intended project use.

- Hexavalent chromium. Quality control results were compliant for all QC parameters assessed. None of the hexavalent chromium data was rejected or otherwise qualified during the data assessment and are acceptable for their intended project use.

- Diesel range organics. Quality control results were compliant for most QC parameters. Most of the DRO data are acceptable for their intended project use. Only one sample result (1% of results) in SDG K1442 was qualified as rejected based on a low surrogate recovery.

- Dissolved organic carbon. Quality control results were compliant for most QC parameters. None of the DOC data was rejected, and the data are acceptable for their intended project use.

- Anions. No major QC deficiencies were identified during the assessment of anion data. None of the data was rejected, and the data are acceptable for their intended project use.

4.2 SUMMARY OF DATA ASSESSMENT RESULTS FOR SEDIMENT

The following discussion presents a summary of the major and minor QC deficiencies identified during the data assessment of the sediment data. The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-3.

- Radionuclides. Radionuclide target analytes include carbon-14, total strontium, technetium-9, various isotopic forms of uranium, plutonium, and thorium, and a gamma scan that provides results for additional radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use.

- Volatile organic compounds. Quality control results were generally compliant for most QC parameters, and the data are acceptable for their intended project use.

- Semivolatile organic compounds. Quality control results were compliant for most QC parameters. Although a small amount of the data was rejected based on holding time and surrogate recoveries, the QC results from the SVOC analyses indicate that the majority of the results (97%) are of acceptable quality for their intended project use.

- Polychlorinated biphenyls. Quality control results were compliant for most QC parameters. Although data for five samples in SDG K1497 were rejected based on holding time exceedances, the QC results from the PCB analyses indicate that 98% of the results are of acceptable quality for their intended project use.

- PCB congeners. None of the data was rejected, and the QC results demonstrate that the data are of acceptable quality for their intended project use.

- Chlorinated pesticides. Although data from five samples in SDG K1497 were rejected based on holding time exceedances, the QC results from the pesticide analyses indicate that the majority of the results (98%) are of acceptable quality for their intended project use.

- Metals. Quality control results were compliant for most QC parameters. Antimony results (six samples) and calcium results (14 samples) were rejected based on low matrix spike recoveries. The QC results from the other metals analyses indicate that the majority of the results (99%) are of acceptable quality for their intended project use.

- Hexavalent chromium. Results from 12 SDGs were rejected based on holding time exceedances and/or low matrix spike recoveries. The remainder of the data (80%) is acceptable for its intended project use.

- Diesel range organics. Quality control results were compliant for most QC parameters. None of the DRO data was rejected, and the data are acceptable for their intended project use.

- Total organic carbon. Quality control results were compliant for most QC parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use.

4.3 SUMMARY OF DATA ASSESSMENT RESULTS FOR SOIL

The following present a summary of the results of the data assessment and the major and minor QC deficiencies identified during the data assessment for the soil data. The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-4.

- Radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use.

- Semivolatile organic compounds. Quality control results were acceptable for most QC parameters. Results from three samples were rejected based on surrogate recoveries below 10%; however, the QC results from the SVOC analyses indicate that the majority of the results (99%) are of acceptable quality for their intended project use.

- Polychlorinated biphenyls. Quality control results were compliant for most QC parameters. None of the data was rejected, and the QC results demonstrate that the data are of acceptable quality for their intended project use.

- PCB congeners. None of the data was rejected, and the QC results demonstrate that the data are of acceptable quality for their intended project use.

- Chlorinated pesticides. Quality control results were compliant for most QC parameters. The QC results from the pesticide analyses indicate that the results are of acceptable quality for their intended project use.

- Metals. Quality control results were compliant for most QC parameters. None of the metals data was rejected during the data assessment, and the data are acceptable for their intended project use.

- Hexavalent chromium. Quality control results were compliant for most QC parameters, although results were qualified as rejected for 35 samples based on low matrix spike recoveries. Matrix spike recoveries of hexavalent chromium for analyses completed with SDG K1554 and K1556 were below 30%, suggesting a strong matrix effect. Nondetect results for associated samples were qualified as rejected (R) and detected results as estimated (J). Forty-three percent of the results were rejected and the remaining 57% are acceptable for their intended project use.

- Diesel range organics. Quality control results were compliant for most QC parameters. None of the data was rejected, and the data are acceptable for their intended project use.

- Total organic carbon. Quality control results were compliant for most QC parameters. None of the data was rejected, and the data are acceptable for their intended project use.

4.4 SUMMARY OF DATA ASSESSMENT RESULTS FOR GROUNDWATER UPWELLING DATA

The following is a summary of the results of the data assessment and QC deficiencies identified during the assessment of the groundwater upwelling data, which consists of pore water, surface water, and sediment data.

4.4.1 Summary of Data Assessment Results for Groundwater Upwelling – Pore Water

The following present a summary of the results of the assessment and the major and minor QC deficiencies identified during the data assessment of the groundwater upwelling pore water data. The majority of the data are acceptable for their intended project use. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

- Radionuclides. Quality control results were compliant for most QC parameters. No radionuclide data was rejected, and the data are acceptable for their intended project use.

- Volatile organic compounds. For the groundwater upwelling pore water VOC data, QC results were compliant for most QC parameters. No VOC data were rejected, and the data are acceptable for their intended project use.

- Metals. For the metals data, QC results were compliant for most parameters and no data were rejected. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use.

- Hexavalent chromium. For the hexavalent chromium data, QC results were generally compliant for most parameters. Although the hexavalent chromium result from one sample in SDG J00557 was rejected based on a low matrix spike recovery, the QC results from the hexavalent chromium analyses indicate that the majority of the results (more than 99%) are of acceptable quality for their intended project use.

- Diesel range organics. Only samples within three SDGs were analyzed for DRO. Diesel range organic QC results were compliant for most parameters. No DRO data were rejected, and the data are acceptable for their intended project use.

- Total organic carbon. Quality control results were compliant for most parameters. None of the TOC data was rejected, and the data are acceptable for their intended project use.

- Anions. Holding time limits were exceeded by more than twice the limit for nitrite, nitrate, and orthophosphate in SDGs K1908, K1913, K1940, K1943, K1946, K1962, and K1963. Detected results were qualified as estimated (J) and nondetect results were qualified as rejected (R). The majority of the nitrite and orthophosphate results were rejected, and most nitrate results were detected and therefore qualified as estimated. The remaining 79% of the data are acceptable for their intended project use.

4.4.2 Summary of Data Assessment Results for Groundwater Upwelling – Surface Water

The following present a summary of the results of the assessment and the major and minor QC deficiencies identified during the data assessment of the groundwater upwelling surface water data. The majority of the data are acceptable for their intended project use. Those data that were rejected and determined to be unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

- Radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected, and the data are acceptable for their intended project use.

- Volatile organic compounds. Quality control results were compliant for most QC parameters. None of the VOC data was rejected, and the data are acceptable for their intended project use.

- Metals. Quality control results were compliant for most QC parameters and no data were rejected. The QC results for metals analyses indicate that the results are of acceptable quality for their intended project use.

- Hexavalent chromium. Quality control results were compliant for most QC parameters assessed. None of the hexavalent chromium data was rejected during the data assessment, and the data are acceptable for their intended project use.

- Dissolved organic carbon. Quality control results were compliant for most QC parameters. None of the DOC data was rejected, and the data are acceptable for their intended project use.

- Anions. All results for nitrite and orthophosphate and some for nitrate were rejected based on holding time exceedances. The remaining 74% of the anion data are acceptable for their intended project use.

4.4.3 Summary of Data Assessment Results for Groundwater Upwelling – Sediment

Groundwater upwelling sediment samples were collected and analyzed for radionuclides, VOCs, metals, hexavalent chromium, and TOC. The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-6.

- Radionuclides. Quality control results were compliant for most QC parameters, and all data are acceptable for their intended project use.

- Volatile organic compounds. Quality control results were compliant for most QC parameters, and the data are acceptable for their intended project use.

- Metals. Quality control results were compliant for most QC parameters. Nondetect results for bismuth and uranium in SDG K1953 were qualified as rejected based on low matrix spike recoveries. With the exception of the rejected bismuth and uranium data (six samples), the remaining 99% of the data are acceptable for their intended project use.

- Hexavalent chromium. Six sample results were rejected based on low matrix spike recoveries. The majority (87%) of the hexavalent chromium data in sediment samples associated with the groundwater upwelling investigation are acceptable for their intended project use.

- Total organic carbon. Quality control results were compliant for most QC parameters. None of the data was rejected, and all data are acceptable for their intended project use.

4.5 SUMMARY OF DATA ASSESSMENT RESULTS FOR FISH TISSUE DATA

Several different species of fish indigenous to the Columbia River including whitefish, carp, sturgeon, bass, suckers, and walleye were analyzed for radionuclides, chlorinated pesticides, metals, PCB congeners, speciated arsenic, hexavalent chromium, and methyl mercury. A DQA was conducted to identify potential bias or interferences that could impact sample results as reported by the analytical laboratory.

The majority of the data are acceptable for their intended project use. Those data that were rejected and unusable based on a major QC deficiency identified during the assessment are provided in Table 3-7.

- Radionuclides. Radionuclide target analytes include carbon-14, tritium, total strontium, technetium-99, various isotopic forms of uranium, plutonium, and thorium, and a gamma scan that provides results for 16 additional radionuclides. Quality control results were compliant for most QC parameters. None of the radionuclide data was rejected and all are acceptable for their intended project use.

- Chlorinated pesticides. Many of the fish samples were extracted beyond twice the holding time limit and associated nondetect pesticide results were qualified as rejected based on this finding. SDGs K1579, K1714, K1725, K1758, K1759, K1761, K1769, K1774, K1785, K1852, K1863, and K1919 contained 169 nondetect samples that were rejected due to these exceedances. There were 264 samples with pesticide results that were not rejected. Approximately 67% of the pesticide results in fish tissue are acceptable for their intended project use.

- Metals. For the metals data, QC results were compliant for most parameters. There were no data that were rejected. The QC results from the metals analyses indicate that all data are of acceptable quality for their intended project use.

- PCB congeners. PCB 3 results were rejected from five samples J18K87, J19037, J19276, J19289, and J19464 because of extremely low internal standard recoveries. The remaining 99% of the data are acceptable for their intended project use.

- Speciated arsenic. Only minor QC deficiencies were identified in the data reviewed, and the data are of acceptable quality for their intended project use.

- Hexavalent chromium. One minor QC deficiency was identified that resulted in one sample being qualified as estimated (J) based on a low matrix spike recovery. The remaining data are of acceptable quality for their intended project use.

- Methyl mercury. No QC deficiencies were identified in the data reviewed, and the data are of acceptable quality for their intended project use.

WCH-387, 2010, *Sampling Summary Report for Fish Sample Collection for the Remedial Investigation of Hanford Site Releases to the Columbia River*, Rev. 0, Washington Closure Hanford, Richland, Washington.

APPENDIX A

SURFACE WATER DATA QUALITY ASSESSMENT WORKSHEETS

TABLE OF CONTENTS

APPENDIX A
SURFACE WATER DATA QUALITY ASSESSMENT WORKSHEETS

A.1 SDG J00209

SDG J00209 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00209	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17K69			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 01/28/10 **Completed By:** RDD	**Sample Collection Date:** 10/16/08	**Sample Analysis Date:** 10/16/08

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17K69	Yes	None	-	No action	
Laboratory Duplicates	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.2 SDG J00211

SDG J00211 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00211	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17K67, J17K68			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 01/28/10 **Completed By:** RDD	**Sample Collection Date:** 10/16/08	**Sample Analysis Date:** 10/17/08

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17K67	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17K67	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.3 SDG J00212

Validated by ELR - Included in Appendix F

A.4 SDG J00216

SDG J00216 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00216	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17RK7			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 01/28/10 **Completed By:** RDD	**Sample Collection Date:** 10/28/08	**Sample Analysis Date:** 10/28/08

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID:	Yes	None	-	No action	
Laboratory Duplicates Sample ID:	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.5 SDG J00217

Validated by ELR - Included in Appendix F

A.6 SDG J00219

SDG J00219 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00219	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17RW9, J17TT1			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 01/28/10 **Completed By:** RDD	**Sample Collection Date:** 10/31/08	**Sample Analysis Date:** 10/31/08

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RW9	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RW9	Yes	None	-	No action	
Field Duplicates Sample IDs: J17TT1/J17RW9	Yes	None	-	No action	
Summary					
Validity of Data	Yes	No rejected results			

A.7 SDG J00220

SDG J00220 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00220	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17RP3, J17RT3, J17RP8, J17RP9			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** RDD	**Sample Collection Date:** 10/30/2008	**Sample Analysis Date:** 10/31/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RT3	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RT3	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.8 SDG J00221

SDG J00221 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00221	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17RW4, J17RW5, J17RW6		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/3/2008	**Sample Analysis Date:** 11/4/2008

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RW4	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RW4	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.9 SDG J00222

SDG J00222 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00222	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17TT2, J17TT5			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/4/2008	**Sample Analysis Date:** 11/5/2008

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TT2	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TT2	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.10 SDG J00223

SDG J00223 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00223	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17TT3, J17TT4, J17TT8			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/4/2008	**Sample Analysis Date:** 11/5/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TT3	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TT3	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.11 SDG J00224

SDG J00224 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00224	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17TT6, J17TV2		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/5/2008	**Sample Analysis Date:** 11/5/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TT6	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TT6	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.12 SDG J00225

SDG J00225 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00225	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17TT9, J17TV1			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/5/2008	**Sample Analysis Date:** 11/6/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TV1	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TV1	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.13 SDG J00226

SDG J00226 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00226	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17TT7		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/6/2008	**Sample Analysis Date:** 11/6/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes	Yes	None	-	No action	
Laboratory Duplicates	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.14 SDG J00227

SDG J00227 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00227	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17TV3, J17V46, J17TV4, J17V45		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/6/2008	**Sample Analysis Date:** 11/7/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17V45	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17V45	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.15 SDG J00228

SDG J00228 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00228	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17TV0, J17TV7		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/7/2008	**Sample Analysis Date:** 11/7/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TV7	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TV7	Yes	None	-	No action	
Field Duplicate Sample IDs: J17TV0/ J17TV7	Yes	None	-	No action	
Summary					
Validity of Data	Yes	No rejected results			

A.16 SDG J00229

SDG J00229 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00229	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17RK9, J17RL0		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/10/2008	**Sample Analysis Date:** 11/10/2008

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RK9	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RK9	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.17 SDG J00231

SDG J00231 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00231	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17RK8			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/10/2008	**Sample Analysis Date:** 11/11/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RK8	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RK8	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.18 SDG J00232

SDG J00232 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00232	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17TV5, J17TV6, J17V47			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/11/2008	**Sample Analysis Date:** 11/11/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17TV5	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17TV5	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.19 SDG J00233

SDG J00233 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00233	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J17RT4, J17RT7, J17RT5, J17RT8, J17RT6		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/12/2008	**Sample Analysis Date:** 11/13/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RT5	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RT5	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.20 SDG J00234

SDG J00234 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00234	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J17RW7			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 11/13/2008	**Sample Analysis Date:** 11/13/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J17RW7	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J17RW7	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.21 SDG J00529

SDG J00529 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00529	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J18NT9		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/1/2009	**Sample Analysis Date:** 6/2/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18NT9	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J18NT9	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.22 SDG J00530

SDG J00530 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00530	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J18NP6			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/1/2009	**Sample Analysis Date:** 6/2/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18NP6	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J18NP6	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.23 SDG J00531

SDG J00531 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00531	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J18NL8, J18P19, J18NN1, J18P22, J18NN4, J18P28			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/2/2009	**Sample Analysis Date:** 6/3/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18P28	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J18P28	Yes	None	-	No action	
Field Duplicates Sample IDs: J18NL8/ J18NN4	Yes	None	-	No action	
Summary					
Validity of Data	Yes	No rejected results			

A.24 SDG J00533

SDG J00533 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00533	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J18NN7, J18P25, J18NP0, J18NP3		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/3/2009	**Sample Analysis Date:** 6/4/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18P25	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J18P25	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.25 SDG J00535

SDG J00535 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00535	**W&C Project No.:**222007
Medium: Surface Water		**Analytes:** Hexavalent Chromium
Samples: J18P31, J18P34		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/4/2009	**Sample Analysis Date:** 6/5/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18P31	Yes	None	-	No action	
Laboratory Duplicates Sample ID: J18P31	Yes	None	-	No action	
Field Duplicates	Not Collected				
Summary					
Validity of Data	Yes	No rejected results			

A.26 SDG J00537

SDG J00537 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00537	**W&C Project No.:**222007	
Medium: Surface Water		**Analytes:** Hexavalent Chromium	
Samples: J18P46			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Completed By:** KAM	**Sample Collection Date:** 6/5/2009	**Sample Analysis Date:** 6/5/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action

Matrix Spikes Sample ID: J18P35	Yes	None	-	No Action	
Lab Duplicate Sample ID: J18P35	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Not all QC criteria met, however no rejected results				
Additional Notes:					

APPENDIX B

SEDIMENT DATA QUALITY ASSESSMENT WORKSHEETS

TABLE OF CONTENTS

APPENDIX B
SEDIMENT DATA QUALITY ASSESSMENT WORKSHEETS

B.1 SDG J00242

SDG J00242 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00242	**W&C Project No.:**222007

Medium: Sediment	**Analytes:** Hexavalent Chromium
Samples: J17VB3, J17VB4, J17VB5, J17VB6, J17VB8, J17VD2, J17VD3, J17VD4, J17VD5, J17VD6, J17VD7	

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/1/2008	**Sample Analysis Date:** 12/2/2008

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17VB3	No	Cr+6 = 22.74%	J/R	Qualify positive results as estimated (J) and non-detect results as rejected (R).	Impacts to all samples. Sample J17VB5 qualified as estimated (J), and remaining samples rejected (R).
Lab Duplicates Sample ID: J17VB3	Yes	None, both non-detect	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No	Matrix Spike	-	Some samples were rejected due to low matrix spike recoveries.	Impacts to all samples.
Additional Notes:					

B.2 SDG J00244

SDG J00244 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00244	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VD8, J17VD9, J17VF0, J17VF1, J17VF2, J17VF3, J17VF4, J17VR0, J17W49, J17WB9, J17WC1, J17WF3, J17WF4, J17WH0			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/2/2008	**Sample Analysis Date:** 12/3/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID: J17W49	Yes	None	-	No Action based on guidance	
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17WF3	Yes	None	-	No Action	
Lab Duplicates Sample ID: J17WF3	Yes	None	-	No Action	
Field Duplicate Sample ID: J17VF3/ J17VR0	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.3 SDG J00246

SDG J00246 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00246	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17WB8, J17WC0, J17WC5, J17WC6, J17WC7, J17WJ6, J17WJ9, J17WK3			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/3/2008	**Sample Analysis Date:** 12/4/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17WC6	No	Cr+6 = 9.34%	J/R	Qualify positive results as estimated (J) and non-detect results as rejected (R).	Impacts to all samples. Sample J17WC6 rejected (R), and remaining samples qualified as estimated (J).
Lab Duplicates Sample ID: J17WC6	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No	Matrix Spike	R	Sample rejected due to low matrix spike recoveries.	Impacts to all samples.
Additional Notes:					

B.4 SDG J00248

SDG J00248 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00248	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17WC2, J17WC4, J17WH1, J17WJ7, J17WJ8, J17WK0, J17WK2, J17WK5			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/3/2008	**Sample Analysis Date:** 12/4/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17WJ7	Yes	None	-	No Action	
Lab Duplicates Sample ID: J17WJ7	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.5 SDG J00249

SDG J00249 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00249	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17WK1, J17WK4, J17X04, J17X05, J17YC6, J17YC7, J17YD4			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/4/2008	**Sample Analysis Date:** 12/5/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17WK4	Yes	None	-	No Action	
Lab Duplicates Sample ID: J17WK4	No	RPD = 80.9%	J	Qualify positive results as estimated (J).	J17WK1, all others ND.
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.6 SDG J00250

SDG J00250 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00250	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VP9, J17X17, J17X18, J17X19, J17X20, J17X21, J17YC8, J17YC9, J17YD5			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/2/2010 **Complete By:** KAM	**Sample Collection Date:** 12/4/2008	**Sample Analysis Date:** 12/5/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17X17	No	Cr+6 = 34.03%	J	Qualify positive and non-detect results as estimated (J).	Impacts to all samples.
Lab Duplicates Sample ID: J17X17	No	RPD = 99.1%	J	Qualify positive result as estimated (J).	Impacts to J17X17, J17X19, J17X21, J17YC8
Field Duplicate Sample ID: J17X18/ J17VP9	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No data rejected
Additional Notes:					

B.7 SDG J00251

SDG J00251 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00251	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17XJ5, J17XJ6, J17XJ7, J17XJ8, J17XL2, J17XL6, J17YF5, J17YF7			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/5/2008	**Sample Analysis Date:** 12/6/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17YF7	Yes	None	-	No Action	
Lab Duplicates Sample ID: J17YF7	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.8 SDG J00252

SDG J00252 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00252	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17XL3, J17XL4, J17XL5, J17YV0, J17YW3, J17YW4, J17YW5, J17YW7			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/8/2008	**Sample Analysis Date:** 12/8/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J17YW3	No	Cr+6 = 36.95%	J	Qualify positive and non-detect results as estimated (J)	Impacts to all samples.
Lab Duplicates Sample ID: J17YW3	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.9 SDG J00253

Validated by ELR - Included in Appendix F

B.10 SDG J00254

SDG J00254 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00254	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18039, J18040, J18041, J180B4, J180C0			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/9/2008	**Sample Analysis Date:** 12/9/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18041	Yes	None	-	No Action	
Lab Duplicates Sample ID: J18041	No	RPD = 123.3%	J	Qualify positive results as estimated (J)	Impacts to J18040, J180B4.
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.11 SDG J00256

SDG J00256 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00256	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VR4, J180B2, J180B3, J180B5, J180B6, J180B7, J180B8, J180C1			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/9/2008	**Sample Analysis Date:** 12/11/2008

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	No	Samples exceeded holding time (2x).	J	Qualify results as estimated (J).	Impacts to all samples
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J180B3	No	Cr+6 = 34.32%	J	Qualify positive and non-detect results as estimated (J)	Impacts to all samples
Lab Duplicates Sample ID: J180B3	Yes	None	-	No Action	
Field Duplicate Sample ID: J180B7/ J17VR4	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.12 SDG J00257

SDG J00257 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00257	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17XP9, J18048, J18049, J18050, J180J0, J180J1, J180J2, J180N5, J180N6, J180N7			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/10/2008	**Sample Analysis Date:** 12/12/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples exceeded holding time (2x).	J	Qualify results as estimated (J).	Impacts to all samples
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	Yes
Matrix Spikes Sample ID: J180N6	Yes	None	-	No Action	Yes
Lab Duplicates Sample ID: J180N6	Yes	None	-	No Action	Yes
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.13 SDG J00258

SDG J00258 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00258	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** Hexavalent Chromium
Samples: J180P5, J180P6, J180P8, J180P9, J180R5, J180R8, J180R9		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/10/2008	**Sample Analysis Date:** 12/12/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples exceeded holding time (2x).	J	Qualify results as estimated (J).	Impacts to all samples
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J180P6	No	Cr+6 = 33.68%	J	Qualify all positive and non-detect results as estimated (J)	Impacts to all samples
Lab Duplicates Sample ID: J180P6	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.14 SDG J00259

SDG J00259 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00259	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VR3, J180L0, J180L1, J180L2, J180L3, J180L4, J180L5, J180L6, J180L7, J180L8, J180L9			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/11/2008	**Sample Analysis Date:** 12/15/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples exceeded holding time (>2x).	R	Qualify non-detect results as rejected (R).	Impacts to all samples
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J180L1	No	Cr+6 = 10.57%	R	Qualify non-detect results as rejected (R).	Impacts to all samples
Lab Duplicates Sample ID: J180L1	Yes	None	-	No Action	
Field Duplicate Sample ID: J180L6/ J17VR3	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	No	Holding Time and Matrix Spike	R	Samples rejected based on matrix spike results and holding time was greater than 2x the requirement.	Impacts to all samples
Additional Notes:					

B.15 SDG J00262

SDG J00262 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00262	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VR5, J180V0, J180V1, J180V2, J180V3, J180V4			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/11/2008	**Sample Analysis Date:** 12/15/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples exceeded holding time (>2x).	R	Qualify non-detect results as rejected (R).	Impacts to all samples
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J180V3	No	Cr+6 = 58.86%	J	Qualify positive and non-detect results as estimated (J).	Impacts to all samples
Lab Duplicates Sample ID: J180V3	Yes	None	-	No Action	
Field Duplicate Sample ID: J180V1/ J17VR5	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	No	Holding Time	R	Samples rejected because holding time was greater than 2x the requirement.	Impacts to all samples
Additional Notes:					

B.16 SDG J00263

SDG J00263 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00263	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J180X6, J180X7, J18169, J18170, J18171			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 12/12/2008	**Sample Analysis Date:** 12/17/2008

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples exceeded holding time (>2x).	J/R	Qualify positive results as estimated (J) and non-detect results as rejected (R).	Impacts to all samples. Samples J180X6, J18169, J18171 qualified as estimated J, and samples J180X7, J18170 rejected (R).
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18169	Yes	None	-	No Action	Impacts to all samples
Lab Duplicates Sample ID: J18169	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No	Holding Time	R	Samples rejected because holding time was greater than 2x the requirement.	Impacts to all samples
Additional Notes:					

B.17 SDG J00319

SDG J00319 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00319	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17XT5, J17XT8, J17XT9, J180X0, J180X1, J18178, J18179, J18180			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 2/2/2009	**Sample Analysis Date:** 2/3/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18180	No	Cr+ = 55.96%	J	Qualify positive and non-detect results as estimated (J)	Impacts to all samples
Laboratory Duplicates Sample ID: J18180	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.18 SDG J00322

Validated by ELR - Included in Appendix F

B.19 SDG J00325

SDG J00325 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00325	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18938, J18939, J18940, J18941, J18942, J18943, J18944, J18945, J18946, J18947			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 2/6/2009	**Sample Analysis Date:** 2/6/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18946	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J18946	Yes	None	-	No Action	
Field Duplicates	Not Collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.20 SDG J00327

SDG J00327 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00327	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J188H6, J188H7, J188H8, J188H9, J188J0, J188J1, J188J2, J188K8			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 2/9/2009	**Sample Analysis Date:** 2/9/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J188H6	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J188H6	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.21 SDG J00330

SDG J00330 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00330	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J17VT0, J188K5, J188K6, J188K7, J188L1, J188L2, J188L4			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** KAM	**Sample Collection Date:** 2/9/2009	**Sample Analysis Date:** 2/10/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J188K5	No	Cr+ = 54.49%	J	Qualify positive and non-detect results as estimated (J)	Impacts to all samples
Laboratory Duplicates Sample ID: J188K5	Yes	None	-	No Action	
Field Duplicates Sample IDs: J188K5/ J17VT0	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.22 SDG J00333

SDG J00333 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00333	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J186F3, J186F4, J186F5, J186F6, J186H2			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/10/2009	**Sample Analysis Date:** 2/10/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J186F3	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J186F3	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample ID: J18628	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Sample J18628 is a duplicate that was collected for sample J186F4. Sample J18628 was analyzed with SDG J00334.					

B.23 SDG J00334

SDG J00334 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00334	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18615, J18628, J186Y2, J186Y3, J186Y6, J18712			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/10/2009	**Sample Analysis Date:** 2/11/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J186Y2	No	Cr+6 = 4.8%	J/R	Qualify positive results as estimated (J) and ND result as rejected (R).	All samples. All samples are ND for hex chromium so all are rejected.
Laboratory Duplicates Sample ID: J186Y2	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample IDs: J186Y2/ J18615 J18628	Yes	None, both non-detect	-	No Action	
QC Summary					
Validity of Data	No	Matrix Spike	R	Samples were rejected based on matrix spike results.	Impacts to all samples
Additional Notes:					

B.24 SDG J00335

SDG J00335 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00335	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18616, J18773, J18774, J18776, J187F3			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/11/2009	**Sample Analysis Date:** 2/12/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J187F3	No	Cr+6 = 63.54%	J	Qualify non-detect results as estimated (J).	Impacts to all samples
Laboratory Duplicates Sample ID: J187F3	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample IDs: J187F3/J18616	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.25 SDG J00337

Validated by ELR - Included in Appendix F

B.26 SDG J00338

SDG J00338 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00338	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18781, J187F6, J187F7, J187F9, J187L1, J187L2, J187L3, J187L4, J187L5, J18800, J18803			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/12/2009	**Sample Analysis Date:** 2/13/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18800	No	Cr+6 = 54%	J	Qualify positive and non-detect results as estimated (J).	Impacts to all samples
Laboratory Duplicates Sample ID: J18800	Yes	None, both non-detect	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.27 SDG J00339

SDG J00339 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00339	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18624, J188D4, J18914, J18915, J18916, J18917, J18918, J18919, J18920, J18921, J18922, J18923, J18924, J18925			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/13/2009	**Sample Analysis Date:** 2/13/2009

Laboratory Duplicates Sample ID: J18914	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample IDs: J18916/ J18624 J18923/ J18924	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.28 SDG J00340

SDG J00340 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00340	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** Hexavalent Chromium
Samples: J18630, J187Y9, J187P3, J187P4, J187X2, J187T3, J187T1, J187T2, J187T0, J18801, J18802, J18804, J18805, J18806, J187R5, J187R6, J187R7, J187R8, J187R9		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/16/2009	**Sample Analysis Date:** 2/17/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J187R7	No	Cr+6 = 40%	J	Qualify non-detect results as estimated (J).	Impacts to all samples
Laboratory Duplicates Sample ID: J187R7	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample IDs: J187Y9/ J18630	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

B.29 SDG J00342

SDG J00342 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00342	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18858, J18XP4, J18XP5, J18XP6, J18854, J18855, J18856, J18857, J18859, J18860, J188F3, J188F4, J18861, J18862, J18623, J18874, J18875, J18817, J18818, J18819			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/17/2009	**Sample Analysis Date:** 2/18/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J18858	No	Cr+6 = 25.31%	J/R	Qualify positive results as estimated (J) and non-detect results as rejected (R).	Impacts to all samples. Samples J18862 & J18874 qualified as estimated (J), and remaining samples rejected (R).
Laboratory Duplicates Sample ID: J18858	Yes	None, both non-detect	-	No Action	
Field Duplicates Sample IDs: J18874/J18623	No	Sample result is greater than 2x the RDL.	-	No Action based on guidance	
QC Summary					
Validity of Data	No	Matrix Spike	R	Some samples were rejected based on matrix spike results.	Impacts to all samples
Additional Notes:					

B.30 SDG J00343

SDG J00343 - Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00343	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** Hexavalent Chromium	
Samples: J18820, J18830, J18831, J18832, J18877			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/3/2010 **Complete By:** LEM	**Sample Collection Date:** 2/17/2009	**Sample Analysis Date:** 2/18/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples

Detection Limits	Yes	None	-	No action	
Blanks					
Method Blanks	Yes	None	-	No action	
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spike – C_{14}	No	No MS was analyzed	J	Qualify positive and ND sample results as estimated (J).	All samples.
Tracer Results	Yes	None	-	No action	
Lab Duplicates Sample ID:J185Y9	Yes	None	-	No action.	
Field Duplicate Sample ID:J185Y9/J186X2	Yes	None	-	No action	
QC Summary					
Validity of Data	Not all QC parameters were met, but no data were rejected.				
Additional Notes:					

SDG K1537 - DRO QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1537	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** DRO	
Samples: J18612			
Laboratory: Lionville	**Date Validation Completed:** 02/20/2010 **Complete By:** RDD	**Sample collection:** 02/10/2009	**Sample Analysis Date:** 02/18/2009 extr 02/27/2009 anal

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Surrogates	Yes	None	-	No action.	
Blanks					
Method Blank	No	DRO = 8650 mg/kg Motor oil = 16900 mg/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND (UJ).	All samples. Impacts include: Motor Oil – All samples
Equipment Blank Sample ID:	Not collected				
Other QC					
LCS Results	No	DRO = 60%	J	Qualify positive and ND sample results as estimated (J).	All samples.
Matrix Spikes Sample ID: J18612	Yes	None	-	No action	
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Not all QC criteria were met but no data were rejected.				
Additional Notes: Blank results indicate potential false positive motor oil results.					

SDG K1537 - TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1537	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** TOC	
Samples: J185Y9, J186D3, J186D4, J186D5, J186D6, J186F2, J186X2, J186X3, J186X6, J18612, J18702			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/22/2010 **Complete By:** RDD	**Sample Collection Date:** 02/10/2009	**Sample Analysis Date:**02/23/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action.	
Detection Limit	Yes	None	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J188F3	Yes	None	-	No action	
Lab Duplicate Sample ID: J186D3	Yes	None	-	No action	
Field Duplicate Sample ID: J185Y9/J186X2	No	RPD = 41%	-	No action taken based on criteria in guidance.	
QC Summary					
Validity of Data	Not all QC met but no data were rejected.				
Additional Notes: Field duplicate results indicate potential heterogeneous concentrations of TOC in the sediment matrix.					

B.68 SDG K1539

SDG K1539 - VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1539	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** VOA	
Samples: J18600, J18671, J187D3			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** RDD	**Sample Collection Date:**	**Sample Analysis Date:** 02/15/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Detection limit for 1,1,1-trichloroethane exceeds limit in work plan	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Trip Blank Sample ID:J18671	Yes	None	-	No action	
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID:J187D3	No	2-Butanone =230%/202% Acetone = 230%/213%	-	Qualify positive sample concentrations as estimated (J).	All samples. No impacts since all samples are ND for these compounds.
Lab Duplicates	Not analyzed				
Field Duplicates Sample ID:J18600/ J187D3	Yes	None	-	No action	
Summary					
Validity of Data	Not all QC criteria were met but none of the data were rejected.				
Additional Notes:					

SDG K1539 - SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1539	**W&C Project No.:**222007
Medium: Sediments			**Analytes:** SVOCs
Samples: J18600, J187D3			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** RDD	**Sample Collection Date:** 02/11/2009	**Sample Analysis Date:** 02/24/2009 extr 03/01/2009 anal

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Hexachlorobenzene, 2-chloroaniline, 2-nitroaniline, 2,4-dinitrophenol, 4-nitrophenol, 4-nitroaniline, pentachlorophenol, 3,3'-dichlorobenzidine have RDLs that exceed those specified in work plan.	-	No action	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	Nitrobenzene = 46% Isophorone =45% 2-Nitrophenol =47% 2,4-Dimethylphenol =42% 1,2,4-Trichlorobenzene =48% 4-Chloroaniline =49% Hexachlorocyclopentadiene = 26% 2,4-Dinitrophenol = 32% Pyrene =44%	J	Qualify positive and ND sample results as estimated (J).	All samples.
Matrix Spikes Sample ID:J18600	No	**Non-compliant Recoveries** 1,3-Dichlorobenzene =48%/71% 1,4-Dichlorobenzene =48%/71% Hexachloroethane = 44%/67%	J	Qualify positive and ND sample results of all SVOA compounds as	All samples.

Medium: Sediments		**Analytes:** DRO (1 of 2)	
Samples: J18807, J18808, J18809, J18810, J18827, J18864, J18865, J18607			
Laboratory: Lionville	**Date Validation Completed:** 02/25/2010 **Complete By:** JR	**Sample collection:** 02/17/2009	**Sample Extraction Date:** 02/27/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Surrogates	Yes	None	-	No action	
Blanks					
Method Blank	No	Motor Oil = 13600 ug/kg	-	Qualify positive results less than 5X blank concentration as non-detected estimated (UJ)	No impacts since all results are greater than 5X blank concentration
Equipment Blank Sample ID:	Not collected				
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18807	No	DRO = 134%/56%; RPD = 81	J	Qualify positive and non-detected results as estimated (J)	Impacts the following samples: DRO – All samples
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicate Sample ID: J18607/J18864	Yes	None	-	No action	
QC Summary					
Validity of Data	Yes, no data were rejected				
Additional Notes: NOTE: All sample results were reported on a wet weight basis.					

SDG K1542 - DRO QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1542	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** DRO (2 of 2)	
Samples: J18902, J18903, J18904, J18905, J18906, J18608, J18614, J187Y1, J187P1, J187P5, J187P6, J187P7, J187P8, J187Y3			
Laboratory: Lionville	**Date Validation Completed:** 02/26/2010 **Complete By:** JR	**Sample collection:** 02/13/2009 – 02/16/2009	**Sample Extraction Date:** 02/25/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Surrogates	No	p-Terphenyl = 131%	J	Qualify positive detections in associated sample as estimated (J)	Impacts the following results: Motor Oil – J187Y3
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18902	No	DRO RPD = 44	J	Qualify positive and non-detected results as estimated (J)	Impacts the following samples: DRO – All samples
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicate Sample ID: J18614/J187Y1 J18608/J18904	 Yes Yes	 None None	 - -	 No action No action	
QC Summary					
Validity of Data	Yes, no data were rejected				
Additional Notes: NOTE: All sample results were reported on a wet weight basis.					

SDG K1542 - TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1542	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** TOC (1 of 2)
Samples: J18807, J18808, J18809, J18810, J18827, J18828, J18829, J18844, J18845, J18846, J18847, J18848, J18849, J18850, J18851, J18852, J18864, J18865, J18867, J17XP1, J17XP2, J17XP3, J18607, J188F0, J188F1		

Laboratory: Lionville	**Date Data Assessment Completed:** 02/25/2010 **Complete By:** JR	**Sample Collection Date:** 02/17/2009	**Sample Analysis Date:** 03/13/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limit	Yes	None	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Other QC					
LCS Results	Yes	None	-	No action

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
		differences:			
J18608/J18904	No	TOC RPD = 134	-	No action based on guidance	
J18911/J18912	No	TOC Difference >2RL; TOC reported at 746440 ug/kg in J18911, but reported non-detected (RL = 20000 ug/kg) in J18912	-	No action based on guidance	
QC Summary					
Validity of Data	Yes; no data were rejected				
Additional Notes:					

B.71 SDG K1543

SDG K1543 - VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** VOA	
Samples: J18677, J18684, J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** JR	**Sample Collection Date:** 02/18/2009	**Sample Analysis Date:** 02/24/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	1,1,1-Trichloroethane had reporting limit above that referenced in the work plan	-	No action based on criteria in references	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Trip Blank Sample ID: J18684	No	Acetone = 5.35 ug/kg; Methylene Chloride = 4.46 ug/kg		No action based on guidance	
J18677	No	Acetone = 6.21 ug/kg; Methylene Chloride = 4.92 ug/kg		No action based on guidance	
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	Acetone = 178%/170% 2-Butanone = 178%/173% 2-Hexanone = 163%/151%	-	Qualify positive results as estimated (J)	All samples; no qualifiers needed since all results for acetone, 2-butanone, and 2-hexanone are non-detected in all samples

SDG K1543 - VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** VOA
Samples: J18677, J18684, J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7		

Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** JR	**Sample Collection Date:** 02/18/2009	**Sample Analysis Date:** 02/24/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Matrix Spikes Sample ID: J189D7	Yes	None	-	No action	
Lab Duplicates	Not analyzed				
Field Duplicates Sample ID:	Not collected				
Summary					
Validity of Data	No, but no data were rejected				

Additional Notes:
NOTE: All sample results were reported on a wet weight basis. Note also VOC results were not found in the electronic data file; re-issued data file received 03/02/2010.

SDG K1543 - SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** SVOCs
Samples: J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7		

Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** JR	**Sample Collection Date:** 02/18/2009	**Sample Extraction Date:** 03/01/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	2,4-Dintrophenol; 2-Nitroaniline; 3-Nitroaniline; 4-Nitroaniline; 4-Nitrophenol; Pentachlorophenol; Hexachlorobenzene; and 3,3'-Dichlorobenzidine all had reporting limits above those specified in the work plan; see also NOTE (1) below	-	No action based on guidance	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	2,4-Dimethylphenol = 49% 4-Chloroaniline = 35% Hexachlorocyclopentadiene = 14% 2,4,6-Trichlorophenol = 33% 2,4-Dinitrophenol = 43% Pentachlorophenol = 35%	J	Qualify positive and non-detected results as estimated (J)	All samples
Matrix Spikes Sample ID: J18884	No	4-Chloroaniline = 26%/34% Hexachlorocyclopentadiene = 31%/20% Pentachlorophenol = 0%/0% 3,3'-Dichlorobenzidine =	J	Qualify positive and non-detected results as estimated	All samples

SDG K1543 - SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007
Medium: Sediment		**Analytes:** SVOCs
Samples: J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7		

Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** JR	**Sample Collection Date:** 02/18/2009	**Sample Extraction Date:** 03/01/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
		37%/39%		(J)	
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicates Sample ID:	Not collected				
Summary					
Validity of Data	No, but no data were rejected				

Additional Notes:
(1) NOTE: All sample results were reported on a wet weight basis. Samples J18965, J18966, and J188B9 were analyzed at two-fold dilutions due to matrix interference; samples J18884, J18885, J18977, J188B8, J188C0, J188C1, and J189D7 were analyzed at three-fold dilutions due to matrix interference. Reporting limits are elevated by a factor of two or three as applicable.

SDG K1543 - PCB QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007	
Medium: Sediment		**Analytes:** PCBs	
Samples: J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/19/2010 **Complete By:** JR	**Sample Collection Date:** 02/18/2009	**Sample Extraction Date:** 02/28/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18884	Yes	None	-	No action	
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicates Sample ID:	Not collected				
Summary					
Validity of Data	Yes			No data were rejected	
Additional Notes: (1) NOTE: All sample results were reported on a wet weight basis.					

SDG K1543 - Pesticides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1543	**W&C Project No.:**222007
Medium: Sediments	**Analytes:** Pesticides	
Samples: J18884, J18885, J18886, J18887, J18965, J18966, J18977, J188B2, J188B8, J188B9, J188C0, J188C1, J189D6, J189D7		

Laboratory: Lionville	**Date Data Assessment Completed:** **Complete By:** JR	**Sample Collection Date:** 2/18/2009	**Sample Analysis Date:** 3/20-21/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None; see also NOTE (1) below	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	No LCS results for toxaphene	J	Qualify all associated results as estimated (J)	Impacts to all samples above.
Matrix Spikes Sample ID: J18884	Yes	None	-	No action	
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No, but no data were rejected				

Additional Notes:
(1) NOTE: All sample results were reported on a wet weight basis. All samples except J189D7 were analyzed at four-fold dilutions due to matrix interference; sample J189D7 was analyzed at a ten-fold dilution due to matrix interference. Reporting limits are elevated by a factor of four or ten as applicable.

SDG K1543 - Metals QC Summary Sheet

SDG K1580 - SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1580	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** SVOCs	
Samples: J18ML6, J18MM9, J18MR6, J18MT9, J18LF4			
Laboratory: Lionville	**Date Data Assessment Completed:** 02/24/2010 **Complete By:** RDD	**Sample Collection Date:** 03/30/2009 and 04/02/2009	**Sample Analysis Date:** 04/06/2009 extr; 04/23/2009 anal; 05/1,4-5/2009 anal

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Sample ID :					
Field Duplicates Sample ID:	Not collected				
Summary					
Validity of Data	Some data were rejected due to surrogate recoveries	1 acid fraction and 1 BN fraction have surrogate recoveries < 10%	R	Results for sample J18MR6 rejected	J18MR6

Additional Notes: 1. Recovery of 2,4,6-tribromophenol surrogate was < 10% for the equipment blank, J18LF4. 2. Surrogates used for SVOA analysis did not match those contained in guidance, therefore the association of compounds to each surrogate could not be made. Professional judgment was used in decision to reject data for this sample.

SDG K1580 - PCB QC Summary Sheet

Matrix Spikes Sample ID: J17V94	Yes	None	-	No action	
Lab Duplicates Sample ID:	Not analyzed				
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No, but none of the data rejected.			No data were rejected.	
Additional Notes: Sample tracking sheet indicates that the only sample in SDG K1667, J18X60, is an equipment blank.					

APPENDIX C

SOIL DATA QUALITY ASSESSMENT WORKSHEETS

TABLE OF CONTENTS

APPENDIX C
SOIL DATA QUALITY ASSESSMENT WORKSHEETS

C.1 SDG K1551

SDG K1551 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs	
Samples: J189X0**,** J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/10/2009 extr; 03/17/2009 anal; 03/19/2009 anal

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Hexachlorobenzene, 2-chloroaniline, 2-nitroaniline, 2,4-dinitrophenol, 4-nitrophenol, 4-nitroaniline, pentachlorophenol, 3,3’-dichlorobenzidine have RDLs that exceed those specified in work plan.	-	No action	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:J18HY5	Yes	None			
Other QC					
Surrogate Recoveries	No	J189X4, J189X5 2,4,6-tribromophenol = 0%	R	Qualify ND sample results of associated compounds as rejected.	J189X4, J189X5 Associated compounds: 2,4-dichlorophenol, 2,4,6-trichlorophenol, 2,4,5-trichlorophenol, pentachlorophenol, bis(2-chloroethyl)ether, bis(2-chloroisopropyl)ether, bis(2-chloroeithoxy)methane, 4-chlorophenyl phenyl ether, 4-bromophenyl phenyl ether
LCS Results	Yes	None	-	No action.	

SDG K1551 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs	
Samples: J189X0**,** J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/10/2009 extr; 03/17/2009 anal; 03/19/2009 anal

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Matrix Spikes Sample ID:J189X0	No	**Non-Compliant Recoveries** 4-Chloroaniline= 52%/24% 4-Nitrophenol = 0%/0% Pentachlorophenol = 0%/0% 3,3'-Dichlorbenzidine = 0%/0% 2,4,5-Trichlorophenol = 119%/161% **Non-Compliant RPDs** 1,3-Dichlorobenzene = 39% 1,4-Dichlorobenzene = 34% Hexachloroethane = 39% 4-Chloroaniline = 44% Hexachlorocyclopenadiene =31% 2,4-Dinitrophenol = 35% 3,3'-Dichlorbenzidine = 50%	J	Qualify positive and ND sample results as estimated (J)	All samples
Lab Duplicates Sample ID:	None analyzed				
Field Duplicates Sample ID:	Yes	None	-	No action	
Summary					
Validity of Data	Not all QC met, but no data were rejected.				
Additional Notes: Dry weight results.					

SDG K1551 – PCB QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007
Medium: Sediments		**Analytes:** PCBs
Samples: J189X0, J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5		

Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/10/2009 extr 03/18/2009 anal

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID: J18HY5	Yes	None			
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID:J189X0	Yes	None	-	No action	
Lab Duplicates Sample ID:	None analyzed				
Field Duplicates Sample ID:	None collected				
Summary					
Validity of Data	All QC parameters were met.				
Additional Notes:					

SDG K1551 – Pesticides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007
Medium: Sediments		**Analytes:** Pesticides
Samples: : J189X0, J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5		

Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/10/2009 extr; 03/18/2009 anal; 03/19/2009 anal

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	RDLs for Endosulfan I, gamma BHC, heptachlor, and heptachlor epoxide exceed specified levels in work plan.	-	No action	
Blanks					
Method Blank	No	Beta BHC = 1.23 ug/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND.	All samples. No impacts since all samples ND for this compound.
Equipment Blank Sample ID: J18HY5	Yes	None			
Other QC Results					
Surrogate Recoveries	No	J189X1 DCB surr recovery > UCL	J	Qualify positive sample results as estimated (J).	J189X1 Impacts detection of Endosulfan II
LCS Results	No	No LCS results for toxaphene	J	Qualify all associated results as estimated (J)	Impacts to all samples above.
Matrix Spikes Sample ID:J189X0	No	Methoxychlor = 184%/192% 4,4'-DDD = 144%/157%	J	Qualify positive sample results as estimated (J).	All samples. Methoxychlor – J189X6 4,4'-DDD - None
Lab Duplicates	None analyzed				
Field Duplicate Sample ID:	None collected	None			
QC Summary					
Validity of Data	No all QC parameters were met, but no data were rejected.				
Additional Notes: Dry weight results.					

SDG K1551 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007	
Medium: Sediments		**Analytes:** Metals	
Samples: J189X0, J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/05/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/19/2009 Hg; 03/24/2009 others; 03/25/2009 others

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Ca, Fe, P, Zn detection limits exceed specifications in work plan	-	No action	
Blanks					
Preparation Blank	No	Be = 0.00503 mg/kg Mo = 0.102 mg/kg Ni = 0.549 mg/kg Sn = 1.02 mg/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND (UJ).	All samples. Impacts to the following samples: Be – J18HY5 Mo –J18HY5, J189X1, J189X3, J189X8 Ni –J18HY5 Sn –J18HY5, J189X5
Equipment Blank Sample ID:J18HY5	No	Al = 176 mg/kg Ba = 1.65 mg/kg Be = 0.0232 mg/kg Ca = 34.4 mg/kg Cr = 0.239 mg/kg Co = 0.047 mg/kg Fe = 191 mg/kg Mg = 23.4 mg/kg Mn = 3.19 mg/kg Mo = 0.0959 mg/kg Ni = 0.455 mg/kg K = 37.7 mg/kg Si=121 mg/kg Sr = 0.478 mg/kg Sn = 0.956 mg/kg Ti = 5.28 mg/kg V = 0.316 mg/kg	-	No action based on guidance.	
Other QC Results					
LCS Results	No	Sb = 189% As = 191% V = 165%	J	Qualify positive sample results as estimated (J).	All samples with the following impacts: Sb –J189X9 As – All samples except J18HY5 V – All samples
Matrix Spikes Sample ID: J189X0	Yes	Sb = 32%	J	Qualify positive and ND sample results as	All samples.

SDG K1551 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007
Medium: Sediments		**Analytes:** Metals
Samples: J189X0, J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5		

Laboratory: Lionville	**Date Data Assessment Completed:** 03/05/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** 03/19/2009 Hg; 03/24/2009 others; 03/25/2009 others

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
				estimated (J).	
Lab Duplicates Sample ID:J189X0	Yes	None	-	None	.
Field Duplicate Sample ID:	None collected		-		
QC Summary					
Validity of Data	Not all QC met but none of the data were rejected.				
Additional Notes: No action taken with respect to Tl LCS result of 0% recovery, since spike level is just above the IDL.					

SDG K1551 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** Gamma scan, C_{14}, Sr_{90}, Tc_{99}, and Isotopic Th, U, Pu, Tr.	
Samples: J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18JC0			
Laboratory: Eberline	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 02/26/2009	**Sample Analysis Date:** several

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Method Blanks	Yes	None	-	No action	
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spike – C_{14} and tritium	No	No MS was analyzed	J	Qualify positive and ND sample results as estimated (J).	All samples for C_{14} and tritium
Tracer Results	Yes	None	-	No action	
Lab Duplicates Sample ID:J189X0	Yes	None	-	No action.	
Field Duplicate Sample ID:	Yes	None	-	No action	
QC Summary					
Validity of Data	Not all QC parameters were met, but no data were rejected.				
Additional Notes:					

SDG K1551 – DRO QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007
Medium: Sediments		**Analytes:** DRO
Samples: J18HY5		

Laboratory: Lionville	**Date Validation Completed:** 03/05/2010 **Complete By:** RDD	**Sample collection:** 02/25/2009	**Sample Analysis Date:** 03/11/2009 extr 03/24/2009 anal

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Surrogates	Yes	None	-	No action.	
Blanks					
Method Blank	No	Motor oil = 4710 mg/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND (UJ).	All samples. Impacts include: Motor Oil – All samples
Equipment Blank Sample ID:J18HY5	No				
Other QC					
LCS Results	Yes	None	-		
Matrix Spikes Sample ID: J18612	Yes	None	-	No action	
Lab Duplicates Sample ID:	None analyzed				
Field Duplicate Sample ID:	None collected		-		
QC Summary					
Validity of Data	Not all QC criteria were met but no data were rejected.				
Additional Notes: This is an equipment blank – associated samples not known.					

SDG K1551 – TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1551	**W&C Project No.:**222007
Medium: Soil		**Analytes:** TOC
Samples: J189X0, J189X1, J189X2, J189X3, J189X4, J189X5, J189X6, J189X7, J189X8, J189X9, J18HY5		

Laboratory: Lionville	**Date Data Assessment Completed:** 03/05/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 2/26/2009	**Sample Analysis Date:** 03/19/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action.	
Detection Limit	Yes	None	-	No action	
Blanks					
Method Blank	No	TOC = 6.93 mg/kg	-	Qualify positive results < 5x the blank concentration as ND (UJ).	All samples. No impact since all sample concentrations much greater than 5X blank concentration.
Equipment Blank Sample ID: J18HY5	Yes	None	-	No action	
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J188F3	Yes	None	-	No action	
Lab Duplicate Sample ID: J189X2	Yes	None	-	No action	
Field Duplicate Sample ID:	None collected				
QC Summary					
Validity of Data	Not all QC met but no data were rejected.				
Additional Notes:					

C.2 SDG K1554

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1554	**W&C Project No.:**222007
Medium: Soil			**Analytes:** SVOCs (1 of 3)
Samples: J18B00, J18B01, J18B02, J18B03, J18B47, J18B48, J18B49, J18B50			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/02/2010 **Complete By:** RDD	**Sample Collection Date:** 02/27/2009 – 03/02/2009	**Sample Extraction Date:** 03/08/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	2,4-Dintrophenol; 2-Nitroaniline; 3-Nitroaniline; 4-Nitroaniline; 4-Nitrophenol; Pentachlorophenol; Hexachlorobenzene; and 3,3'-Dichlorobenzidine all had reporting limits above those specified in the work plan; see also NOTE (1) below	-	No action based on criteria in references	
Blanks					
Method Blanks	No	Bis(2-Ethylhexyl)phthalate (BEHP) = 106 ug/kg	UJ	Qualify positive results less than ten times the blank concentration as non-detected estimated (UJ)	Impacts the following samples: BEHP - J18B01, J18B03, J18B47, J18B48
Equipment Blank Sample ID:	None analyzed				
Other QC					
Surrogate Recoveries	No	Terphenyl-d14 = -3%	J/R	Qualify positive results associated with terphenyl-d14 as estimated (J); qualify non-detected results as rejected (R)	Impacts the following sample: J18B48 Affected analytes: naphthalene, acenaphthylene, acenaphthene, fluorene, phenanthrene, anthracene, fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene,

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs (1 of 3)	
Samples: J18B00, J18B01, J18B02, J18B03, J18B47, J18B48, J18B49, J18B50			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/02/2010 **Complete By:** RDD	**Sample Collection Date:** 02/27/2009 – 03/02/2009	**Sample Extraction Date:** 03/08/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
					benzo(k)fluoranthene, benzo(a)pyrene, indeno(1,2,3-c,d)pyrene, benzo(g,h,i)perylene
LCS Results	No	**Non-compliant recoveries:** Dibenz(a,h)anthracene = 151% Hexachlorobenzene = 198% Pentachlorophenol = 47%	J	Qualify positive results for dibenz(a,h)-anthracene and hexachlorobenzene as estimated (J); qualify positive and non-detected results for pentachlorophenol as estimated (J)	Impacts the following samples: Dibenz(a,h)anthracene, hexachlorobenzene – None; all sample results non-detected Pentachlorophenol -All samples
Matrix Spikes Sample ID: J18B48	No	**Non-compliant recoveries:** 1,3-Dichlorobenzene = 48% 1,4-Dichlorobenzene = 49% Hexachloroethane = 49%/42% 4-Chloroaniline = 45%/43% Hexachlorocyclopentadiene = 48%/37% Pentachlorophenol = 15%/19% 2-Nitrophenol = 49% Bis(2-chloroethyl)ether = 47% Bis(2-chloroisopropyl)ether = 47% Isophorone = 45% Naphthalene = 49% Nitrobenzene = 45%	J	Qualify positive and non-detected results as estimated (J)	Impacts the following samples: All samples
Lab Duplicates Sample ID:	None analyzed				
Field Duplicates Sample ID:					

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs (1 of 3)	
Samples: J18B00, J18B01, J18B02, J18B03, J18B47, J18B48, J18B49, J18B50			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/02/2010 **Complete By:** RDD	**Sample Collection Date:** 02/27/2009 – 03/02/2009	**Sample Extraction Date:** 03/08/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
J18B00/J189W1	Yes	None	-	No action	
J18B49/J189W0	Yes	None	-	No action	
Summary					
Validity of Data	No	Data were rejected for the following analytes in sample J18B48: naphthalene, acenaphthylene, acenaphthene, fluorene, phenanthrene, anthracene, fluoranthene, pyrene, benzo(a)anthracene, chrysene, benzo(b)fluoranthene, benzo(k)fluoranthene, benzo(a)pyrene, indeno(1,2,3-c,d)pyrene, benzo(g,h,i)perylene			
Additional Notes: (1) NOTE: Sample results were reported on a dry weight basis. Sample J18B00 was analyzed at a two-fold dilution due to matrix interference; reporting limits are elevated by a factor of two for sample J18B00.					

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs (2 of 3)	
Samples: J18B57, J18B58, J18B59, J18B60, J18JC0-A, J189W0, J189W1, J189Y0, J189Y1			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 – 03/02/2009	**Sample Extraction Date:** 03/11/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	2,4-Dintrophenol; 2-Nitroaniline; 3-Nitroaniline; 4-Nitroaniline; 4-Nitrophenol; Pentachlorophenol; Hexachlorobenzene; and 3,3'-Dichlorobenzidine all had reporting limits above those specified in the work plan; see also NOTE (1) below	-	No action based on criteria in references	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:	None analyzed				
Other QC					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	**Non-compliant recoveries:** 1,2,4-Trichlorobenzene = 41% 1,3-Dichlorobenzene = 49% 2,4,5-Trichlorophenol = 6% 2,4,6-Trichlorophenol = 5% 2,4-Dichlorophenol = 24% 2,4-Dimethylphenol = 35% 2,4-Dinitrophenol = 41% 2-Methylnaphthalene = 46% 2-Nitrophenol = 33% 3,3'-Dichlorobenzidine = 21% 3-Nitroaniline = 30% 4-Chloro-3-methylphenol = 49%	J	Qualify positive and non-detected results for affected analytes as estimated (J)	Impacts the following samples: All samples

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007
Medium: Soil		**Analytes:** SVOCs (2 of 3)
Samples: J18B57, J18B58, J18B59, J18B60, J18JC0-A, J189W0, J189W1, J189Y0, J189Y1		

Laboratory: Lionville	**Date Data Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample Collection Date:** 02/25/2009 – 03/02/2009	**Sample Extraction Date:** 03/11/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
		4-Chloroaniline = 8% 4-Nitroaniline = 42% 4-Nitrophenol = 0% Hexachlorocyclopentadiene = 40% Isophorone = 44% Naphthalene = 46% Pentachlorophenol = 31% Pyrene = 48%			
Matrix Spikes Sample ID: J18B57	No	**Non-compliant recoveries:** 2,4-Dinitrophenol = 47%/49% 3,3'-Dichlorobenzidine = 46%/47% 4-Chloroaniline = 42%/36% Hexachlorocyclopentadiene = 31%/36% Hexachloroethane = 47% Pentachlorophenol = 21%/22%	J	Qualify positive and non-detected results for affected analytes as estimated (J)	Impacts the following samples: All samples
Lab Duplicates Sample ID:	None analyzed				
Field Duplicates Sample ID:					
J18B00/J189W1	Yes	None	-	No action	
J18B49/J189W0	Yes	None	-	No action	
Summary					
Validity of Data	No, but no data were rejected				

Additional Notes:
(1) NOTE: Sample results were reported on a dry weight basis. Sample J18JC0-A had a 2.0 mL final extract volume and was further diluted by a factor of 3X for analysis, resulting in an effective dilution of 6X; reporting limits are elevated by a factor of six for sample J18JC0-A. Samples J189W1 and J189Y0 were analyzed at two-fold dilutions due to matrix interference; reporting limits are elevated by a factor of two for samples J189W1 and J189Y0.

SDG K1554 – SVOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007	
Medium: Soil		**Analytes:** SVOCs (3 of 3)	
Samples: J189Y3			
Laboratory: Lionville	**Date Data Assessment Completed:** 03/04/2010 **Complete By:** RDD	**Sample Collection Date:** 03/02/2009	**Sample Extraction Date:** 03/11/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples

SDG K1554 – DRO QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007
Medium: Soil		**Analytes:** DRO (1 of 3)
Samples: J18B00, J18B01, J18B02, J18B03, J18B47, J18B48, J18B49, J18B50		

Laboratory: Lionville	**Date Assessment Completed:** 03/02/2010 **Complete By:** RDD	**Sample collection:** 02/27/2009 – 03/02/2009	**Sample Extraction Date:** 03/11/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Surrogates	Yes	None	-	No action	
Blanks					
Method Blank	No	Motor Oil = 4710 ug/kg	UJ	Qualify positive results less than 5X blank concentration as non-detected estimated (UJ)	Impacts the following samples: Motor Oil – J18B01, J18B02, J18B03, J18B47, J18B48, J18B49, J18B50
Equipment Blank Sample ID:	None analyzed				
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18B00	Yes	None	-	No action	
Lab Duplicates Sample ID:	None analyzed				
Field Duplicate Sample ID: J18B00/J189W1	No	RPDs or absolute differences between results are >2X RL for: Diesel and Motor oil	-	No action based on guidance	
J18B49/J189W0	No	Absolute difference between results is greater than 2X RL for: Motor Oil	-	No action based on guidance	
QC Summary					
Validity of Data	Yes, no data were rejected				
Additional Notes: NOTE: All sample results were reported on a dry weight basis.					

SDG K1554 – DRO QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1554	**W&C Project No.:**222007
Medium: Soil		**Analytes:** DRO (2 of 3)
Samples: J18B57, J18B58, J18B59, J18B60, J18JC0-A, J189W0, J189W1, J189Y0, J189Y1		

Laboratory: Lionville	**Date Assessment Completed:** 03/03/2010 **Complete By:** RDD	**Sample collection:** 02/25/2009 – 03/02/2009	**Sample Extraction Date:** 03/12/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Sample J18JC0-A extracted 1 day past HT	J	Qualify positive and non-detected results as estimated (J)	Impacts the following sample: J18JC0-A
Surrogates	Yes	None	-	No action	
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	None analyzed				
Other QC					
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J18B57	Yes	None	-	No action	
Lab Duplicates Sample ID:	None analyzed				
Field Duplicate Sample ID: J18B00/J189W1 J18B49/J189W0	No No	Refer to Summary for sample batch 1 of 3 for specifics			
QC Summary					
Validity of Data	No, but no data were rejected				

Additional Notes:
NOTE: All sample results were reported on a dry weight basis. Sample J18JC0-A was analyzed at a five-fold dilution due to matrix interference; the surrogate was reported as diluted out. DRO was reported non-detected in J18JC0-A, and the reporting limit is elevated (5X) as a result of the dilution.

SDG K1554 – DRO QC Summary Sheet

Samples: J192P4		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 4/7/2010 **Completed By:** LEM	**Sample Collection Date:** 7/30/2009	**Sample Analysis Date:** 7/31/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J192P4	No	Cr+6 = 22-25%	R	Qualify non-detect result as rejected (R) because recovery was <30%.	Impacts to sample J192P4
Laboratory Duplicates Sample ID: J192P4	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	No	Matrix Spike	R	Sample rejected based on matrix spike results	J192P4
Additional Notes: Sample was filtered, suspect matrix effects					

D.1.2 SDG J00560

SDG J00560 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00560	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Hexavalent Chromium	
Samples: J19510, J19511			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 2/10/2010 **Completed By:** LEM	**Sample Collection Date:** 8/23/2009	**Sample Analysis Date:** 8/23/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19510	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19510	Yes	None, both non-detect	-	No Action	
Field Duplicates	Not Collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.1.3 SDG J00561

SDG J00561 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00561	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Hexavalent Chromium	
Samples: J19513			
Laboratory: Test America, Richland, WA	**Date Data Evaluation Completed:** 2/10/2010 **Completed By:** LEM	**Sample Collection Date:** 8/20/2009	**Sample Analysis Date:** 8/21/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19513	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19513	Yes	None, both non-detect	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:

Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19519	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19519	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.1.7 SDG J00567

SDG J00567 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00567	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Hexavalent Chromium	
Samples: J19360, J19525, J19523, J19524			
Laboratory: Test America, Richland, WA	**Date Data Evaluation Completed:** 2/10/2010 **Completed By:** LEM	**Sample Collection Date:** 9/3/2009	**Sample Analysis Date:** 9/4/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19524	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19524	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.1.8 SDG J00570

SDG J00570 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00570	**W&C Project No.:**222007
Medium: Pore Water	**Analytes:** Total Uranium	
Samples: J193J0, J193J1, J193J2, J193J3, J193J4, J193P4, J193P5, J193P6, J193P7, J193P8, J193P9, J193R0, J193R2, J193R3, J19423, J19587, J19589		

Laboratory: TestAmerica	**Date Data Assessment Completed:** 2/24/2010 **Completed By:** KAM	**Sample Collection Date:** 8/24,25,27,28/2009, 9/1/2009	**Sample Analysis Date:** 9/21/2009

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	[1]				
Blanks					
Method Blanks	Yes	None	-	No Action	
Other QC Results					
LCS Results	Yes	None	-	No Action	
Tracer Results	[2]				
Matrix Spike Sample ID: J193P7	Yes	None	-	No Action	
Lab Duplicates Sample ID: J193P6	Yes	None	-	No Action	
Field Duplicate Sample ID: J19423[3]	Yes	None	-	No Action	J193J1, J193J2
QC Summary					
Validity of Data	Yes	No rejected results			

Additional Notes:
1 = The detection limit for Total Uranium is not identified in Table 3-1 of the SAP
2 = Tracer/Yield results not provided in data package
3 = According to Porewater Sample Tracking spreadsheet, duplicate sample J19423 is associated with two samples (J193J1 and J193J2)

D.1.9 SDG J00571

SDG J00571 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00571	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Total Uranium	
Samples: J19590, J19591, J19594			
Laboratory: TestAmerica	**Date Data Assessment Completed:** 2/24/2010 **Completed By:** KAM	**Sample Collection Date:** 9/2,8/2009	**Sample Analysis Date:** 9/21/2009

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	[1]				
Blanks					
Method Blanks	Yes	None	-	No Action	
Other QC Results					
LCS Results	Yes	None	-	No Action	
Tracer Results	[2]				
Matrix Spike Sample ID: J19591	Yes	None	-	No Action	
Lab Duplicates Sample ID: J19590	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes	No rejected results			

Additional Notes:
1 = The detection limit for Total Uranium is not identified in Table 3-1 of the SAP
2 = Tracer/Yield results not provided in data package

D.1.10 SDG J00572

SDG J00572 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00572	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Hexavalent Chromium	
Samples: J19522, J19361, J19362			
Laboratory: Test America, Richland, WA	**Date Data Evaluation Completed:** 2/10/2010 **Completed By:** LEM	**Sample Collection Date:** 9/10/2009	**Sample Analysis Date:** 9/11/2009

Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/19-22/2010	**Sample Analysis Date:** 3/10/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limit	Laboratory reporting limits not provided in SAP				
Method Blank	Yes	None	-	No Action	
Equipment Blank Sample IDs:	Not collected				
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K31	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19K31	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes; no data were qualified or rejected				
Additional Notes:					

SDG K1962 – Anions QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1962	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Bromide, Chloride, Fluoride, Nitrate, Nitrite, Orthophosphate, Sulfate	
Samples: J19K31, J19K32, J19K97, J19H08, J19K96, J19KW8			
Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/19-22/2010	**Sample Analysis Date:** 3/10/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Holding Time for nitrate, nitrite, and orthophosphate is 48 hours.	J/R	For holding times >2x criteria, qualify positive results as estimated (J) and ND results as rejected (R).	Impacts all samples for nitrate, nitrite, and orthophosphate J19K31, J19K97, J19K96, J19KW8: Nitrate = J applied Nitrite = R applied Phosphate = R applied J19K32: Nitrate = J applied Nitrite = J applied Phosphate = R applied J19H08: Nitrate = R applied Nitrite = R applied Phosphate = R applied
Detection Limit	Laboratory reporting limits not provided in SAP				
Method Blank	Yes	None	-	No Action	
Equipment Blank Sample IDs:	No collected				
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K96	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19K96	Yes	None	-	No Action	

SDG K1962 – Anions QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1962	**W&C Project No.:**222007
Medium: Pore Water		**Analytes:** Bromide, Chloride, Fluoride, Nitrate, Nitrite, Orthophosphate, Sulfate
Samples: J19K31, J19K32, J19K97, J19H08, J19K96, J19KW8		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/19-22/2010	**Sample Analysis Date:** 3/10/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	No	Holding Time for nitrate, nitrite, and orthophosphate were >2x criteria	R	ND results qualified as rejected	Impacts the following samples: Nitrate: J19H08 Nitrite: J19K31, J19K97, J19H08, J19K96, J19KW8 Orthophosphate: all samples
Additional Notes:					

D.1.116 SDGK1963

SDG 1963 – VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1963	**W&C Project No.:**222007
Medium: Pore Water	**Analytes:** VOA	
Samples: J19KW7		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/16/2010 **Complete By:** KAM	**Sample Collection Date:** 2/26/2010	**Sample Analysis Date:** 3/4/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Detection limit for $MeCl_2$ exceeds criteria in SAP	-	No action based on guidance	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank Sample ID:	Not Collected				
Trip Blank Sample ID:	Not Analyzed				
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	Yes	None	-	No action	
Matrix Spike/Matrix Spike Duplicate Sample ID: J19KW7	Yes	None	-	No action	
Field Duplicates Sample ID:	Not Collected				
Summary					
Validity of Data	All QC criteria met				
Additional Notes:					

SDG K1963 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1963	**W&C Project No.:**222007
Medium: Pore Water		**Analytes:** Metals
Samples: J19K33, J19K39, J19KW7, J19KX0, K19JP2, J19JF0, J19JF4, J19K95, J19KF0, J19KF1		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/16/2010 **Complete By:** KAM	**Sample Collection Date:** 2/26,27,28/2010	**Sample Analysis Date:** ICP – 3/19/2010 Hg – 3/13/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Preparation Blank	No	Manganese = 0.531 ug/L	-	No action since all results are >5x blank concentration	
Equipment Blank Sample ID:	Not Collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spike Sample ID: J19K39	Yes	None	-	No action	
Lab Duplicate Sample ID: J19K39	No	Aluminum = 37% Iron = 51% Manganese = 24% Zinc = 41%	-	No action since difference between initial and duplicate concentrations are <1x RDL	
Field Duplicate Sample ID:	Not Collected				
QC Summary					
Validity of Data	All QC criteria met				
Additional Notes:					

SDG K1963 – TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1963	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** TOC	
Samples: J19K33, J19KW7, J19JF0, J19KF0			
Laboratory: Lionville	**Date Data Assessment Completed:** 4/16/2010 **Complete By:** KAM	**Sample Collection Date:** 2/26,27,28/2010	**Sample Analysis Date:** 3/9/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limit	Yes	None	-	No action	
Method Blank	No	TOC = 0.19 mg/L	-	No action since all results are >5x blank concentration	
Equipment Blank Sample ID:	Not Collected				
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K33	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19K33	No	TOC RPD = 24.2%	-	No action since difference between results is <1x RDL	
Field Duplicate Sample ID:	Not Collected				
QC Summary					
Validity of Data	Not all QC criteria met, however no rejected results				
Additional Notes:					

SDG K1963 – Nitrate/Nitrite QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1963	**W&C Project No.:**222007	
Medium: Pore Water		**Analytes:** Nitrate/Nitrite as N	
Samples: J19K33, J19KW7, J19JF0, J19KF0			
Laboratory: Lionville	**Date Data Assessment Completed:** 4/16/2010 **Complete By:** KAM	**Sample Collection Date:** 2/26,27,28/2010	**Sample Analysis Date:** 3/10/2010

Medium: Surface Water - GW Upwelling				**Analytes:** Hexavalent Chromium	
Samples: J19JD2, J19HT1, J19HT3					
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 4/7/2010 **Completed By:** LEM		**Sample Collection Date:** 1/31/2010	**Sample Analysis Date:** 2/1/2010	

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample IDs: J19JD2, J19HT1, J19HT3	Yes	None	-	No Action	
Laboratory Duplicates Sample IDs: J19JD2, J19HT1, J19HT3	Yes	None	-	No Action	
Field Duplicates Sample IDs: J19HT1/ J19HT3	Yes	None	-	No Action	
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Three batches of QC samples were analyzed.					

D.2.15 SDG J00704

SDG J00704 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00704	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19F96, J19HX1		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/18/2010 **Completed By:** LEM	**Sample Collection Date:** 2/1/2010	**Sample Analysis Date:** 2/2/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Sample J19F96 exceeded holding time (<2x).	J	Qualify results as estimated (J).	Impacts to sample J19F96.
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19HX1	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19HX1	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.2.16 SDG J00711

SDG J00711 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00711	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19JV6, J19JV9		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/18/2010 **Completed By:** LEM	**Sample Collection Date:** 2/7/2010	**Sample Analysis Date:** 2/8/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JV6	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19JV6	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.2.17 SDG J00712

Validated by ELR - Included in Appendix F

D.2.18 SDG J00715

SDG J00715 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00715	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19JV7, J19JV8			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/6/2010	**Sample Analysis Date:** 2/7/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JV7, J19JV8	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19JV7, J19JV8	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Two batches of QC samples were analyzed.					

D.2.19 SDG J00718

SDG J00718 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00718	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19JW0		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/8/2010	**Sample Analysis Date:** 2/9/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JW0	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19JW0	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.2.20 SDG J00728

SDG J00728 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00728	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19J84, J19J87			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/13/2010	**Sample Analysis Date:** 2/14/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action

Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19J84, J19J87	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19J84, J19J87	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Two batches of QC samples were analyzed.					

D.2.21 SDG J00731

SDG J00731 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00731	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19K16, J19K17		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/12/2010	**Sample Analysis Date:** 2/13/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K16, J19K17	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19K16, J19K17	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Two batches of QC samples were analyzed.					

D.2.22 SDG J00735

SDG J00735 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00735	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19JN2, J19JN3			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/14/2010	**Sample Analysis Date:** 2/15/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JN2	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19JN2	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.2.23 SDG J00742

SDG J00742 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00742	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19H26, J19KC1			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/24/2010 **Completed By:** LEM	**Sample Collection Date:** 2/19/2010	**Sample Analysis Date:** 2/20/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected

Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JK4, J19JV5	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19JK4, J19JV5	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Two batches of QC samples were analyzed.					

D.2.28 SDG J00764

SDG J00764 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00764	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19KB9, J19KF5			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 4/7/2010 **Completed By:** LEM	**Sample Collection Date:** 2/28/2010	**Sample Analysis Date:** 3/1/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19KB9	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19KB9	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.2.29 SDG K1905

SDG K1905 – VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1905	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling		**Analytes:** VOA	
Samples: K19F86, K19F87			
Laboratory: Lionville	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD	**Sample Collection Date:** 01/11/2010	**Sample Analysis Date:** 01/22/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	None	-	No action	
Blanks					
Blanks - Method	Yes	None	-	No action	
Equipment Blank Sample ID:	None collected				
Trip Blank Sample ID:	None analyzed				
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	Acetone = 162%	J	Qualify positive sample results as estimated (J).	All samples. No impact since both compounds ND for all samples.
Matrix Spike/Matrix Spike Duplicate Sample ID:J19F86	No	None	-	No action	
Field Duplicates Sample ID:	None collected				
Summary					
Validity of Data	Not all QC criteria were met, but no data were rejected.				
Additional Notes:					

SDG K1905 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1905	**W&C Project No.:**222007
Medium: Surface water – GW Upwelling		**Analytes:** Metals
Samples: J19F49, J19F50, J19F87, J19F90, J19F86, J19F91		

Laboratory: Lionville	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD	**Sample Collection Date:** 1/11/2010, 1/15/2010, 1/16/2010	**Sample Analysis Date:** ICP – 01/27/2010 Hg – 01/28/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	The detection limit for Si exceeds specification in work plan.	-	No action based on guidance.	
Blanks					
Preparation Blank	No	Al = 19 µg/L Ca = 27.5 µg/L	UJ	Qualify positive sample results < 5x the blank concentration as ND.	All samples. Impacts: Al – all samples Ca - None
Equipment Blank	None collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spike Sample ID:J19F49	Yes	None	-	No action	
Lab Duplicate Sample ID:J19F49	Yes	None	-	No action	
Field Duplicate Sample ID:	None collected				
QC Summary					
Validity of Data	Not all QC criteria were met but no data were rejected.				
Additional Notes:					

SDG K1905 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1905	**W&C Project No.:**222007	
Medium: Surface water – GW Upwelling	**Analytes:** Gamma Spec, Isotopic Plutonium, Isotopic Thorium, Isotopic Uranium, total Strontium		
Samples: J19F49, J19F50, J19F86, J19F87			
Laboratory: Eberline	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD	**Sample Collection Date:** 1/11/2010, 1/15/2010, 1/16/2010	**Sample Analysis Date:** 1-2/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	**RDL** Strontium **MDA** Ra-226 Ra-228	-	No action	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:	None collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Tracer Results	Yes	None	-	No action	
Matrix Spike	None analyzed				
Lab Duplicates Sample ID:J19F49	Yes	None	-	No action	
Field Duplicate Sample ID:	None collected				
QC Summary					
Validity of Data	All QC parameters had compliant results.				
Additional Notes:					

SDG K1905 – DOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1905	**W&C Project No.:**222007		
Medium: Surface water – GW Upwelling			**Analytes:** DOC		
Samples: J19F49, J19F50, J19F86, J19F87					
Laboratory: Lionville	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD		**Sample Collection Date:** 1/11/2010, 1/15/2010, 1/16/2010	**Sample Analysis Date:** 02/03/2010	
QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limit	Yes	None	-	No action	
Method Blank	Yes	None	-	No action	
Equipment Blank	None collected				
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J19F49	Yes	None	-	No action	
Lab Duplicate Sample ID: J19F49	Yes	None	-	No action	
Field Duplicate	None collected				
QC Summary					
Validity of Data	All QC parameters were compliant with criteria.				
Additional Notes:					

SDG K1905 – Nitrate/Nitrite QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1905	**W&C Project No.:**222007	
Medium: Surface water – GW Upwelling		**Analytes:** Nitrate/Nitrite as N	
Samples: J19F49, J19F50			
Laboratory: Lionville	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD	**Sample Collection Date:** 1/15/2010, 1/16/2010	**Sample Analysis Date:**1/22/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limit	Lab reporting limits not provided in SAP				
Method Blank	Yes	None	-	No action	
Equipment Blank	None collected				
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J19F49	Yes	None	-	No action	
Lab Duplicate Sample ID: J19F49	Yes	None	-	No action	
Field Duplicate Sample ID:	None collected				
QC Summary					
Validity of Data	All QC parameters were compliant with criteria.				
Additional Notes:					

SDG K1905 – Anions QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1905	**W&C Project No.:**222007	
Medium: Surface water – GW Upwelling		**Analytes:** Bromide, Chloride, Fluoride, Nitrate, Nitrite, Orthophosphate, Sulfate	
Samples: J19F49, J19F50, J19F86, J19F87			
Laboratory: Lionville	**Date Data Assessment Completed:** 04/08/2010 **Complete By:** RDD	**Sample Collection Date:** 1/11/2010, 1/15/2010, 1/16/2010	**Sample Analysis Date:** 1/22/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Holding times exceeding by > 2x limit for NO_3, NO_2, PO_4^{-3}	J/R	Qualify positive results as estimated (J) and ND results as rejected (R).	J19F49, J19F50 Nitrate – J applied Nitrite – R applied Phosphate – R applied
Detection Limits	Lab reporting limits not provided in SAP				
Method Blank	Yes	None	-	No action	
Equipment Blank	None collected				
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: K19F49	Yes	None	-	No action	
Lab Duplicate Sample ID: K19F49	Yes	None	-	No action	
Field Duplicate	None collected				
QC Summary					
Validity of Data	No – some rejected data	Data were rejected due to holding time exceedances.	R	Nitrite & orthophosphate qualified as rejected (R)	J19F49, J19F50
Additional Notes:					

D.2.30 SDG K1907

SDG K1907 – VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1907		**W&C Project No.:**222007	
Medium: Surface Water – GW Upwelling				**Analytes:** VOA	
Samples: J19FF0, J19FF1					
Laboratory: Lionville	**Date Data Assessment Completed:** 4/9/2010 **Complete By:** LEM			**Sample Collection Date:** 1/11/2010	**Sample Analysis Date:** 1/23/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Blanks - Method	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Trip Blank Sample ID: J19FF0, J19FF1	Yes	None	-	No Action	
Other QC Results					
Surrogate Recoveries	Yes	None	-	No Action	
LCS Results	No	Acetone = 169%	J	Qualify positive results as estimated (J).	No impacts since all results for acetone are ND.
Matrix Spike/Matrix Spike Duplicate Sample ID: J19FF1	Yes	None	-	No Action	
Field Duplicates Sample ID:	Not collected				
Summary					
Validity of Data	Not all QC criteria met, but no rejected results				
Additional Notes:					

SDG K1907 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1907	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** Metals
Samples: J19F51, J19F53, J19F54, J19F55, J19F52, J19F56, J19H23, J19H25		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/9/2010 **Complete By:** LEM	**Sample Collection Date:** 1/15, 16, 17, 18/2010	**Sample Analysis Date:** ICP – 1/27/2010 Hg – 1/28/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	No Laboratory reporting limit not provided for Titanium in the Work Plan.	RDL for Silicon exceeds reporting limit provided in the Work Plan.	-	No Action	
Blanks					
Preparation Blank	No	Al = 19 ug/L Ca = 27.5	UJ	Qualify positive results <5x blank concentration as estimated non-detect (UJ)	Impacts the following samples: Al: J19F51, J19F55, J19F52, J19H23, J19H25
Equipment Blank Sample IDs:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spike Sample ID: J19F53: Hg J19F53: others	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19F53: Hg J19F53: others	No	Mo = 41%	-	No action since the difference between both results is <1x RDL.	
Field Duplicate Sample IDs:	Not collected				
QC Summary					
Validity of Data	Not all QC criteria met, but no rejected results				
Additional Notes:					

SDG K1907 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.: K1907**	**W&C Project No.:**222007	
Medium: Surface Water - GW Upwelling	**Analytes:** Gamma Spec, Isotopic Plutonium, Isotopic Thorium, Isotopic Uranium, Sr-90		
Samples: J19F51, J19F52, J19H23			
Laboratory: Eberline	**Date Data Assessment Completed:** 4/9/2010 **Complete By:** LEM	**Sample Collection Date:** 1/17, 18/2010	**Sample Analysis Date:** 1/28, 2/2/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	No	**RDL** Strontium **MDA** Potassium-40 Radium-226 Radium-228 Americium-241 Beryllium-7 Ruthenium-106	-	No Action	All samples

Medium: Surface Water – GW Upwelling	**Analytes:** Gamma Spec, Isotopic Plutonium, Isotopic Thorium, Isotopic Uranium, Sr-90, Carbon-14, Tritium
Samples: J19JJ6, J19JT3, J19K51, J19K61, J19KF3, J19KX6, J19L13	

Laboratory: Eberline	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/26-28/2010	**Sample Analysis Date:** 3/8-3/11/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	No	**RDL** Strontium Carbon-14 **MDA** Carbon-14 Potassium-40 Radium-226 Radium-228 Beryllium-7 Ruthenium-106	-	No Action	All samples
Blanks					
Method Blanks	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Tracer Results	Yes	None	-	No Action	
Matrix Spike Sample ID: J19K51: Tritium J19L13: Carbon-14	Yes	None	-	No Action	
Lab Duplicates Sample ID: J19JJ6	No	Uranium-233/234: 29% Uranium-238: 29%	-	No action since the difference between both results is less than 1x the RDL	
Field Duplicate	Not collected				
QC Summary					
Validity of Data	Yes; no data were qualified or rejected				
Additional Notes:					

SDG K1955 – DOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1955	**W&C Project No.:**222007
Medium: Surface Water - GW Upwelling		**Analytes:** DOC
Samples: J19JJ6, J19K51, J19KX6, J19JT3, J19KF3, J19K61		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/26-28/2010	**Sample Analysis Date:** 3/12/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limit	Yes	None	-	No Action	
Blanks					
Method Blank	No	DOC = 0.305 mg/L	-	No action because sample results are >5x highest blank concentration.	
Equipment Blank Sample IDs:	Not collected				
Other QC					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19JJ6	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19JJ6	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes; no data were qualified or rejected				
Additional Notes:					

SDG K1955 – Nitrate/Nitrite QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1955	**W&C Project No.:**222007
Medium: Surface Water – GW Upwelling		**Analytes:** Nitrate/Nitrite as N
Samples: J19K51, J19K61		

Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/26, 28/2010	**Sample Analysis Date:** 3/10/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limit	Laboratory reporting limits not provided in SAP				
Blanks					
Method Blank	Yes	None	-	No Action

LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K51	Yes	None	-	No Action	
Lab Duplicate Sample ID: J19K61	Yes	None	-	No Action	
Field Duplicate Sample ID:	Not collected				
QC Summary					
Validity of Data	Yes; no data were qualified or rejected				
Additional Notes:					

SDG K1955 – Anions QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1955	**W&C Project No.:**222007	
Medium: Surface Water – GW Upwelling		**Analytes:** Bromide, Chloride, Fluoride, Nitrate, Nitrite, Orthophosphate, Sulfate	
Samples: J19K51, J19K61			
Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/26, 28/2010	**Sample Analysis Date:** 3/3, 10/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Holding Time for nitrate, nitrite, and orthophosphate is 48 hours.	J/R	For holding times >2x criteria, qualify positive results as estimated (J) and ND results as rejected (R).	Impacts all samples for nitrate, nitrite, and orthophosphate Sample J19K51: Nitrate = J applied Nitrite = J applied Phosphate = R applied Sample J19K61: Nitrate = J applied Nitrite = R applied Phosphate = R applied
Detection Limit	Laboratory reporting limits not provided in SAP				
Blanks					
Method Blank	Yes	None	-	No Action	
Equipment Blank Sample IDs:	No collected				
Other QC					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19K51	No	F = 146%	J	Qualify positive and non-detect results as estimated (J).	Impacts to all samples.
Lab Duplicate Sample ID: J19K51	No	Nitrate = 48.5%	-	No action because the difference between sample results is <1x RDL.	
Field Duplicate	Not collected				

SDG K1955 – Anions QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1955	**W&C Project No.:**222007	
Medium: Surface Water – GW Upwelling		**Analytes:** Bromide, Chloride, Fluoride, Nitrate, Nitrite, Orthophosphate, Sulfate	
Samples: J19K51, J19K61			
Laboratory: Lionville	**Date Data Assessment Completed:** 4/13/2010 **Complete By:** LEM	**Sample Collection Date:** 2/26, 28/2010	**Sample Analysis Date:** 3/3, 10/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Sample ID:					
QC Summary					
Validity of Data	No	Holding Time for nitrate, nitrite, and orthophosphate were >2x criteria	R	ND results qualified as rejected	Impacts the following samples: Nitrite: J19K61 Orthophosphate: J19K51, J19K61
Additional Notes:					

D.3 SEDIMENT

D.3.1 SDG J00657

SDG J00657 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00657	**W&C Project No.:**222007
Medium: Sediment – GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19FB3, J19FB2		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/30/2010 **Completed By:** LEM	**Sample Collection Date:** 1/11/2010	**Sample Analysis Date:** 1/12/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	No	Cr+6 = 61%	J	Qualify positive and non-detect results as estimated (J).	Impacts all samples
Matrix Spikes Sample ID: J19FB2	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19FB2	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Defective stirring magnet may have attributed to low LCS.					

D.3.2 SDG J00660

SDG J00660 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00660	**W&C Project No.:**222007	
Medium: Sediment – GW Upwelling		**Analytes:** Hexavalent Chromium	
Samples: J19F67			
Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/30/2010 **Completed By:** LEM	**Sample Collection Date:** 1/15/2010	**Sample Analysis Date:** 1/16/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19F67	No	Cr+6 = 19%	R	Qualify non-detect result as rejected (R) because recovery was <30%.	Impacts to sample J19F67
Laboratory Duplicates Sample ID: J19F67	Yes	None	-	No Action	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	No	Matrix Spike	R	Samples were rejected based on matrix spike results.	Impacts to sample J19F67
Additional Notes:					

D.3.3 SDG J00662

SDG J00662 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00662	**W&C Project No.:**222007
Medium: Sediment – GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19F68		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/30/2010 **Completed By:** LEM	**Sample Collection Date:** 1/16/2010	**Sample Analysis Date:** 1/17/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID:	No	MS/MSD not analyzed	J	Qualify positive and non-detect results as estimated (J) because Matrix Spike was not analyzed. See notes below.	Impacts to sample J19F68
Laboratory Duplicates Sample ID:	No	Laboratory duplicate not analyzed	J	Qualify positive and non-detect results as estimated (J).	Impacts to sample J19F68
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes: Insufficient sample volume to perform Matrix Spike and laboratory duplicate analyses.					

D.3.4 SDG J00667

SDG J00667 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00667	**W&C Project No.:**222007
Medium: Sediment – GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19F65		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/30/2010 **Completed By:** LEM	**Sample Collection Date:** 1/17/2010	**Sample Analysis Date:** 1/18/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No Action	
Detection Limits	Yes	None	-	No Action	
Blanks					
Preparation Blank	Yes	None	-	No Action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No Action	
Matrix Spikes Sample ID: J19F65	Yes	None	-	No Action	
Laboratory Duplicates Sample ID: J19F65	No	RPD = 39.3%	-	No action because both sample and duplicate results are non-detect.	
Field Duplicates	Not collected				
QC Summary					
Validity of Data	Yes	None	-	No Action	No rejected data
Additional Notes:					

D.3.5 SDG J00670

SDG J00670 – Hexavalent Chromium QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** J00670	**W&C Project No.:**222007
Medium: Sediment – GW Upwelling		**Analytes:** Hexavalent Chromium
Samples: J19F66, J19H37		

Laboratory: Test America, Richland, WA	**Date Data Assessment Completed:** 3/30/2010 **Completed By:** LEM	**Sample Collection Date:** 1/18/2010	**Sample Analysis Date:** 1/19/2010

SDG K1953 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1953		**W&C Project No.:**222007	
Medium: Sediment - GW Upwelling			**Analytes:** Gamma Spec, Tritium, technetium 99, Isotopic Plutonium, Isotopic Thorium, Isotopic Uranium, total Strontium		
Samples: J19H34, J19K71, J19K72, J19KC5, J19KC6, J19KM5, J19KY6					
Laboratory: Eberline	**Date Data Assessment Completed:** 04/09/2010 **Complete By:** RDD		**Sample Collection Date:** 2/19/2010, 2/20/2010, 2/21/2010, 2/22/2010		**Sample Analysis Date:** 2-3/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	Yes	Cobalt 60, cesium 137, radium 226, radium 228, europium 152, europium 154, europium 156, detection limits for J19K71 exceed limits specified in the work plan.	-	No action required as specified in guidance.	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank Sample ID:	None collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Tracer Results	Yes	None	-	No action	
Lab Duplicates Sample ID:J19H34	Yes	None	-	No action	
Field Duplicate Sample ID:	None collected				
QC Summary					
Validity of Data	All QC parameters had compliant results.				
Additional Notes:					

SDG K1953 – TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1953	**W&C Project No.:**222007
Medium: Sediment - GW Upwelling		**Analytes:** TOC
Samples: J19H34, J19K71, J19K72, J19KC5, J19KC6, J19KY6		

Laboratory: Lionville	**Date Data Assessment Completed:** 04/09/2010 **Complete By:** RDD	**Sample Collection Date:** 2/19/2010, 2/20/2010, 2/21/2010, 2/22/2010	**Sample Analysis Date:** 03/10/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None		No action	
Detection Limit	Yes	None	-	No action	
Method Blank	No	TOC = 10.3 mg/kg	-	Qualify concentrations < 5x the blank result as ND.	All samples, however no impacts.
Equipment Blank	None collected				
LCS Results	Yes	None	-	No action	
Matrix Spikes Sample ID: J19KC5	Yes	None	-	No action	
Lab Duplicate Sample ID: J19KC5	No	TOC = 38%	J	Qualify positive results as estimated (J).	All samples. Impacts to all samples.
Field Duplicate	None collected				
QC Summary					
Validity of Data	All QC parameters were compliant with criteria.				
Additional Notes:					

D.3.37 SDG K1956

SDG K1956 – VOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1956	**W&C Project No.:**222007
Medium: Sediment - GW Upwelling		**Analytes:** VOA
Samples: J19KY5		

Laboratory: Lionville	**Date Data Assessment Completed:** 04/13/2010 **Complete By:** RDD	**Sample Collection Date:** 02/26/2010	**Sample Analysis Date:** 03/08/2010

QC Parameter	**All in Spec.?**	**Non-Compliant Results**	**Flag**	**Action/ Notes**	**Associated Samples**
Holding Times	Yes	None	-	No action	
Detection Limits	No	1,1,1-TCA, 1,2-DCA, 2-butanone, $MeCl_2$ limits exceed those in work plan.	-	No action based on criteria in guidance	
Blanks					
Blanks - Method	No	$MeCl_2$ = 3.68 µg/kg	UJ	Qualify positive results < 5x the blank concentration as ND (UJ).	All samples. Impacts J19KY5
Equipment Blank Sample ID:	None collected				
Trip Blank Sample ID: J19KJ6	No	$MeCl_2$ = 2.68 µg/kg	-	No action based on criteria in guidance.	
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	2-butanone =195% 2-hexanone =184% Acetone = 227% Bromomethane = 159%	-	Qualify positive sample results as estimated (J).	All samples. No impact since all compounds ND.
Matrix Spike/Matrix Spike Duplicate Sample ID:J19KY5	Yes	None	-	No action	
Field Duplicates Sample ID:	None collected				
Summary					
Validity of Data	Not all QC criteria were met, but no data were rejected.				
Additional Notes:					

SDG K1956 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1956	**W&C Project No.:**222007	
Medium: Sediment - GW Upwelling		**Analytes:** Metals (Group 1 of 2)	
Samples: J19JD3, J19KC4			
Laboratory: Lionville	**Date Data Assessment Completed:** 0413/2010 **Complete By:** RDD	**Sample Collection Date:** 2/27/2010, 2/28/2010	**Sample Analysis Date:** ICP – 03/22/2010 Hg – 03/12/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	The detection limit for Ca, Fe, P, Zn exceeds specification in work plan.	-	No action based on guidance.	
Blanks					
Preparation Blank	No	Sn = 2.24 mg/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND.	All samples. Impacts: Sn – all samples
Equipment Blank	None collected				
Other QC Results					
LCS Results	No	Si = 61%	J	Qualify positive and ND sample results as estimated (J).	All samples
Matrix Spike Sample ID:J19KC4	No	**Non-compliant Recoveries** Sb = 65% Ba = 58% Ca = 28% P = -8% V = 32% Zn = 53%	J	Qualify positive Ca and P and positive and ND sample results of Sb, Ba, V and Zn as estimated (J). Qualify as rejected ND sample results of Ca and P.	All sample results qualified as estimated (J). Ca and P: all positive results so all “J”
Lab Duplicate Sample ID:J19KC4	No	Al = 32% As = 34% Cu = 44% Pb = 76% Li = 43% Mg = 76% Ni = 68% Si = 40% Na= 80% Sr = 36% Zn = 45%	J	Qualify positive and ND sample results as estimated.	All samples
Field Duplicate	None collected				
QC Summary					
Validity of Data	Not all QC criteria were met but no data were rejected.				
Additional Notes:					

SDG K1956 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1956	**W&C Project No.:**222007	
Medium: Sediment - GW Upwelling		**Analytes:** Metals (Group 2 of 2)	
Samples: J19K73, J19K74, J19KY5, J19JK8, J19KF6			
Laboratory: Lionville	**Date Data Assessment Completed:** 0413/2010 **Complete By:** RDD	**Sample Collection Date:** 2/26/2010, 2/27/2010, 2/28/2010	**Sample Analysis Date:** ICP – 03/22/2010 Hg – 03/17/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	The detection limit for Ca, Fe, P, Zn exceeds limits specified in work plan.	-	No action based on guidance.	
Blanks					
Preparation Blank	No	Sn = 2.24 mg/kg	UJ	Qualify positive sample results < 5x the blank concentration as ND.	All samples. Impacts: Sn – all samples
Equipment Blank	None collected				
Other QC Results					
LCS Results	No	Si = 61%	J	Qualify positive and ND sample results as estimated (J).	All samples
Matrix Spike Sample ID:J19K73	No	**Non-compliant Recoveries** Sb = 54% P = 54% Zn = 1%	J	Qualify positive Zn and positive and ND sample results of Sb, Ba, V and Zn as estimated (J). Qualify as rejected ND sample results of Zn.	All samples Zn: all positive results, so all “J”
Lab Duplicate Sample ID:J19K73	No	Ba = 43% Co = 49% Pb = 31% Mn = 83% V = 31% Zn = 40%	J	Qualify positive and ND sample results as estimated.	All samples
Field Duplicate Sample ID: J19K73/J19K74	No	Cr = 32% Na = 33%	-	No action based on criteria in guidance.	
QC Summary					
Validity of Data	Not all QC criteria were met but no data were rejected.				
Additional Notes:					

SDG K1956 – Radionuclides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA		**SDG No.:** K1956	**W&C Project No.:**222007
Medium: Sediment - GW Upwelling		**Analytes:** Gamma Spec, Carbon 14 (J19JD3, J19KF6 only), Isotopic Plutonium, Isotopic Thorium, Isotopic Uranium, total Strontium, tritium (J19K73 and J19K74)	
Samples: J19JD3, J19JK8, J19K73, J19K74, J19KC4, J19KF6, J19KY5			
Laboratory: Eberline	**Date Data Assessment Completed:** 04/12/2010 **Complete By:** RDD	**Sample Collection Date:** 2/26/2010, 2/27/2010, 2/28/2010	**Sample Analysis Date:** 3/2010

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Europium 154 detection limit for J19JD3 slightly exceeds limit specified in the work plan.	-	No action based on guidance	
Blanks					
Method Blanks	Yes	None	-	No action	
Equipment Blank	None collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Tracer Results	Yes	None	-	No action	
Matrix Spike (C_{14} and tritium)	No	MS not analyzed	J	Qualify positive and ND results as estimated (J).	C_{14} -J19JD3, J19KF6 Tritium – J19K73, J19K74
Lab Duplicates Sample ID:J19JD3	Yes	None	-	No action	
Field Duplicate Sample ID:J19K73/J19K74	Yes	None	-	No action	
QC Summary					
Validity of Data	Although not all QC parameters had compliant results, no data were rejected.				
Additional Notes:					

SDG K1956 – TOC QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1956	**W&C Project No.:**222007	
Medium: Sediment - GW Upwelling		**Analytes:** TOC	
Samples: J19K73, J19K74, J19KY5, J19JK8, J19KF6

SDG K1863 – Pesticides QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1863	**W&C Project No.:**222007
Medium: Fish Tissue **Fish Type:** Sucker & Carp		**Analytes:** Pesticides – Group 3 of 3
Samples: **Carp Kidney** – J19258 & J196H6 **Carp Liver** – J19253 & J196H1 **Sucker Liver/Kidney** – J191Y5 & J191Y9		

Laboratory: Lionville	**Date Data Assessment Completed:** 3/24/10 **Complete By:** SRK	**Sample Collection Date:** 12/15/09	**Sample Analysis Date:** Extr: 2/2/10 Anal: 2/9/10

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	37 days out of extraction holding time (>2x)	J/R	Qualify positive results as estimated (J) and reject (R) ND	All samples
Detection Limits	No	Detection limits exceeded for most pesticides	-	No action based on guidance	
Blanks					
Method Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
Surrogate Recoveries	Yes	None	-	No action	
LCS Results	No	No LCS results for toxaphene	J	Qualify all associated results as estimated (J)	All samples
Matrix Spike/ Matrix Spike Duplicate	No	No MS/MSD results for toxaphene	J	Qualify all associated results as estimated (J)	All samples
Sample ID:J191Y5		**Non-compliant recoveries** Endrin aldehyde: 39%	J	Qualify positive and ND results as estimated (J)	All samples for endrin aldehyde
		Non-compliant RPD Endrin aldehyde: 32%	J	Qualify positive and ND results as estimated (J)	All samples for endrin aldehyde
Field Duplicate Sample ID:	Not analyzed				
QC Summary					
Validity of Data	No	Hold Time – exceeded criteria by more than 2x	R	ND results qualified as rejected (R)	All samples
Additional Notes:					

SDG K1863 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1863	**W&C Project No.:**222007
Medium: Fish Tissue **Fish Type:** Sucker & Carp		**Analytes:** Metals – Group 1 of 3

Samples:
Sucker Carcass – J191P1, J191P2, J191P3, J19220, J19224, J190V5, J190V6, J191N9, & J191P0
Carp Carcass – J19669 & J196J1
Sucker Fillet – J191X0, J191X4, J190R4, J190R5, J191H3, J191H4, J191H5, J191H6, & J191H7
Carp Fillet – J19238 & J196D6

Laboratory: Lionville	**Date Data Assessment Completed:** 3/24/10 **Complete By:** SRK	**Sample Collection Date:** 12/14/09 – 12/15/09	**Sample Analysis Date:** ICP – 1/4/09 Hg – 12/30/09

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	Yes	None	-	No action	
Detection Limits	No	Be, Ca, Fe, Li, P, K, Sn, U, and Zn	-	No action based on guidance	
Blanks					
Preparation Blank	No	Tin: 0.922 mg/kg	UJ	Qualify positive results <5x blank concentration as estimated non-detect (UJ)	All samples. Impacts all samples for tin except J191H3, J191N9, J191H5, J191H6, J191X0, J196D6, J196J1 & J19238
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	Yes	None	-	No action	
Matrix Spike/ Matrix Spike Duplicate Sample ID: J191H3 and J19238	No	J191H3 – P: 166% J19238 – Ca: 63% P: 52%	J	Qualify positive and non-detect as estimated (J/UJ)	All samples. Impacts all samples for Ca only.
Lab Duplicates Sample ID: J191H3	No	Ba: 58% RPD Ca: 52% RPD Cr: 50% RPD Sr: 64%	J	Qualify positive as estimated (J)	All samples. Impacts all samples for Ca only.
Field Duplicate Sample ID:	Not analyzed				
QC Summary					
Validity of Data	Some results qualified, none rejected.				
Additional Notes:					

SDG K1863 – Metals QC Summary Sheet

Project: Hanford – Columbia River Component of the RCBRA	**SDG No.:** K1863	**W&C Project No.:**222007
Medium: Fish Tissue **Fish Type:** Sucker		**Analytes:** Metals – Group 2 of 3
Samples: **Liver/Kidney** – J190V0, J190V1, J191N4, J191N5, J191N6, J191N7, & J191N8		

Laboratory: Lionville	**Date Data Assessment Completed:** 3/24/10 **Complete By:** SRK	**Sample Collection Date:** 12/15/09	**Sample Analysis Date:** ICP – 2/3/10 Hg – 1/29/10

QC Parameter	All in Spec.?	Non-Compliant Results	Flag	Action/ Notes	Associated Samples
Holding Times	No	Samples received outside of Hg holding time (<2x)	J	Qualify positive and ND as estimated (J)	All samples for Hg
Detection Limits	No	Be, Ca, Fe, Li, P, K, Sn, U, and Zn	-	No action based on guidance	
Blanks					
Preparation Blank	Yes	None	-	No action	
Equipment Blank Sample ID:	Not collected				
Other QC Results					
LCS Results	No	Sb: 139%	-	Qualify positive results as estimated (J)	All samples, however no action since all results ND.
Matrix Spike/ Matrix Spike Duplicate Sample ID: J190V0	Yes	None	-	No action	
Lab Duplicates Sample ID: J190V0	Yes	None	-	No action	
Field Duplicate Sample ID:	Not analyzed				
QC Summary					
Validity of Data	Some results qualified, none rejected.				
Additional Notes:					

SDG K1863 – Metals QC Summary Sheet

Project: Columbia River Component of the RCBRA – Surface Water
Subject: Wet Chemistry - Data Package No. J00212-TAL

INTRODUCTION

This memo presents the results of data validation on Data Package No. J00212 prepared by TestAmerica Laboratory Inc. (TAL). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Analyte
J17K64	10/17/08	Water	C	See note 1
J17K65	10/17/08	Water	C	See note 1
J17K66	10/17/08	Water	C	See note 1
J17K69	10/17/08	Water	C	See note 1

1 – Chromium VI by 7196A.

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-11, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation
Appendix 6. Additional Documentation Requested by Client

DATA QUALITY PARAMETERS

- **Holding Times**

Analytical holding times for metals are assessed to ascertain whether the holding time requirements were met by the laboratory. The holding time requirements are as follows: Soil samples must be analyzed within 24 hours for chromium VI.

If holding times are exceeded, but not by greater than two times the limit, all associated sample results are qualified as estimates and flagged "J" for detects and "UJ" for non-detects. If holding times are exceeded by greater than two times the limit, all associated detectable sample results are qualified as estimates and flagged "J" and all non-detects are rejected and flagged "UR".

All holding times were acceptable.

- **Method Blanks**

Method Blanks

Method blank analyses are performed to determine the extent of laboratory contamination introduced through sampling, sample preparation and analysis. At least one acceptable method blank analysis must be conducted for every 20 samples. No contaminants should be present in the method blank. All blank results must fall below the contract required detection limit (CRDL) to be acceptable.

All method blank results were acceptable.

Field (Equipment) Blank

No field blanks were submitted for analysis.

- **Accuracy**

Matrix Spike and Laboratory Control Sample

Matrix spike (MS) and laboratory control sample (LCS) analyses are used to assess the analytical accuracy of the reported data. The matrix spike is used to assess the effect of the matrix on the ability to accurately quantify sample concentrations. Recoveries must fall within the range of 65% to 135%. Samples with a recovery of less than 30% and a sample result below the IDL are rejected and flagged "UR". Samples with a recovery of 30% to 69% and a sample result less than the IDL are qualified "UJ". Samples with a recovery of greater than 130% or less than 70% and a sample result greater than the IDL are qualified as estimates and flagged "J". Finally, for samples with a recovery greater than 130% and a sample result less than the IDL, no qualification is required.

All accuracy results were acceptable.

- **Precision**

Laboratory Duplicate Samples

Analytical precision is expressed by the relative percent differences (RPD) between the recoveries of matrix spike duplicate (MSD) analyses performed on a sample in the analytical batch. Precision may alternatively be assessed using unspiked duplicate analyses performed on a sample in the analytical batch. If both sample and replicate activities (concentrations) are greater than five times the CRDL and the RPD is less than 35%, no qualification is required. If either activity (concentration) is less than five times the CRDL, the RPD control limit is less than or equal to two times the CRDL. If the RPD is outside the applicable control limit, associated results are qualified as estimated detects or estimated non-detects.

All laboratory duplicate results were acceptable.

Field Duplicate

One set of field duplicates (J17K68/J17K69) were submitted for analysis. Field blanks are compared using the same criteria as for laboratory duplicates. Under the WCH statement of work, no qualification is required.

- **Analytical Detection Levels**

Reported analytical detection levels are compared against the required quantitation limits (RQLs) to ensure that laboratory detection levels meet the required criteria. All analytes met the RQL.

- **Completeness**

Data package J00212 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 100%.

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

None found.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with WCH validation SOW are as follows:

U - Indicates the compound or analyte was analyzed for and not detected in the sample. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory.

UJ - Indicates the compound or analyte was analyzed for and not detected in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated concentration is an estimate, but the data are usable for decision-making purposes.

BJ - Applied to inorganic analyses only. Indicates the analyte concentration was greater than the IDL but less than the CRDL and is considered an estimated value.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

NJ - Indicates presumptive evidence of a compound at an estimated value. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

N - Indicates presumptive evidence of a compound. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

Certificate of Analysis

Washington Hanford Closure
2620 Fermi Avenue
Richland, WA 99354

December 1, 2008

Attention: Joan Kessner

SAF Number	:	RC-115
Date SDG Closed	:	October 17, 2008
Number of Samples	:	Four (4)
Sample Type	:	Water
SDG Number	:	J00212
Data Deliverable	:	45-Day / Summary

CASE NARRATIVE

I. Introduction

On October 17, 2008 four water samples were received at TestAmerica for chemistry analysis. Upon receipt, the samples were assigned the following laboratory ID number to correspond with the Washington Closure Hanford (WCH) specific ID:

WCH ID#	TARL ID#	MATRIX	DATE OF RECEIPT
J17K64	K08HC	WATER	10/17/08
J17K65	K08HL	WATER	10/17/08
J17K66	K08H0	WATER	10/17/08
J17R69	K08H2	WATER	10/17/08

II. Sample Receipt

The samples were received in good condition and no anomalies were noted during check-in.

III. Analytical Results/Methodology

The analytical results for this report are presented by laboratory sample ID. Each set of data includes sample identification information, analytical results and the appropriate associated statistical errors.

The requested analyses were:

Chemical Analysis
Hexavalent Chromium by EPA method 7196A

IV. Quality Control

The analytical results for each analysis performed includes a minimum of one laboratory control sample (LCS), one method (reagent) blank, and one duplicate sample analysis. Any exceptions have been noted in the "Comments" section.

QC and sample results are reported in the same units.

V. Comments

Chemical Analysis

Hexavalent Chromium by EPA method 7196A:

The LCS, batch blank, sample, sample duplicate (J17K64), sample matrix spike (J17K64) and sample matrix spike duplicate (J17K64) results are within contractual requirements.

I certify that this Certificate of Analysis is in compliance with the SOW, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hard copy data package has been authorized by the Laboratory Manager, or a designee as verified by the following signature.

From: ELR Consulting
Project: Columbia River Component of the RCBRA – Surface Water
Subject: Wet Chemistry - Data Package No. J00217-TAL

INTRODUCTION

This memo presents the results of data validation on Data Package No. J00217 prepared by TestAmerica Laboratory Inc. (TAL). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Analyte
J17RL1	10/29/08	Water	C	See note 1
J17RL2	10/29/08	Water	C	See note 1
J17RL3	10/29/08	Water	C	See note 1

1 – Chromium VI by 7196A.

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-11, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation
Appendix 6. Additional Documentation Requested by Client

DATA QUALITY PARAMETERS

- **Holding Times**

Analytical holding times for metals are assessed to ascertain whether the holding time requirements were met by the laboratory. The holding time requirements are as follows: Soil samples must be analyzed within 24 hours for chromium VI.

If holding times are exceeded, but not by greater than two times the limit, all associated sample results are qualified as estimates and flagged "J" for detects and "UJ" for non-detects. If holding times are exceeded by greater than two times the limit, all associated detectable sample results are qualified as estimates and flagged "J" and all non-detects are rejected and flagged "UR".

All holding times were acceptable.

- **Method Blanks**

Method Blanks

Method blank analyses are performed to determine the extent of laboratory contamination introduced through sampling, sample preparation and analysis. At least one acceptable method blank analysis must be conducted for every 20 samples. No contaminants should be present in the method blank. All blank results must fall below the contract required detection limit (CRQL) to be acceptable.

All method blank results were acceptable.

Field (Equipment) Blank

No field blanks were submitted for analysis.

- **Accuracy**

Matrix Spike and Laboratory Control Sample

Matrix spike (MS) and laboratory control sample (LCS) analyses are used to assess the analytical accuracy of the reported data. The matrix spike is used to assess the effect of the matrix on the ability to accurately quantify sample concentrations. Recoveries must fall within the range of 65% to 135%. Samples with a recovery of less than 30% and a sample result below the IDL are rejected and flagged "UR". Samples with a recovery of 30% to 69% and a sample result less than the IDL are qualified "UJ". Samples with a recovery of greater than 130% or less than 70% and a sample result greater than the IDL are qualified as estimates and flagged "J". Finally, for samples with a recovery greater than 130% and a sample result less than the IDL, no qualification is required.

All accuracy results were acceptable.

- **Precision**

Laboratory Duplicate Samples

Analytical precision is expressed by the relative percent differences (RPD) between the recoveries of matrix spike duplicate (MSD) analyses performed on a sample in the analytical batch. Precision may alternatively be assessed using unspiked duplicate analyses performed on a sample in the analytical batch. If both sample and replicate activities (concentrations) are greater than five times the CRDL and the RPD is less than 35%, no qualification is required. If either activity (concentration) is less than five times the CRDL, the RPD control limit is less than or equal to two times the CRDL. If the RPD is outside the applicable control limit, associated results are qualified as estimated detects or estimated non-detects.

All laboratory duplicate results were acceptable.

Field Duplicate

No field duplicates were submitted for analysis.

· Analytical Detection Levels

Reported analytical detection levels are compared against the required quantitation limits (RQLs) to ensure that laboratory detection levels meet the required criteria. All analytes met the RQL.

· Completeness

Data package J00217 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 100%.

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

None found.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with WCH validation SOW are as follows:

U - Indicates the compound or analyte was analyzed for and not detected in the sample. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory.

UJ - Indicates the compound or analyte was analyzed for and not detected in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated concentration is an estimate, but the data are usable for decision-making purposes.

BJ - Applied to inorganic analyses only. Indicates the analyte concentration was greater than the IDL but less than the CRDL and is considered an estimated value.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

NJ - Indicates presumptive evidence of a compound at an estimated value. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

N - Indicates presumptive evidence of a compound. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

Laboratory Narrative and Chain-of-Custody Documentation

TestAmerica
THE LEADER IN ENVIRONMENTAL TESTING

Certificate of Analysis

Washington Hanford Closure
2620 Fermi Avenue
Richland, WA 99354

December 11, 2008

Attention: Joan Kessner

SAF Number : RC-115
Date SDG Closed : October 30, 2008
Number of Samples : Three (3)
Sample Type : Water
SDG Number : J00217
Data Deliverable : 45-Day / Summary

CASE NARRATIVE

I. Introduction

On October 30, 2008 three water samples were received at TestAmerica for chemistry analysis. Upon receipt, the samples were assigned the following laboratory ID number to correspond with the Washington Closure Hanford (WCH) specific ID:

WCH ID#	TARL ID#	MATRIX	DATE OF RECEIPT
J17RL1	K1XNM	WATER	10/30/08
J17RL2	K1XN0	WATER	10/30/08
J17RL3	K1XN3	WATER	10/30/08

II. Sample Receipt

The samples were received in good condition and no anomalies were noted during check-in.

III. Analytical Results/Methodology

The analytical results for this report are presented by laboratory sample ID. Each set of data includes sample identification information, analytical results and the appropriate associated statistical errors.

The requested analyses were:

Chemical Analysis
Hexavalent Chromium by EPA method 7196A

IV. Quality Control

The analytical results for each analysis performed includes a minimum of one laboratory control sample (LCS), one method (reagent) blank, and one duplicate sample analysis. Any exceptions have been noted in the "Comments" section.

QC and sample results are reported in the same units.

V. Comments

Chemical Analysis
Hexavalent Chromium by EPA method 7196A:
The LCS, batch blank, sample, sample duplicate (J17RL1), sample matrix spike (J17RL1) and sample matrix spike duplicate (J17RL1) results are within contractual requirements.

I certify that this Certificate of Analysis is in compliance with the SOW, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hard copy data package has been authorized by the Laboratory Manager, or a designee as verified by the following signature.

F.1.1.3 SDG K1401

SAF-RC-115
Columbia River Component of the RCBRA – Surface Water
FINAL VALIDATION PACKAGE

COMPLETE COPY OF VALIDATION PACKAGE TO:

Kathy Wendt H4-21

COMMENTS:

SDG K1401 **SAF-RC-115**

Sampling Location: **WBT-1SW**
WBW-1SW
RG-1SW

Date: 13 April 2009
To: Washington Closure Hanford Inc. (technical representative)
From: ELR Consulting
Project: Columbia River Component of the RCBRA - Surface Water
Subject: Radiochemistry - Data Package No. K1401-EB

INTRODUCTION

This memo presents the results of data validation on Data Package No. K1401 prepared by Eberline Services (EB). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Data
J17K50	10/17/08	Water	C	See note 1
J17K51	10/17/08	Water	C	See note 1
J17K52	10/17/08	Water	C	See note 1
J17K67	10/17/08	Water	C	See note 1

1 – Tritium, carbon-14, total strontium, technetium-99, alpha spectroscopy & gamma spectroscopy.

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-11, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Qualified Data Summary and Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation
Appendix 6. Additional Data Requested by Client

DATA QUALITY PARAMETERS

- **Holding Times**

Holding times are calculated from Chain-of-Custody forms to determine the validity of the results. The maximum holding time for radiochemical analysis is 6 months.

All holding times were acceptable.

- **Preparation (Method) Blanks**

Laboratory Blanks

Blank samples are analyzed to determine if positive results are due to laboratory reagent, sample container, or detector contamination. If blank analysis results indicate the presence of an analyte above the minimum detectable activity (MDA), the following qualifiers are applied: All positive sample results less than five times the highest blank concentration are qualified as estimates and flagged "J"; sample results below the MDA are qualified as undetected and flagged "U"; sample results above the MDA and greater than five times the highest blank concentration are not qualified.

All blank results were acceptable (although the MDA for tritium and cesium-137 exceeded QC limits).

Field (Equipment) Blank

No field blanks were submitted for analysis.

- **Accuracy**

Accuracy is evaluated from laboratory control sample (LCS) or blank spike sample (BSS) batch samples and spiked samples from the analytical batch. Measured activities are compared to the known added amounts. The acceptable LCS or BSS and matrix spike (MS) recovery range is 70-130%. In addition, samples may be spiked with a radiochemical tracer to assist in isolating the radioisotope of interest with the yield of the tracer being used in calculating sample activity. The acceptable range for tracer recovery is 20% to 105%. Spike sample results outside the above ranges result in associated sample results being qualified as estimates, or not qualified, depending on the activity of the individual sample. Results are rejected for LCS/BSS recoveries of less than 30% and tracer recoveries of less than 20%, and tracer recoveries of greater than 115% for detected results.

Due to the lack of an LCS analysis, all thorium-228 and thorium-232 results were qualified as estimates and flagged "J".

All other accuracy results were acceptable.

- **Laboratory Duplicates**

Analytical precision is expressed by the relative percent differences (RPD) between the recoveries of duplicate matrix spike analyses performed on a sample in the analytical batch. Precision may alternatively be assessed using unspiked duplicate analyses performed on a sample in the analytical batch. If both sample and replicate activities (concentrations) are greater than five times the contract required detection limit (CRDL) and the RPD is less than 20%, no qualification is required. If either activity (concentration) is less than five times the CRDL, the RPD control limit is less than or equal to two times the CRDL. If the RPD is outside the applicable control limit, associated results are qualified as estimated detects or estimated non-detects.

All duplicate results were acceptable.

Field Duplicates

One set of field duplicates (J17K52/J17K67) were submitted for analysis. Laboratory duplicates are compared using the same criteria as for laboratory duplicates. All field duplicate results were acceptable.

- **Detection Levels**

Reported analytical detection levels for undetected analytes are compared against the project RQLs to ensure that laboratory detection levels meet the required criteria. Fourteen analytes exceeded the RQL. Under the WCH statement of work, no qualification is required. All other analytes met the RQL.

- **Completeness**

Data package No. K1401 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 100%.

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

The following minor deficiencies were noted:

- Due to the lack of an LCS analysis, all thorium-228 and thorium-232 results were qualified as estimates and flagged "J".

Data flagged "J" indicates that the associated concentration is an estimate, but under the WCH statement of work, the data may be usable for decision-making purposes. All other validated results are considered accurate within the standard error associated with the methods.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with the WCH statement of work are as follows:

U - Indicates the compound or analyte was analyzed for and not detected above the minimum detectable activity (MDA) in the sample. The value reported is the sample result corrected for sample dilution and moisture content by the laboratory. The data is usable for decision making purposes.

UJ - Indicates the compound or analyte was analyzed for and not detected at concentrations above the minimum detectable activity (MDA) in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate, but is usable for decision making purposes.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated concentration is an estimate, but the data are usable for decision-making purposes.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

Appendix 2

Summary of Data Qualification

RADIOCHEMISTRY DATA QUALIFICATION SUMMARY*

SDG: K1401	**REVIEWER: ELR**	**Project: RCBRA**	**PAGE_1_OF_1**
COMPOUND	QUALIFIER	SAMPLES AFFECTED	REASON
Thorium-228 Thorium-232	J	All	No LCS analysis

* - The Qualified Data Summary Table includes laboratory applied "U" qualifiers not specifically identified here. The laboratory applied "U" qualifiers are included to minimize misinterpretation of results contained in the table.

Laboratory Narrative and Chain-of-Custody Documentation

Case Narrative

1.0 GENERAL

Washington Closure Hanford (WCH) Sample Delivery Group K1401 was composed of four water samples designated under SAF No. RC-115 with a Project Designation of: Columbia River Component of the RCBRA – Surface Water.

The sample was received as stated on the Chain-of-Custody documents. Any discrepancies are noted on the Eberline Services Sample Receipt Checklist included in the original report. The results were sent to WCH via e-mail January 8, 2009.

2.0 ANALYSIS NOTES

2.1 Tritium Analysis

No problems were encountered during the course of the analyses.

2.2 Carbon-14 Analysis

No problems were encountered during the course of the analyses.

2.3 Strontium-90 Analysis

No problems were encountered during the course of the analyses.

2.4 Technetium-99 Analysis

No problems were encountered during the course of the analyses.

2.5 Isotopic Thorium Analysis

No problems were encountered during the course of the analyses.

2.6 Isotopic Uranium Analysis

No problems were encountered during the course of the analyses.

2.7 Isotopic Plutonium Analysis

No problems were encountered during the course of the analyses.

2.8 Gamma Spectroscopy

No problems were encountered during the course of the analyses.

3.0 Case Narrative Certification Statement

"I certify that this data package is in compliance with the SOW, both technically and for completeness, for other then the conditions detailed above. Release of the data obtained in this hard copy data package has been authorized by the Laboratory Manager or a designee, as verified by the following signature."

Melissa Mannion

Date: 13 April 2009
To: Washington Closure Hanford (technical representative)
From: ELR Consulting
Project: Columbia River Component of the RCBRA – Surface Water
Subject: Wet Chemistry - Data Package No. K1401-LLI

INTRODUCTION

This memo presents the results of data validation on Data Package No. K1401 prepared by Lionville Laboratory Inc. (LLI). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Date
J17K50	10/17/08	Water	C	See note 1
J17K51	10/17/08	Water	C	See note 1
J17K52	10/17/08	Water	C	See note 1
J17K67	10/17/08	Water	C	See note 1

1 – Alkalinity by 310.1, hardness by 130.2 and soluble organic carbon by 415.1
* - Sample temperature not validated per WCH.

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-112, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Qualified Data Summary and Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation
Appendix 6. Additional Documentation Requested by Client

DATA QUALITY PARAMETERS

- **Holding Times**

Analytical holding times for metals are assessed to ascertain whether the holding time requirements were met by the laboratory. The holding time requirements are as follows: Samples must be analyzed within 6 months for hardness, 28 days for soluble organic carbon and 14 days for alkalinity.

If holding times are exceeded, but not by greater than two times the limit, all associated sample results are qualified as estimates and flagged "J" for detects and "UJ" for non-detects. If holding times are exceeded by greater than two times the limit, all associated detectable sample results are qualified as estimates and flagged "J" and all non-detects are rejected and flagged "UR".

Due to the holding time being exceeded by less than twice the limit, the SOC result in sample J17K67 was qualified as an estimate and flagged "J".

All other holding times were acceptable.

- **Method Blanks**

Method Blanks

Method blank analyses are performed to determine the extent of laboratory contamination introduced through sampling, sample preparation and analysis. At least one acceptable method blank analysis must be conducted for every 20 samples. No contaminants should be present in the method blank. All blank results must fall below the contract required detection limit (CRQL) to be acceptable.

All method blank results were acceptable.

Field (Equipment) Blank

No field blanks were submitted for analysis.

- **Accuracy**

Matrix Spike and Laboratory Control Sample

Matrix spike (MS) and laboratory control sample (LCS) analyses are used to assess the analytical accuracy of the reported data. The matrix spike is used to assess the effect of the matrix on the ability to accurately quantify sample concentrations. Recoveries must fall within the range of 70% to 130%. Samples with a recovery of less than 30% and a sample result below the IDL are rejected and flagged "UR". Samples with a recovery of 30% to 69% and a sample result less than the IDL are qualified "UJ". Samples with a recovery of greater than 130% or less than 70% and a sample result greater than the IDL are qualified as estimates and flagged "J". Finally, for samples with a recovery greater than 130% and a sample result less than the IDL, no qualification is required.

Due to the lack of a matrix spike analysis, all alkalinity results were qualified as estimates and flagged "J".

All other accuracy results were acceptable.

- **Precision**

Laboratory Duplicate Samples

Analytical precision is expressed by the relative percent differences (RPD) between the recoveries of matrix spike duplicate (MSD) analyses performed on a sample in the analytical batch. Precision may alternatively be assessed using unspiked duplicate analyses perfomed on a sample in the analytical batch. If both sample and replicate activities (concentrations) are greater than five times the CRDL and the RPD is less than 20%, no qualification is required. If either activity (concentration) is less than five times the CRDL, the RPD control limit is less than or equal to two times the CRDL. If the RPD is outside the applicable control limit, associated results are qualified as estimated detects or estimated non-detects.

All laboratory duplicate results were acceptable.

Field Duplicate

One set of field duplicates (J17K52/J17K67) were submitted for analysis. Laboratory duplicates are compared using the same criteria as for laboratory duplicates. The RPD for SOC (154%) was outside QC limits. Under the WCH statement of work, no qualification is required. All other field duplicate results were acceptable.

- **Analytical Detection Levels**

Reported analytical detection levels are compared against the required quantitation limits (RQLs) to ensure that laboratory detection levels meet the required criteria. All analytes met the RQL.

- **Completeness**

Data package No. K1401 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 92%

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

The following minor deficiencies were noted:

- Due to the holding time being exceeded by less than twice the limit, the SOC result in sample J17K67 was qualified as an estimate and flagged "J".

- Due to the lack of a matrix spike analysis, all alkalinity results were qualified as estimates and flagged "J".

Data flagged "J" indicates that the associated concentration is an estimate, but under the WCH statement of work, the data may be usable for decision-making purposes. All other validated results are considered accurate within the standard error associated with the methods.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with WCH validation SOW are as follows:

U - Indicates the compound or analyte was analyzed for and not detected in the sample. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory.

UJ - Indicates the compound or analyte was analyzed for and not detected in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated concentration is an estimate, but the data are usable for decision-making purposes.

BJ - Applied to inorganic analyses only. Indicates the analyte concentration was greater than the IDL but less than the CRDL and is considered an estimated value.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

NJ - Indicates presumptive evidence of a compound at an estimated value. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

N - Indicates presumptive evidence of a compound. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

Appendix 2

Summary of Data Qualification

WET CHEMISTRY DATA QUALIFICATION SUMMARY*

INORGANIC NARRATIVE

1. This narrative covers the analyses of 4 water samples.

2. The samples were prepared and analyzed in accordance with the methods checked on the attached glossary. On the Inorganic Data Summary Report, Soluble Organic Carbon represents the client requested Dissolved Organic Carbon (DOC).

   Lionville Lab (LvL) is NELAP accredited by the State of Pennsylvania. For a complete list of accrediting authorities and the corresponding analytes/methods, please contact your Project Manager. LvL certifies that all test results meet the requirements of NELAC with any exception noted in the following statements.

3. Sample holding times as required by the method and/or contract were met with the exception of DOC for sample J17R67 due to a logging error.

4. The results presented in this report are derived from samples that met LvL's sample acceptance policy with the exception of DOC as noted on the Sample Receipt Checklist.

5. The method blanks were within the method criteria.

6. The Laboratory Control Samples (LCS) were within the laboratory control limits. The duplicate LCS were within the 20% Relative Percent Difference (RPD) control limit.

7. The matrix spike recoveries were within the 75-125% control limits.

8. The replicate analyses were within the 20% RPD control limit.

9. I certify that this sample data package is in compliance with SOW requirements, both technically and for completeness, other than the conditions detailed above. Release of the data contained in this hard copy package has been authorized by the Laboratory Manager or a designee, as verified by the following signature.

SAMPLE RECEIPT CHECKLIST (SRC)

CLIENT: WC HANFORD
Project/[✓ SAF]/SOW/Release #: RC-115
Date: 10/21/08

LvLI Batch #: 0810L109
Sample Custodian:

NOTE: EXPLAIN ALL DISCREPANCIES

1. Samples Hand Delivered or [✓ Shipped] Carrier Fed Ex Airbill # 7939 7363 3649 7927 7333 9920 7977 4825 5263 7921 2970 1372

2. Custody Seals on coolers or shipping containers intact, signed & dated? ☑ Yes ☐ No ☐ No Seals

3. Outside of coolers or shipping containers are free from damage? ☑ Yes ☐ No Comments:

4. All expected paperwork received (coc & other client specific information) sealed in plastic bag and easily accessible? ☑ Yes ☐ No

5. Samples received cooled or ambient? Temp 2.9° 2.3 2.5 2.4° °C Cooler # WCH-08-010 WCH-08-012 WCH-08-014 WCH-08-017

How was the temperature taken? ☑ IR ☐ Temp. Blank ☐ Other (Specify):

Is the Temp. Criteria met for these samples? (Hg in soils @ 4°C) ☑ Yes ☐ No

6. Custody seals on sample containers intact, signed and dated? ☑ Yes ☐ No ☐ No Seals

7. COC (Client & LvLI) signed & dated? ☑ Yes ☐ No

8. Sample containers are intact? ☑ Yes [illegible] ☐ No

9. All samples on COC received? ☐ Yes ☑ No #006 DOC NOT Rec'd Rec'd one
All samples received on COC? ☐ Yes ☐ No EACH W/ED J17K49

10. All sample label information matches COC? ☑ Yes ☐ No

11. Samples properly preserved? (If #5 is no, then this is no.) ☑ Yes ☐ No

12. Samples received within hold times? ☑ Yes ☐ No
Short holds taken to wet lab? ☐ Yes ☐ No ☑ N/A

13. VOA, TOC, TOX free of headspace? (DOC) ☐ Yes ☐ No ☐ N/A Head Space

14. QC stickers placed on bottles designated by client? ☐ Yes ☐ No ☑ N/A

15. Shipment meets LvLI Sample Acceptance Policy? (Identify all bottles that do not meet the policy, which is on the reverse of this page.) ☐ Yes ☑ No

16. Project Manager contacted concerning any discrepancies? ☑ Yes ☐ No ☐ N/A
Person Contacted O-JOHNSON Date 10-21-08

To: Washington Closure Hanford (technical representative)
From: ELR Consulting
Project: Columbia River Component of the RCBRA – Surface Water
Subject: PCB/Pesticide - Data Package No. K1401-LLI

INTRODUCTION

This memo presents the results of data validation on Data Package No. K1401 prepared by Lionville Laboratory Inc. (LLI). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Data
J17K50	10/17/08	Water	C	See note 1
J17K51	10/17/08	Water	C	See note 1
J17K52	10/17/08	Water	C	See note 1
J17R67	10/17/08	Water	C	See note 1

1 – Pesticides by 8081A and PCBs by 8082.

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-11, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Qualified Data Summary and Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation

DATA QUALITY OBJECTIVES

Holding Times & Sample Preservation

Sample data were assessed to ascertain whether the holding time requirements were met by the laboratory. The holding time requirements are as follows: Samples must be extracted within 7 days of the date of sample collection and analyzed within 40 days from the date of extraction.

If holding times are exceeded by less than or equal to twice times the limit, all associated sample results are qualified as estimates and flagged "J" for detects and "UJ" for non-detects. If holding times are exceeded by greater than two times the limit, all associated detected sample results are qualified as estimates and flagged "J" and all non-detects are rejected and flagged "UR".

All holding times were acceptable.

- **Method Blank**

Method blank analyses are performed to determine the extent of laboratory contamination introduced through sampling, sample preparation or analysis. At least one method blank analysis must be conducted for every 20 samples. Method blanks should not contain target compounds at a concentration greater than required quantitation limit (RQL). If target compounds are present, sample results less than five times the blank concentration are qualified as undetected and flagged "U". If the sample result is less than five times the blank concentration and less than RQL, the result is qualified as undetected and elevated to the RQL

All method blank results were acceptable.

Field Blanks

No field blanks were submitted for analysis.

- **Accuracy**

Matrix Spike & Laboratory Control Sample

Matrix spike (MS) and laboratory control sample (LCS) analyses are used to assess the analytical accuracy of the reported data. The matrix spike is used to assess the effect of the matrix on the ability to accurately quantify sample concentrations. Recoveries must fall within the range of 50% to 150%. If spike recoveries are outside control limits, detected sample results less than five times the spike concentration are qualified as estimates and flagged "J". Non-detected sample results with spike recoveries outside control limits are qualified as estimates and flagged "UJ". Sample results greater than five times the spike concentration require no qualification.

Due to the lack of a matrix spike, matrix spike duplicate or LCS analysis, all toxaphene results were qualified as estimates and flagged "J".

Due to matrix spike duplicate and LCS results outside QC limits, all endosulfan II results were qualified as estimates and flagged "J".

All other accuracy results were acceptable.

Surrogate Recovery

The analysis of surrogate compounds provides a measure of performance for individual samples. Matrix-specific surrogate compound recovery control windows have been established by the laboratory. When a surrogate compound recovery is outside the control window, all positively identified target compounds associated with the unacceptable surrogate recoveries are qualified as estimates and flagged "J". Non-detected compounds with surrogate recoveries less than the lower control limit are qualified as having an estimated detection limit and flagged "UJ". Non-detected compounds with surrogate recoveries above the upper control limit require no qualification.

All surrogate results were acceptable.

- **Precision**

Matrix Spike/Matrix Spike Duplicate Samples

Matrix spike/matrix spike duplicate results provide matrix-specific information on the precision of the method for specific target compound classes. Precision is expressed as the relative percent difference (RPD) between the recoveries of duplicate matrix spike analyses performed on a sample. For water samples, results must be within RPD limits of plus/minus 20%. If RPD values are out of specification and the sample concentration is less than five times the spike concentration, all associated detected sample results are qualified as estimates and flagged "J". If RPD values are out of specification and the sample concentration is greater than five times the spike concentration, no qualification is required.

Due to the lack of a matrix spike and matrix spike duplicate analysis, all toxaphene results were qualified as estimates and flagged "J".

All other precision results were acceptable.

Field Duplicate Samples

One set of field duplicates (J17K52/J17R67) were submitted for analysis. Laboratory duplicates are compared using the same criteria as for laboratory duplicates. All field duplicate results were acceptable.

- **Analytical Detection Levels**

Reported analytical detection levels are compared against the project specific RQLs to ensure that laboratory detection levels meet the required criteria. All results met the RQL.

- **Completeness**

Data Package No. K1401 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 100%.

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

The following minor deficiencies were noted:

- Due to the lack of a matrix spike, matrix spike duplicate or LCS analysis, all toxaphene results were qualified as estimates and flagged "J".
- Due to matrix spike results outside QC limits, all endosulfan II results were qualified as estimates and flagged "J".

Data flagged "J" indicates that the associated concentration is an estimate, but under the WCH statement of work, the data may be usable for decision-making purposes. All other validated results are considered accurate within the standard error associated with the methods.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with the procedures herein are as follows:

U - Indicates the compound or analyte was analyzed for and not detected in the sample. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory.

UJ - Indicates the compound or analyte was analyzed for and not detected in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

NJ - Indicates presumptive evidence of a compound at an estimated value. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

N - Indicates presumptive evidence of a compound. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

Appendix 2

Summary of Data Qualification

PESTICIDE/PCB ORGANIC DATA QUALIFICATION SUMMARY*

SDG: K1401	**REVIEWER: ELR**	**Project: RCBRA**	**PAGE 1 OF 1**
COMPOUND	QUALIFIER	SAMPLES AFFECTED	REASON
Toxaphene	J	All	No MS, MSD or LCS analysis
Endosulfan II	J	All	MSD and LCS recovery

* - The Qualified Data Summary Table includes laboratory applied "U" qualifiers not specifically identified here. The laboratory applied "U" qualifiers are included to minimize misinterpretation of results contained in the table.

Case Narrative

Client: WC-HANFORD RC-115
LVL #: 0810L109
SDG/SAF # K1401 / RC-115

W.O. #: 60049-001-001-0001-00
Date Received: 10-21-2008

CHLORINATED PESTICIDES

Four (4) water samples were collected on 10-17-2008.

The samples and their associated QC samples were extracted on 10-23-2008 and analyzed according to Lionville Laboratory SOPs based on SW846, 3rd Edition procedures on 10-27,28-2008. The extraction procedure was based on method 3520C and the extracts were analyzed based on method 8081A.

The following is a summary of the QC results accompanying the sample results. Lionville Laboratory (LvL) certifies that all test results meet the requirements of NELAC except as noted below:

1. Discrepancies from the Sample Acceptance Policy have been recorded on the Sample Receipt checklist.
2. All required holding times for extraction and analysis have been met.
3. The method blank was below the reporting limits for all target compounds.
4. All surrogate recoveries were within acceptance criteria.
5. One (1) of twenty (20) blank spike recoveries was outside acceptance criteria. A copy of the Sample Discrepancy Report (SDR# 08GC140) has been enclosed.
6. One (1) of forty (40) matrix spike recoveries was outside acceptance criteria. A copy of the Sample Discrepancy Report (SDR# 08GC140) has been enclosed.
7. All initial calibrations associated with this data set were within acceptance criteria.
8. All continuing calibration standards analyzed prior to sample extracts were within acceptance criteria.

9. LvL is NELAP accredited by the State of Pennsylvania. For a complete listing of accrediting authorities and the corresponding analytes/methods, please contact your Project Manager.

10. I certify that this sample data package is in compliance with SOW requirements, both technically and for completeness, other than the conditions detailed above. Release of the data contained in this hard-copy data package has been authorized by the laboratory manager or a designee, as verified by the following signature.

W.O. #: 60049-001-001-0001-00
Date Received: 10-21-2008

PCB

Four (4) water samples were collected on 10-17-2008.

The samples and their associated QC samples were extracted on 10-23-2008 and analyzed according to Lionville Laboratory SOPs based on SW846, 3rd Edition procedures on 10-28,29-2008. The extraction procedure was based on method 3520C and the extracts were analyzed based on method 8082.

The following is a summary of the QC results accompanying the sample results. Lionville Laboratory (LVL) certifies that all test results meet the requirements of NELAC except as noted below:

1. Discrepancies from the Sample acceptance policy have been recorded on the Sample Receipt Checklist.
2. All samples were extracted and analyzed within hold time.
3. The sample and associated QC samples received Copper-Sulfur and Sulfuric Acid cleanups according to Lionville Laboratory SOPs based on SW846 methods 3660A and 3665A respectively.
4. The method blank was below the reporting limits for all target compounds.
5. All obtainable surrogate recoveries were within acceptance criteria.
6. All blank spike recoveries were within acceptance criteria.
7. All matrix spike recoveries were within acceptance criteria.
8. All initial calibrations associated with this data set were within acceptance criteria.
9. All continuing calibration standards analyzed prior to sample extracts were within acceptance criteria.

10. LVL is NELAP accredited by the State of Pennsylvania. For a complete listing of accrediting authorities and the corresponding analytes/methods, please contact your Project Manager.

11. I certify that this sample data package is in compliance with SOW requirements, both technically and for completeness, other than the conditions detailed above. Release of the data contained in this hard-copy data package has been authorized by the laboratory manager or a designee, as verified by the following signature.

Iain Daniels
Laboratory Manager

Date: 13 April 2009
To: Washington Closure Hanford (technical representative)
From: ELR Consulting
Project: Columbia River Component of the RCBRA – Surface Water
Subject: Inorganic - Data Package No. K1401-LLI

INTRODUCTION

This memo presents the results of data validation on Data Package No. K1401 prepared by Lionville Laboratory Inc. (LLI). A list of samples validated along with the analyses reported and the method of analysis is provided in the following table.

Sample ID	Sample Date	Media	Validation	Analyses
J17K50	10/17/08	Water	C	See note 1
J17K51	10/17/08	Water	C	See note 1
J17K52	10/17/08	Water	C	See note 1
J17K57	10/17/08	Water	C	See note 1
J17K58	10/17/08	Water	C	See note 1
J17K59	10/17/08	Water	C	See note 1
J17R87	10/17/08	Water	C	See note 1
J17R88	10/17/08	Water	C	See note 1

1 - ICP metals (6010B) and mercury (7471A).

Data validation was conducted in accordance with the Washington Closure Hanford (WCH) validation statement of work and the Remedial Investigation Work Plan for Hanford Site Releases to the Columbia River (DOE/RL-2008-11, Rev. 0, September 2008). Appendices 1 through 6 provide the following information as indicated below:

Appendix 1. Glossary of Data Reporting Qualifiers
Appendix 2. Summary of Data Qualification
Appendix 3. Qualified Data Summary and Annotated Laboratory Reports
Appendix 4. Laboratory Narrative and Chain-of-Custody Documentation
Appendix 5. Data Validation Supporting Documentation
Appendix 6. Additional Documentation Requested by Client

DATA QUALITY PARAMETERS

- **Holding Times**

Analytical holding times for metals are assessed to ascertain whether the holding time requirements were met by the laboratory. The holding time requirements are as follows: Samples must be analyzed within 6 months for ICP metals and 28 days for mercury.

All holding times were acceptable.

- **Preparation (Method) Blanks**

Preparation Blanks

At least one preparation blank, consisting of deionized distilled water processed through each sample preparation and analysis procedure, must be prepared and analyzed with every sample delivery group. In the case of positive blank results, samples with digestate concentrations less than five times the preparation blank value have had their associated values qualified as non-detected and flagged "U". Samples with concentrations of greater than five times the highest blank concentration do not require qualification.

In the case of negative blank results, if the absolute value exceeds the contract required detection limit (CRDL), all nondetects are rejected and flagged "UR" and all detects that are less than ten times the absolute value of the associated preparation blank result are qualified as estimates and flagged "J". If the absolute value of the negative preparation blank is greater than the instrument detection limit (IDL) and less than or equal to the CRDL, all nondetects are qualified as estimates and flagged "UJ" and all detects less than ten times the absolute value of the blank are qualified as estimates and flagged "J". If the sample results are greater than ten times the absolute value of the preparation blank, no qualification is necessary.

All preparation blank results were acceptable.

Field (Equipment) Blank

No field blanks were submitted for analysis.

- **Accuracy**

Matrix Spike and Laboratory Control Sample

Matrix spike (MS) and laboratory control sample (LCS) analyses are used to assess the analytical accuracy of the reported data. The matrix spike is used to assess the effect of the matrix on the ability to accurately quantify sample concentrations. Recoveries must fall within the range of 80% to 120%. Samples with a recovery of less than 30% and a sample result below the IDL are rejected and flagged "UR". Samples with a recovery of 30% to 79% and a sample result less than the IDL are qualified "UJ". Samples with a recovery of greater than 120% or less than 20% and a sample result greater than the IDL are qualified as estimates and flagged "J". Finally, for samples with a recovery greater than 120% and a sample result less than the IDL, no qualification is required.

Due to a matrix spike recovery outside QC limits, all tin (63.9%), antimony (69.1%) and silver (42.8%) results were qualified as estimates and flagged "J".

All other accuracy results were acceptable.

- **Precision**

Laboratory Duplicate Samples

Analytical precision is expressed by the relative percent differences (RPD) between the recoveries of matrix spike duplicate (MSD) analyses performed on a sample in the analytical batch. Precision may alternatively be assessed using unspiked duplicate analyses performed on a sample in the analytical batch. If both sample and replicate activities (concentrations) are greater than five times the CRDL and the RPD is less than 20%, no qualification is required. If either activity (concentration) is less than five times the CRDL, the RPD control limit is less than or equal to two times the CRDL. If the RPD is outside the applicable control limit, associated results are qualified as estimated detects or estimated non-detects.

All laboratory duplicate results were acceptable.

Field Duplicate

Two sets of field duplicates (J17K52/J17K67 & J17K59/J17K68) were submitted for analysis. Laboratory duplicates are compared using the same criteria as for laboratory duplicates. All field duplicate results were acceptable.

- **Analytical Detection Levels**

Reported analytical detection levels are compared against the 100 and 300 Area RQLs to ensure that laboratory detection levels meet the required criteria. All results met the RQL.

- **Completeness**

Data package No. K1401 was submitted for validation and verified for completeness. Completeness is based on the percentage of data determined to be valid (i.e., not rejected). The completion percentage was 100%.

MAJOR DEFICIENCIES

None found.

MINOR DEFICIENCIES

The following minor deficiency was noted:

- Due to a matrix spike recovery outside QC limits, all tin (63.9%), antimony (69.1%) and silver (42.8%) results were qualified as estimates and flagged "J".

Data flagged "J" indicates that the associated concentration is an estimate, but under the WCH statement of work, the data may be usable for decision-making purposes. All other validated results are considered accurate within the standard error associated with the methods.

Appendix 1

Glossary of Data Reporting Qualifiers

Qualifiers which may be applied by data validators in compliance with WCH validation SOW are as follows:

U - Indicates the compound or analyte was analyzed for and not detected in the sample. The value reported is the sample quantitation limit corrected for sample dilution and moisture content by the laboratory.

UJ - Indicates the compound or analyte was analyzed for and not detected in the sample. Due to a minor QC deficiency identified during the data validation, the associated quantitation limit is an estimate.

J - Indicates the compound or analyte was analyzed for and detected. Due to a minor QC deficiency identified during the data validation, the associated concentration is an estimate, but the data are usable for decision-making purposes.

BJ - Applied to inorganic analyses only. Indicates the analyte concentration was greater than the IDL but less than the CRDL and is considered an estimated value.

R - Indicates the compound or analyte was analyzed for, detected, and due to an identified major QC deficiency, the data are unusable.

UR - Indicates the compound or analyte was analyzed for and not detected in the sample. Additionally, the data is unusable due to an identified major QC deficiency.

NJ - Indicates presumptive evidence of a compound at an estimated value. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

N - Indicates presumptive evidence of a compound. The data may not be valid for some specific applications (i.e., usable for decision-making purposes).

Appendix 2

Summary of Data Qualification

METALS DATA QUALIFICATION SUMMARY*

SDG: K1401	**REVIEWER:** **ELR**	**Project:** **RCBRA**	**PAGE 1 OF 1**
COMPOUND	QUALIFIER	SAMPLES AFFECTED	REASON
Tin Antimony Silver	J	All	Matrix spike recovery

* - The Qualified Data Summary Table includes laboratory applied "U" qualifiers not specifically identified here. The laboratory applied "U" qualifiers are included to minimize misinterpretation of results contained in the table.

LIONVILLE LABORATORY INC.

Analytical Report

Client: WC-HANFORD RC-115
LVL#: 0810L109
SDG/SAF#: K1401/RC-115

W.O.#: 60049-001-001-0001-00
Date Received: 10-21-08

METALS CASE NARRATIVE

The following is a summary of the QC results accompanying the sample results. Lionville Laboratory (LvL) certifies that all test results meet the requirements of NELAC except as noted below.

1. This narrative covers the analyses of 8 water samples.

2. The samples were prepared and analyzed in accordance with <u>SW-846</u> protocol. All field samples for ICP analysis have been concentrated 2-fold during digestion so that the contract required detection limits (CRDL) for target analytes could be met. The resultant preconcentration factors were applied to the field sample concentrations, the preparation blank (MB), matrix spike (MS), duplicate, and laboratory control samples (LCS) only.

   The samples were run on a different instrument for Aluminum, Potassium, Phosphorous, Sodium, and Silicon due to sample matrix.

3. All analyses were performed within the required holding times.

4. Please refer to the Sample Receipt Check List for sample discrepancies in LvLI's sample acceptance policy.

5. All Initial and Continuing Calibration Verifications (ICV/CCVs) were within the 90-110% control limits (80-120% for Mercury).

6. All Initial and Continuing Calibration Blanks (ICB/CCBs) were within control limits (less than the LOQ).

7. All preparation/method blanks (MB) were within method criteria (less than the Limit of Quantitation (3-10X the LOD), MB value less than 5% of the RCRA limit, or samples greater than 20X MB value). Refer to the Inorganics Method Blank Data Summary.

8. All ICP Interference Check Standards were within control limits.

9. All laboratory control samples (LCS) were within the 80-120% control limits. Refer to the

The results presented in this report relate only to the analytical testing and conditions of the samples at receipt and during storage. All pages of this report are integral parts of the analytical data. Therefore, this report should only be reproduced in its entirety of 38 pages.

Inorganics Laboratory Control Standards Report.

10. The matrix spike (MS) recoveries for 4 analytes were outside the 75-125% control limits. Refer to the Inorganics Accuracy Report.

11. For analytes where the ICP MS is out-of-control, a post-digestion MS (PDS) and serial dilution are performed. A PDS was prepared at meaningful concentration level for the following analytes:

		PDS	PDS
Sample ID	Element	Concentration (ppb)	% Recovery
J17K58	Silicon	5,000	134.8
	Antimony	100	108.5
	Silver	100	105.4
	Tin	100	113.8

12. The duplicate analyses for 4 analytes were outside the 20% Relative Percent Difference (RPD) control limits. Refer to the Inorganics Precision Report.
